**Care and Respect in Bioethics** Darlei Dall'Agnol, 2016-09-23 This book discusses the philosophical foundations of bioethics with a particular focus on the tensions and potential dilemmas generated by the intuitionist meta ethical commitments of the predominant normative theory namely the four principles approach This view is based on the prima facie norms of respect for autonomy one ought to respect the autonomous choices of subjects of scientific research patients non maleficence one ought to refrain from inflicting harm beneficence one ought to do good and prevent or remove harm and justice one ought to treat people fairly The tensions in applying these basic principles may lead to inaction

in scientific experiments involving human subjects or to arbitrary applications of the norms in the art of caring. The problem can be made explicit in these terms on the one hand caring without respecting seems blind degenerating into forms of paternalism when for instance the carer imposes her conception of the good life or a particular procedure on the cared for on the other hand respecting without caring amounts to indifference or individualism when for example a person does not look after a vulnerable being properly. The initial hypothesis of this book then is that the concept of respectful care can be built up working from an ethico philosophical perspective to be a leading notion capable of guiding our daily actions and bioethical practices.

*What to Do When Your Baby Is Premature* Joseph Garcia-Prats, M.D., Sharon G. Hornfischer, 2000-11-14 What's happening to me? Is my baby going to be okay? **Practical Decision Making in Health Care Ethics** Raymond J. Devettere, 2016-05-20 For more than twenty years *Practical Decision Making in Health Care Ethics* has offered scholars and students a highly accessible and teachable alternative to the dominant principle based theories in the field. Raymond J. Devettere's approach is not based on an ethics of abstract obligations and duties but following Aristotle on how to live a fulfilled and happy life. In short, an ethics of personal well-being grounded in prudence, the virtue of ethical decision making. New sections added in this revised fourth edition include sequencing whole genomes even those of newborns; the new developments in genetic testing now provided by online commercial companies such as 23andMe; the genetic testing of fetuses by capturing their DNA circulating in the pregnant woman's blood; the Stanford Prison experiment and its relevance to the abuses at the Abu Ghraib prison; recent breakthroughs in the diagnosis of consciousness disorders such as PVS; the ongoing controversy generated by the NIH study of premature babies at many NICUs throughout the country; a study known as SUPPORT that the OHRP Office of Human Research Protections, an office

within the department of HHS deemed unethical Devettere updates most chapters New cases include Marlise Munoz dead pregnant woman's body kept on life support by a Texas hospital Jahi McMath teenager pronounced dead in California but treated as alive in New Jersey Margot Bentley nursing home feeding a woman dying of end stage Alzheimer's despite her advance directive that said no nourishment or liquids if she was dying with dementia Brittany Maynard dying 29 year old California woman who moved to Oregon to commit suicide with a physician's help and Samantha Burton woman with two children who suffered rupture of membranes at 25 weeks and whose physician obtained a court order to keep her at the hospital to make sure she stayed on bed rest Thoughtfully updated and renewed for a new generation of readers this classic textbook will be required reading for students and scholars of philosophy and medical ethics Textbook of Clinical Pediatrics A. Y. Elzouki, H. A. Harfi, H. Nazer, William Oh, F. B. Stapleton, R. J. Whitley, 2012-01-10 The second edition of the textbook is planned to become a MRW textbook It will be written by 389 eminent pediatricians and scientists from leading university hospitals and health centers in North America Europe Asia and Australia Written with more than 425 chapters the book will encompass virtually all pediatric subspecialties covering every pediatric disease and organ system Its strong clinical focus with a problem based approach will help practicing pediatricians residents medical students as well as family practitioners to manage sick children in a practical way based on scientific evidence Thus it will become a valuable reference and resource for all health care practitioners dealing with pediatric patients *Ethical and Legal Issues in Neurology* Tracy K. Koogler, 2014-01-09 The debate surrounding neurologically devastated newborns whether due to severe prematurity or genetic malformations has continued for over 40 years Duff and Campbell 1973 first discussed allowing these children to die in the 1970s In the 1980s others fought to make sure these children with disabilities were afforded all the rights of other children Recently some commentators have advocated for withdrawal of therapies and even euthanasia in the Netherlands Who is right What are the ethical principles that should be followed What decisions are appropriate for distraught parents to make This chapter reviews international views laws and guidelines surrounding the therapies and limitations of care for these imperiled newborns An ethical argument is presented for how to determine best interests for these special children utilizing the best interest standard Parents and physicians need to use their individual expertise and values to work together to determine each individual child's best interests Physicians may have to carry the burden for making final determinations to alleviate the guilt families may have in deciding to limit therapies **Clinical Ethics in Pediatrics** Douglas S. Diekema, Mark R. Mercurio, Mary B. Adam, 2011-09-08 This volume provides a practical overview of the ethical issues arising in pediatric practice The case based approach grounds the bioethical concepts in real life situations covering a broad range of important and controversial topics including informed consent confidentiality truthfulness and fidelity ethical issues relating to perinatology and neonatology end of life issues new technologies and problems of justice and public health in pediatrics A dedicated section also addresses the topics of professionalism including boundary issues conflicts of interests

and relationships with industry ethical issues arising during training and dealing with the impaired or unethical colleague Each chapter contains a summary of the key issues covered and recommendations for approaching similar situations in other contexts Clinical Ethics in Pediatrics A Case Based Textbook is an essential resource for all physicians who care for children as well as medical educators residents and scholars in clinical bioethics      **Assisted Ventilation of the Neonate** Jay P. Worst Case Bioethics George J. Annas, 2010-03-01 Bioethics still in its infancy is routinely called on by the government to provide political cover for controversial public health decisions involving the life and death of Americans. Domsday or worst case scenarios are often at the heart of these biopolitical decisions. A central feature of science fiction, these scenarios can impart useful insights. But worst case scenarios like Frankenstein's monster can also be unpredictably destructive, undermining both preparedness and the very values bioethics seeks to promote. Discovering a new flu strain, for example, leads immediately to visions of the 1918 flu pandemic, the worst in human history. Likewise, a ticking time bomb scenario leads to the use of the saving lives rationale that permits lawyers to justify it and physicians to carry it out. The worst case charge of death panels continues to threaten meaningful healthcare reform in the US. Fundamental change in American healthcare, Annas argues, will require fundamental change in American culture, including confronting our obsession with technology and our denial of death and replacing our over reliance on the military and market metaphors in medicine. A combination of the ecological and rights metaphors could help us successfully navigate the waters of change. In Worst Case Bioethics, George Annas employs contemporary disputes involving death and disaster to explore the radical changes underway in public health practice, the application of constitutional law to medicine and human rights discourse to promote human health and wellbeing. Worst case scenarios, especially worst case bioethics scenarios, distort debate, limit options, rationalize human rights abuses and undermine equality and social justice. It is nonetheless possible to temper worst case scenarios in ways that promote both the development of a meaningful American bioethics and a life and liberty affirming global health and human rights movement. Written at the intersection of law, bioethics, public health and human rights, Worst Case Bioethics will interest not only bioethicists but scholars in public health, public policy and human rights law as well as members of the public who want to participate in these policy debates.
