Science And Culture In Europe

Rainer Eisfeld, Leslie A. Pal

Science And Culture In Europe:

Science and Culture in Europe Jean-Marc Lévy-Leblond, John Durant, Jane Gregory, 1993 *Science in School and the Future of Scientific Culture in Europe* Science in school, the future of scientific culture in Europe, 1999-05-01 Report for all Europe and separate chapters for 13 member states

Science, Culture, and Popular Belief in Renaissance Europe Stephen Pumfrey, Paolo L. Rossi, Maurice Slawinski, 1991 These essays ranging widely across the cultural and geographical terrain of Renaissance Europe have been specifically written by 12 established scholars from Italy France Britain and North America who review for general readers and advance for those beginning research the current understanding of traditional disciplines and practices and the emerging empirical and mathematical science Distributed in the US and Canada by St Martin's Annotation copyrighted by Book News Inc Portland OR

The Cultural Authority of Science Martin Bauer, Petra Pansegrau, Rajesh Shukla, 2018-09-24 The cultural authority of science is the authority that is granted to science in any particular context This authority is as much a matter of image and perceived legitimacy as of statutory guarantee However while authority can be charismatic based on tradition or based on competence we would assume that science aims to be an authority of competence To what extent does science have the last word or stand above opinion on public issues This Indo European led collaboration aims to map the cultural authority of science and to construct a system of indicators to observe this science culture based on artefacts science news analysis and espoused beliefs and evaluations public attitude data Indeed through a series of studies the authors examine the cultural authority of science in light of the challenges posed by European Asian African and American developments and debates In particular two main ideas are examined the Lighthouse model whereby science is shining into a stormy sea of ignorance and mistrust and the Bungee Jump model which demonstrates how science occasionally experiences a rough ride against a backdrop of goodwill Presenting expertise in discourse analysis computer assisted text analysis and largescale survey analysis The Cultural Authority of Science will be of interest to a global audience concerned with the standing of science in society In particular it may appeal to scholars and students of fields such as sociology of science science communication science studies scientometrics innovation studies and social psychology

Science Cultures in a Diverse World: Knowing, Sharing, Caring Bernard Schiele, Xuan Liu, Martin W. Bauer, 2021-09-13 Science and technology culture is now more than ever at the very heart of the social project and all countries to varying degrees participate in it raising scientific literacy improving the image of the sciences involving the public in debates and encouraging the young to pursue careers in the sciences Thus the very destiny of any society is now entwined with its ability to develop a genuine science and technology culture accessible for participation not only to the few who by virtue of their training or trade work in the science and technology fields but to all thereby creating occasions for society to debate and to foster a positive dialogue about the directions of change and future choices This book organized on the theme of knowing sharing caring new insights for a diverse world which was derived from the observation that

globalization rests upon diversity diversity of contexts publics research strategies and new innovating practices and aims to stimulate exchanges discussions and debates to initiate a reflection conducive to decentring and to be an opportunity for enrichment by providing the reader with means to achieve the potentialities of that diversity through a comparison of the visions that underpin the attitudes of social actors the challenges they perceive and the potential solutions they consider Thus this book aims first and foremost to raise questions in such a manner that readers so stimulated will feel compelled to contribute and will do so In this spirit however significant the results presented and shared are less important than the questions they seek to answer How are we to rethink the diffusion the propagation and the sharing of scientific thought and knowledge in an ever more complex and diverse world What to know What to share How do we do it when science is broken down across the whole spectrum of the world s diversity The book is recommended for those who are interested in science communication and science cultures in the new media era in contemporary social dynamics and in the evolution of the role of the state and of institutions It is also an excellent reference for researchers engaging in science communication public understanding of science cultural studies science and technology museum science society relationship and other fields of humanities and social sciences

