both is important reformers eager to implement innovative techniques and policies must know first how US teachers have actually taught and do teach today if they are to make suggestions that might actually effect change Cuban s research takes us into classrooms both through contemporary observations undertaken for research and a rich historical archive of classroom accounts but it also asks larger questions about teacher training and the individual motivations of people in the classroom Cuban asks do teachers freely choose how to teach or are they driven by their beliefs and values about teaching and learning What role do students play in determining how teachers teach Do teachers teach as they were taught Or have the organizations in which they have taught and do teach now the age graded school and its grammar of schooling shaped the character of teaching and learning By asking and answering these and other policy questions backed by concrete data about actual classroom practices Cuban helps us make a crucial step toward pushing more reforms aimed at altering instruction
