*The Making of Urban Customary Law in Medieval and Reformation England* Esther Liberman Cuenca, 2025-02-27 Drawing on a quantitative analysis of hundreds of printed and archival sources from 77 towns The Making of Urban Customary Law in Medieval England is the first cross regional investigation into the history of urban customs since Mary Bateson's seminal two volume work *Borough Customs* 1904 1906 In contrast to English common law and church law which both had long institutional and academic traditions devoted to training men in their legal philosophies customary law constituted local practices that acquired the force of law over time Urban customary law regulated political officeholding trade property holding and even moral behaviour in English towns The

Making of Urban Customary Law argues that urban customs which governed the lives of people in English towns were crucial to the development of a distinct bourgeois identity in England an evolution that this new study tracks from the early twelfth to the late sixteenth centuries In the years following the Black Death and especially during the Reformation period this law became more concerned with defining political authority maintaining morality and articulating a consensus about the common good for townspeople This book makes two principal claims First customary law advanced the business interests of an urban oligarchy These were urban male elites who drafted laws and obtained privileges to enhance their wealth and assert their political independence from local lords and often made claims about the legitimacy of their privileges or laws by rooted them in history or some kind of ancestral past These lawmakers also made considerable efforts to establish their identities as morally upright and even handed patriarchs In so doing urban customary law played a central role in the development of a distinct bourgeois identity in medieval and Reformation England Second this law lent particular meanings to the common good in towns as it helped these lawmakers articulate policies that cohered to their vision of an ideal civic community

**The Meanings of Nudity in Medieval Art** Sherry C. M. Lindquist, 2012 Addressing a strangely neglected key issue in the history of art this volume engages the variety and complexity of medieval representations of the unclothed human body The Meanings of Nudity in Medieval Art breaks ground by offering a variety of approaches to explore the meanings of both male and female nudity in European painting manuscripts and sculpture ranging from the late antique era to the fifteenth century

**Violence in Medieval Europe** Warren C. Brown, 2014-06-11 The European Middle Ages have

long attracted popular interest as an era characterised by violence whether a reflection of societal brutality and lawlessness or part of a romantic vision of chivalry Violence in Medieval Europe engages with current scholarly debate about the degree to which medieval European society was in fact shaped by such forces Drawing on a wide variety of primary sources Warren Brown examines the norms governing violence within medieval societies from the sixth to the fourteenth century over an area covering the Romance and the Germanic speaking regions of the continent as well as England Scholars have often told the story of violence and power in the Middle Ages as one in which private violence threatened and sometimes destroyed public order Yet academics are now asking to what degree violence that we might call private in contrast to the violence wielded by a central authority might have been an effective social tool Here Brown looks at how private individuals exercised violence in defence of their rights or in vengeance for wrongs within a set of clearly understood social rules and how over the course of this period kings began to claim the exclusive right to regulate the violence of their subjects as part of their duty to uphold God's order on earth Violence in Medieval Europe provides both an original take on the subject and an illuminating synthesis of recent and classic scholarship It will be invaluable to students and scholars of history medieval studies and related areas for the light it casts not just on violence but on the evolution of the medieval political order

**The Formation and Transmission of Western Legal Culture** Serge Dauchy, Georges Martyn, Anthony Musson, Heikki Pihlajamäki, Alain Wijffels, 2016-12-01 This volume surveys 150 law books of fundamental importance in the history of Western legal literature and culture The entries are organized in three sections the first dealing with the transitional period of fifteenth century editions of medieval authorities the second spanning the early modern period from the sixteenth to the eighteenth century and the third focusing on the nineteenth and twentieth centuries The contributors are scholars from all over the world Each old book is analyzed by a recognized specialist in the specific field of interest Individual entries give a short biography of the author and discuss the significance of the works in the time and setting of their publication and in their broader influence on the development of law worldwide Introductory essays explore the development of Western legal traditions especially the influence of the English common law and of Roman and canon law on legal writers and the borrowings and interaction between them The book goes beyond the study of institutions and traditions of individual countries to chart a broader perspective on the transmission of legal concepts across legal political and geographical boundaries Examining the branches of this genealogical tree of books makes clear their pervasive influence on modern legal systems including attempts at rationalizing custom or creating new hybrid systems by transplanting Western legal concepts into other jurisdictions

**Rural Space in the Middle Ages and Early Modern Age** Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of

specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic

**The Power of a Woman's Voice in Medieval and Early Modern Literatures** Albrecht Classen, 2012-02-13 The study takes the received view among scholars that women in

the Middle Ages were faced with sustained misogyny and that their voices were seldom heard in public and subjects it to a critical analysis The ten chapters deal with various aspects of the question and the voices of a variety of authors both female and male are heard The study opens with an enquiry into violence against women including in texts by male writers Hartmann von Aue Gottfried von Straßburg Wolfram von Eschenbach which indeed describe instances of violence but adopt an extremely critical stance towards them It then proceeds to show how women were able to develop an independent identity in various genres and could present themselves as authorities in the public eye Mystic texts by Hildegard of Bingen Marie de France and Margery Kempe the medieval conduct poem known as *Die Wunsbekin* the *Devout Books of Sisters* composed in convents in South West Germany but also quasi historical documents such as the memoirs of Helene Kottaner or Anna Weckerin's cookery book demonstrate that far more women were in the public gaze than had hitherto been assumed and that they possessed the self confidence to establish their positions with their intellectual and their literary achievements