Popularizing Science and Technology in the European Periphery, 1800-2000

Faidra Papanelopoulou, 2016-03-23 The vast majority of European countries have never had a Newton Pasteur or Einstein Therefore a historical analysis of their scientific culture must be more than the search for great luminaries Studies of the ways science and technology were communicated to the public in countries of the European periphery can provide a valuable insight into the mechanisms of the appropriation of scientific ideas and technological practices across the continent The contributors to this volume each take as their focus the popularization of science in countries on the margins of Europe who in the nineteenth and twentieth centuries may be perceived to have had a weak scientific culture A variety of scientific genres and forums for presenting science in the public sphere are analysed including botany and women teaching and popularizing physics and thermodynamics scientific theatres national and international exhibitions botanical and zoological gardens popular encyclopaedias popular medicine and astronomy and genetics in the press Each topic is situated firmly in its historical and geographical context with local studies of developments in Spain Portugal Italy Hungary Denmark Belgium and Sweden Popularizing Science and Technology in the European Periphery provides us with a fascinating insight into the history of science in the public sphere and will contribute to a better understanding of the circulation of scientific knowledge

The Culture of Science Martin W. Bauer, Rajesh Shukla, Nick Allum, 2012-03-15 This book offers the first comparative account of the changes and stabilities of public perceptions of science within the US France China Japan and across Europe over the past few decades The contributors address the influence of cultural factors the question of science and religion and its influence on particular developments e g stem cell research and the demarcation of science from non science as well as issues including the incommensurability versus cognitive polyphasia and the cognitive intolerance of different systems of

knowledge **Science under siege** Peter Banks, Daniel Lunney, Chris Dickman, 2012-11-01 On Saturday 29 November 2008 the Royal Zoological Society of NSW held a forum with the theme of Science under siege As the RZS is a zoological society zoology under threat became the secondary theme and the basis for selecting speakers This book records that forum with the papers developed for this book as the written word from the spoken presentations Papers that were presented as posters are included as are the edited plenary sessions which featured questions from the floor with answers and comments encouraged from anyone in the forum We were delighted that Mark Horstman from ABC Catalyst was willing to replace his peripatetic colleague Paul Willis who was nonetheless very happy to write the foreword There is a place for such skilled science communicators we need more of them and scientists at the lab bench or in the field or exploring computer models or those that have now taken a job in the policy world need to stay in touch with them Some might say that the title Science under siege seems a bit extreme but we invite you to examine the evidence as presented in this book What follows is an edited version of the introductory material that advertised the forum The title looks dramatic but if you ask yourself is anything killing the science in your area of interest you might be surprised that you come up with a point or two Then ask a wider set of questions such as are there any pressures that preclude people from doing good zoology do either political budgetary constraints impact on your field is science in the media a subject that influences the outcome of your work are there economic impediments to careers in zoology is the education mix in Australia right for this new century are the best researchers becoming full time administrators or the converse the poor researchers becoming the administrators can you place the Australian situation in an international context are there reduced opportunities for human interactions with the natural world is the virtual world killing reality and what are your predictions of the future To deal with such issues the Royal Zoological Society of NSW has structured the day to emphasize a range of themes beginning with identifying the issues including those that are persistent and those that are emerging and encompassing palpable hits to science Direct and indirect hits to science include such matters as the withdrawal of funding subversion of science death by 1000 cuts redirection of funding to fashion issues and using the name of science to justify things that are really not justifiable The name of science is being dragged down We need to confront the ever present problem of ignoring the scientifically accurate for the politically correct This raises such questions as to whether basic skills in biology are not being acquired because of public concern based on extreme animal rights propaganda Good science is not optional but what can be done if you are under siege The answers include understanding the philosophy of science the legal perspective and asking what scientists are or should be doing Audience participation will be a central part of this forum The plenary sessions will address questions raised by the speakers and the posters and debate issues and consider options for future directions It is widely known that it is hard to pull a major paper together on this theme but so many scientists know of at least one matter that they would like to draw to public attention So short contributions are included Listen to the speakers present some overarching themes or compelling

