Africa B. Chaytor, K.R. Gray, 2003-06-30 C O OKID11 I welcome the opportunity to prepare a Foreword to the book on Environmental Policy and Law in Africa edited by Kevin R Gray and Beatrice Chaytor It is a pleasure to do that because the book is a contribution to the cause of capacity building for development and implementation of environmental law in Africa a goal towards which I have had an undivided focus over the last two decades There is still some belief in and outside Africa that for developing countries in general and Africa in particular development and implementation of environmental law is not a priority This belief prevails strongly in many quarters of the industrialised countries In fact the view is held either out of blatant ignorance or by some renegade industrialists who fail to appreciate Michael Royston s 1979 thesis that Pollution Prevention Pays 2 That group for obvious reasons must have their correspondent counterparts in Africa to provide hope that industries rejected as derelict in the West or inoperable due to rigorous environmental regulation can find homes to which they can escape and dump their polluting industries

Save me from the Lion's Mouth James Clarke, 2013-09-18 Save Me From the Lion s Mouth investigates the increasing conflict between people and wildlife in Africa and what needs to be done about it It describes the human suffering and perceptions of those who live outside the reserve fences among man eaters and marauders yet are excluded from the economic benefits accruing from the wildlife around them It provides evidence of a growing resentment

among rural communities especially near game reserves and warns how it is threatening the existence of Africa's game reserves. The book suggests that many in the Northern Hemisphere who support African wildlife conservation are blind to the seriousness of the situation. Some African states notably Kenya and Tanzania adopt wildlife policies to please donor countries from whom they receive millions of dollars. Thus government policies many of them patently disastrous and certainly detrimental to rural Africans and to wildlife are dictated from middle class homes across Europe and America. Fortunately there is a growing international lobby that is seeking solutions.

Saving Endangered Species Robert W. Shumaker, 2020-10-27

The amazing true stories of the greatest wildlife champions of our time. Wildlife conservation is at a critical juncture. While large charismatic mammals may be the first animals that come to mind, the mere 3 000 wild tigers still in existence, the giraffes declared endangered for the first time just last year, it is not only these magnificent keystone species disappearing. A full third of all studied birds, reptiles and mammals have suffered devastating population losses and a third of all insects are now endangered, including crucial pollinators that sustain worldwide food supply. Over 15 000 animal species are now considered to be threatened with extinction. There are however bright spots that provide optimism, many of them due to the efforts of a small group of scientists and activists. In *Saving Endangered Species*, Robert W. Shumaker brings together ten conservation heroes, seven of them winners of the Indianapolis Prize, three of them recipients of the Jane Alexander Global Wildlife Ambassador Award. With moving immediacy each wildlife defender offers their unique perspective on the state of wildlife conservation and the future of the natural world. Bringing to life their work in the field, each contributor also explains key concepts in wildlife conservation, reveals why they are important and discusses what kinds of work can be done to address biodiversity loss. Contributors sharing their stories in their own words include George Schaller, one of the founding fathers of wildlife conservation who conducted the field work that resulted in the establishment of the world's largest wildlife preserve, the Arctic National Wildlife Refuge; Iain Douglas Hamilton, who is widely credited with developing the metrics and methods that stemmed the tide of elephant poaching for ivory in Africa; Steven Amstrup, who discovered the disturbing truth that the sea ice polar bears rely on for traveling, hunting and raising their young was disappearing; Russell Mittermeier, who has discovered over 20 new animal species, conducted field work in more than 30 countries around the globe and authored 15 books on biodiversity; Harrison Ford, Academy Award winning actor who has been a passionate wildlife advocate and board member of Conservation International for over 25 years; Sigourney Weaver, three time Academy Award nominee whose work with the Dian Fossey Gorilla Fund has helped save thousands of gorillas in Rwanda and Congo. This unique book aims to win new recruits, inspire biologists and conservationists already in the field and illustrate the profession's fundamental scientific tenets through wildlife champions' own exciting narratives. Covering issues

from reproduction and prey predator relationships to population dynamics and community engagement *Saving Endangered Species* also addresses such thorny topics as overhunting retaliatory killing by farmers development driven habitat loss and the illegal wildlife trade By encompassing a broad spectrum of subjects this volume ultimately gives readers a first person look into what it takes to dedicate oneself to the crucial field of wildlife conservation Contributors Jane Alexander Steven C Amstrup George Archibald Michael I Crowther Iain Douglas Hamilton Harrison Ford Carl Jones Russell Mittermeier George B Schaller Robert W Shumaker Sigourney Weaver Patricia Chapple Wright *Saving Animal Species* Tom Jackson,2015-08 Describes the technology that is used to assist in the conservation of animal species including satellite imagery to identify and stop illegal logging and drones to identify and stop wildlife poaching *Save the Planet: Helping Endangered Animals* Rebecca Hirsch,2010-01-01 *Save the Planet Helping Endangered Animals* applies the NCTE IRA Standards to science and social studies content Each book sends the reader on a fact finding mission posing an initial challenge and concluding with questions and answers Through engaging interactive scenarios learners can experiment with text prediction purpose driven research and creative problem solving all critical thinking skills while learning about ways to care for our planet
