## Science And Mythology In The Making Of Defence Policy:

**Science and Mythology in the Making of Defence Policy** Margaret Blunden, Owen Greene, 1989 Nine contributions analyze defence decision making in theory and the effects of the state of technology and political priorities Annotation copyrighted by Book News Inc Portland OR *Government and Armed Forces in Britain, 1856-1990* Paul Smith, 2010-07-15 In a period that began with Britain controlling a world wide empire and included two world wars followed by the Cold War and massive expenditure on nuclear armaments the relationship between the politicians and the generals has been central to British history While it is correctly assumed that the Armed Forces have never threatened British political stability in modern times the relationship between the military and their political masters is a major if under emphasised theme of British history While in theory the politicians decided strategy and the military implemented it in practice decisions often depended on the personalities and experience of those involved Asquith the epitome of the civilian left major strategic decisions in the hands of the military while Churchill an ex soldier and ex First Lord of the Admiralty rode roughshod over professional military advice In a period when arms before ever more technologically sophisticated there was also the problem of how far politicians could decide on strategies proposed by the military other than by the crude yardstick of cost The essays in *Government and the Armed Forces in Britain 1856 1990* provide a coherent account not only of the major decision making of warfare but also of the changes in the organisation and control of the Armed Forces *Scientific Advisers and American Defense Policy* Kevin R. Cunningham, 1991 **The new Europe : challenges for U.S. policy** , 1991 **The Strategic Defense Initiative** Edward Reiss, 1992-07-23 This history of the Strategic Defense Initiative ranges across politics economics strategic studies and international relations and provides the latest research into the SDI interest groups the distribution of contracts and the politics of influence It discusses the wider contexts of Star Wars such as alliance management marketing and domestic politics and its military spin offs especially for anti satellite ASAT and space control programmes The author tests the theoretical literature on the dynamics of the arms race by using SDI as a case study and draws evidence from sources such as congressional hearings interviews the trade press restricted briefing papers and documents obtained under the US Freedom of Information Act The book follows the fortunes of strategic defence into the changed global conditions of the 1990s following the collapse of the Soviet bloc the Gulf War and President Bush s announcement of a refocused SDI the Global Protection Against Limited Strikes GPALS *The New Europe* Frances Scott, 1991 *Striving For Peace, Security And Development In The World: Annals Of Pugwash 1991* Joseph Rotblat, 1993-03-24 The momentous events of the past year have changed the political face of the globe the ideological struggle that dominated the world for most of this century is over erstwhile mortal enemies have become friends and partners But old attitudes have survived and modern weapons are in abundance New foci of conflict have emerged military confrontations are taking place the world is still in turmoil The welcome deep cuts in nuclear weapons have still left thousands of warheads in the arsenals and the spread of these weapons

to new states would further increase the danger of a nuclear confrontation The release of the pressure pent up under oppressive regimes created a powerful drive for independence often achieved only after bloody wars Many of the new states are economically non viable poverty and famine are frequent adjuncts of independence If military conflicts are to be avoided a comprehensive strategy must be formulated to improve the standards of living in the developing countries and enhance their security A strategy is also needed to protect the environment from the effects of further industrialization and greater use of energy What is needed is a concept of a sustainable equitable and liveable world for all its inhabitants All these problems were analysed by scientists and scholars who met at a Pugwash Conference The arguments used by them and the proposed solutions are presented in this book under six themes World Peace Nuclear Disarmament Issues Arms Control Security in the Asia Pacific Region Development Strategies and World Economic Order Energy and the Environment