case studies contribute to the debate on the day then examine your stance on a variety of these subjects to see whether the day changes your view of this often cryptic aspect of zoology As editors we wish to acknowledge the skills of the referees all papers were refereed by two peers and the patience of the authors for what has been a long gap between the date of the forum and this publication By the end of 2008 the Royal Zoological Society of NSW along with everyone else was caught by the GFC Global Financial Crisis and we simply had to extend the length of the queue for publication We also reassessed our mode of publication The Council of the Society voted to publish this production as an ebook as well as a short print run for formal library deposit and other essential matters The ebook is open access to enhance the reach of the papers and the ideas At the same time the Royal Zoological Society of NSW signed a contract for a more international mode of access of the publications of the Society and papers are now available via Metapress <http://rzsnsw.metapress.com> Science remains under siege in our view and now we have been alerted to the range of issues it becomes easier to spot the small irritating closing of options that collectively amount to a denial of science and its relegation to an optional way of looking at the world During production of this book this matter became obvious on a number of fronts which led us to invite the paper by Rosie Cooney and colleagues to defend their science of kangaroo conservation and commercial harvesting from an attack on the science We also saw that this issue of science under siege needs more airing and the Royal Zoological Society of NSW is planning its forum for the end of 2012 to take up another strand of this theme by capitalizing on the lifelong insights of scientists under the rubric of grumpy scientists an ecological conscience of a nation This idea in fact derives directly from the suggestions in the plenary sessions by Nick Holmes and Charley Krebs We are also concerned for young scientists with science under siege manifesting often in a failure to create permanent careers for science graduates that advance science itself and zoology in particular from flourishing and identifying problems and finding solutions If we want to conserve the native fauna of Australia then Australian zoologists will have to be key team members We contend that to put science under siege and zoology under threat we not only further imperil our native wildlife but also the careers of the small band of specialists that can see the issues find the problems implement solutions and evaluate the outcomes In short science under siege is not a light matter and no one in this forum thought so Read on form an opinion and speak up and publish your thoughts your examples and your solutions

Science, Culture, and Modern State Formation Patrick Carroll, 2006-10-02 This highly original groundbreaking study explores the profound relationship between science and government to present a new understanding of modern state formation Beginning with the experimental science of Robert Boyle in seventeenth century England Patrick Carroll develops the concept of engine science to capture the centrality of engineering practices and technologies in the emerging mechanical philosophy He traces the introduction of engine science into colonial Ireland showing how that country subsequently became a laboratory for experiments in statecraft Carroll's wide ranging study spanning institutions political philosophy and policy implementation demonstrates that a number of new technological

developments from cartography statistics and natural history to geology public health and sanitary engineering reveal how modern science came to engineer land people and the built environment into a material political state in an unprecedented way creating the modern state Shedding new light on sociology the history of science and technology and on the history of British colonial projects in Ireland from the seventeenth to the nineteenth centuries his study has implications for understanding postcolonial occupations and nation building ventures today and on contemporary dilemmas such as the role of science and government in environmental sustainability This highly original groundbreaking study explores the profound relationship between science and government to present a new understanding of modern state formation Beginning with the experimental science of Robert Boyle in seventeenth century England

Science and the Second Renaissance of

Europe A. Danzin,2014-05-18 Science and the Second Renaissance of Europe focuses on the role of science in the cultural economic and social fabric of Europe This book analyzes Europe s situation in areas such as demography economics and technology and demonstrates its vulnerability where space is limited and the balance of the environment easily upset It argues that Europe lacks the primary resources essential for its development and will soon be facing serious demographic problems and proposes a suitable policy for scientific and technical research This book is divided into three sections and begins with a discussion on what the European identity can be and a reflection on its long term consequences A balance sheet showing Europe s political situation demography geographical and economic data and capacity for innovation is presented The idea forces of Western European culture are also considered The second section is a plea for European development based on the strength of European culture and the abilities of the Europeans In this framework emphasis is placed on intellectual activities activities in information dissemination and processing and cooperation with developing countries The third section outlines a plan for science and technology that could lead to a Second Renaissance in the European Community This monograph will be a valuable resource for scientists and science policymakers *Jewish Thought and Scientific Discovery in Early Modern Europe* David B. Ruderman,2001 A study on the scientific dimension of Jewish intellectual history in the early modern world

