*School Leadership and Strategy in Managerialist Times* Scott Eacott,2012-01-01 This book is dedicated to an analysis and synthesis of research on strategy and school leadership with the ultimate goal of suggesting a new research programme Each

chapter takes up this challenge through different means resulting in an overview of the construct of strategy within the practice of school leadership. It is hoped that each of these chapters encourages students, practitioners and scholars to continue to investigate this important topic and to undertake the methodological challenges set out to advance our understanding of strategy and school leadership in managerialist times. Despite maintaining a primarily scholarly focus as such a focus is exceedingly important for the advancement of any domain of inquiry it is also recognised that many of the ideas discussed have profound practical significance for schools and those who lead and manage them. The arguments in this book, particularly those in the latter chapters, seek to expand the horizons of scholarship and understanding on the topic of strategy and school leadership. Although this should not be interpreted as a prescriptive call for how further inquiry should be undertaken, it is but one voice in the conversation. The reviews, studies, analysis and proposed research programme of this book argue that the strategies of school leaders are of considerable theoretical and practical importance to schools, the governance of schooling and the behaviour and performance of schools. While this book offers a blueprint for further inquiry, it remains for the reader to accept the challenge. Doing so will enable important new insights into strategy and school leadership.

**Developing Successful Leadership** Brent Davies, Mark Brundrett, 2010-07-20. Research has shown that school leadership is second only to classroom teaching in its effect on pupil learning. As the demands on management teams become ever more complex, this volume offers a fresh and expansive view on the challenges to be met in developing a leadership career. With contributions from some of the most accomplished commentators on school leadership and management from around the world, this book moves away from the simple how-to of becoming a principal, focusing instead on the wider issues of becoming a successful leader. The central aim has been to assemble powerful statements from international authorities that encapsulate leading edge thinking on a group of interconnected themes based on the notion of developing successful leadership in and beyond schools. In so doing, the text examines strategies for existing leaders developing their full capacity, as well as enhancing the skills of those new to or aspiring to a leadership role. The chapters, contributed by a carefully selected group of leading educationalists, present insights on a number of central themes including developing new skill sets in leadership, the ethical and moral dimensions of leading an organisation, Leadership for instructional and pedagogical success, developing leadership capacity and capability.