International Perspectives on Science, Culture, and Belief

Fern Elsdon-Baker,Stephen H. Jones,James Riley,2025-08-26 Public understanding of the relationship between science and religion is dominated by US and UK perspectives and research that has been carried out in Western Protestant Anglophone contexts This has enabled a culturally specific narrative of conflict to dominate public discussions of evolution science and religion obscuring the varied cultural contexts and complexities within which engagement with science takes place and the growing influence of non religious identities and diverse forms of spirituality Representing one of the most wide ranging and original contributions to the emerging body of research on the relationship between religion non religion and science in society this innovative and timely collection revisits challenges and rethinks longstanding assumptions by decentring positions and perspectives that have until recently dominated discussions of science and belief Drawing on almost a decade

of multidisciplinary research International Perspectives on Science Culture and Belief From Complexity to Globality brings together incisive global perspectives exploring the social and cultural drivers of the relationships between evolutionary science and belief Highlighting the natures and varieties of the interrelation between science and belief globally this volume addresses the relationships between science culture and belief from multiple disciplines methodologies and geographical contexts including South Asia Latin America Africa and Australia as well as Europe and North America This work has particular relevance in the increasingly polarised post pandemic world shining a light for the first time on the multifaceted interplay between social identities and cultural narratives in debates that are often about far more than the science The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Travelling Notions of Culture in Early Nineteenth-Century Europe Hannu Salmi, Asko Nivala, Jukka Sarjala, 2015-10-23 The notions of culture and civilization are at the heart of European self image This book focuses on how space and spatiality contributed to defining the concepts of culture and civilization and conversely what kind of spatial ramifications culture and civilization entailed These questions have vital importance to the understanding of this formative period of modern Europe The chapters of this volume concentrate on the following themes What were the sites of culture civilization and Bildung and how were these sites employed in defining these concepts What kind of borders did this process of definition and its inherent spatial imagination produce What were the connecting routes between the supposed centers and peripheries What were the strategies of envisioning negotiating and transforming cultural territories in early nineteenth century Europe This book adds new perspectives on ways of approaching spatiality in history by investigating for example the decisive role of the French revolution the persistent interest in classical civilization and its sites emerging urbanism and the culture of the cities the changing constellations between centers and peripheries and the colonial extensions or transfigurations of culture It also pays attention to the spatiality of culture as a metaphor but simultaneously emphasizes the production of space in an era of technological innovation and change

European Book Cultures Stephanie Kurschus, 2014-11-28 Stephanie Kurschus analyses the idea of a common European book culture that integrates the book market as an essential aspect and employs book promotion as balancing instrument Characteristics of book culture are identified the resultant concept of book culture provides an overview of the values and myths ascribed to the book Furthermore applied book promotion measures are analyzed for their effectiveness and best practice models Since in a context determined by culture and market preservation and innovation book promotion fulfills two functions it is to protect the unique national characteristics of book culture as well as to support its continuous development To adapt and to advance within a changing environment is critical to the survival of book culture in the digital reality

Complicated Complicity Martina Bitunjac, Julius H. Schoeps, 2021-06-21 Complicated Complicity is about the forms taken motives and spectrum of actions of European collaboration with the Nazis State

authorities local military organizations and individual players in different countries and areas including France Scandinavia Lithuania Poland Ukraine Romania Hungary Slovakia Greece Italy Portugal and the countries of the former Yugoslavia are discussed in the context of the history of World War II the history of occupation and everyday life and as an essential influencing factor in the Holocaust New forms of right wing populism nationalism and growing intolerance of Jewish fellow citizens and minorities have made such historically sensitive studies considerably more difficult in many countries today In this time of increasing historical revisionism in Europe such elucidating discourse is particularly relevant

Building a European Public Sphere / Un Espace Public Européen en Construction Robert Frank, 2010 The book edited by four known specialists of European history presents for the first time a discussion among European historians on the European public sphere since the 1950s It treats the general perspective and deals also in special articles with the role played by the European Union by the Council of Europe and by national media such as television and film The volume shows that the role of the European public sphere is often underestimated and that it is gradually becoming more influential and forceful not only in politics but also in culture

Sous la direction de quatre spécialistes renommés de l'histoire européenne cet ouvrage présente de façon inédite un débat entre historiens de l'Europe sur l'espace public européen et son évolution depuis les années 1950 La question est abordée dans son ensemble mais certaines contributions traitent aussi plus spécifiquement du rôle joué par l'Union européenne par le Conseil de l'Europe et par les médias nationaux comme la télévision et le cinéma Ce volume montre que l'on a souvent sous-estimé l'espace public européen alors que son influence est de plus en plus importante tant au niveau politique que culturel

The Biomedical Sciences in Society Iain Crinson, 2021-03-02 This textbook provides a comprehensive introduction to the interdisciplinary field of the Social Studies of Science and Technology SSST Over the past two decades the biomedical sciences have transformed our understanding of the relationship between the social and natural worlds while its promissory visions are seen to offer extraordinary opportunities for economic and social development But alongside these scientific innovations have emerged new and frequently unanticipated social political bioethical and legal dilemmas and challenges This cutting edge text explores post genomic developments in the field of pharmacogenomics and the prospects for a new precision or personalised medicine the potential of environmental epigenetics to reconfigure the boundaries of the social and natural worlds the emergence of an array of neuro disciplines seeking to identify the neural basis of a whole range of social and economic behaviours and the challenges of constructing a coherent and robust governance framework for the conduct of biomedical science research and innovation responsive to the social and health needs of the whole population

Astrobiology and Society in Europe Today Klara Anna Capova, Erik Persson, Tony Milligan, David Dunér, 2018-08-07 This White Paper describes the state of astrobiology in Europe today and its relation to the European society at large With contributions from authors in twenty countries and over thirty scientific institutions worldwide the document illustrates the societal implications of astrobiology and the positive contribution that astrobiology

can make to European society The White paper has two main objectives 1 It recommends the establishment of a European Astrobiology Institute EAI as an answer to a series of challenges relating to astrobiology but also European research education and the society at large 2 It also acknowledges the societal implications of astrobiology and thus the role of the social sciences and humanities in optimizing the positive contribution that astrobiology can make to the lives of the people of Europe and the challenges they face This book is recommended reading for science policy makers the interested public and the astrobiologycommunity

Digital Transformation and Cultural Policies in Europe Ole Marius Hylland,Jaka Primorac,2023-11-10 What happens when cultural policy turns digital Digital Transformation and Cultural Policies in Europe analyzes and compares different digital cultural policies of Europe Through case studies of seven European countries UK Germany Croatia Sweden Spain Norway and Switzerland as well as the analysis of EU digital cultural policy the book investigates what happens when cultural policy gets changed and challenged by digital culture Based on a thorough discussion of key concepts and analytical perspectives this collection also offers a unique multi disciplinary contribution that shows how digital cultural policy is hyperconvergent These policies contain established ideas of cultural policy such as democratization welfare access and national protectionist ideas brought together within a digital framework while also adding new cultural policy tools and instruments such as digital standards international regulations directives etc The book shows how digital cultural policies are works in progress struggling to align their aspirations with their effectiveness Overall this book provides a valuable tool for understanding the current policy framework of digital culture It will be of interest not only to scholars and students in cultural and creative industries but also to creative professionals and policy makers The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
