Science Of Financial Market Trading:

The Science of Financial Market Trading Don K. Mak, 2003 In this book Dr Mak views the financial market from a scientific perspective The book attempts to provide a realistic description of what the market is and how future research should be developed The market is a complex phenomenon and can be forecasted only with errors if that particular market can be forecasted at all The book reviews the scientific literatures on the financial market and describes mathematical procedures which demonstrate that some markets are non random How the markets are modeled phenomenologically and from first principle is explained It discusses indicators which are quite objective rather than price patterns which are rather subjective Similarities between indicators in market trading and operators in mathematics are noted and particularly between oscillator indicators and derivatives in Calculus It illustrates why some indicators e g Stochastics have limited usage Several new indicators are designed and tested on theoretical waveforms to check their validity and applicability The indicators have a minimal time lag which is significant for trading purposes Common market behaviors like divergences between price and momentum are explained A skipped convolution technique is introduced to allow traders to pick up market movements at an earlier time The market is treated as a nonlinear phenomenon Forecasting of when the market is going to turn is emphasized

Mathematical Techniques In Financial Market Trading Don K Mak, 2006-04-20 The present book contains much more materials than the author's previous book The Science of Financial Market Trading Spectrum analysis is again emphasized for the characterization of technical indicators employed by traders and investors New indicators are created Mathematical analysis is applied to evaluate the trading methodologies practiced by traders to execute a trade transaction In addition probability theory is employed to appraise the utility of money management techniques The book identifies the faultiness of some of the indicators used by traders and accentuates the potential of wavelets as a trading tool describes the scientific evidences that the market is non random and that the non randomness can vary with respect to time demonstrates the validity of the claim by some traders that with good money management techniques the market is still profitable even if it were random and analyzes why a popular trading tactic has a good probability of success and how it can be improved

Trading Tactics in the Financial Market Don K. Mak, 2021-07-29 Financial markets are not predictable let alone controllable The one thing traders and investors can control is their trading tactics where some can have higher probability of profitability than others This book explains by using phase analysis why some of the indicators and trading tactics would work better than others and why some indicators and trading tactics would

perform poorly Emphasis is placed on Awesome Oscillator and Accelerator Oscillator which are based on Simple Moving Average a popular tool employed by traders They are then compared to Moving Average Convergence Divergence MACD and MACD Histogram MACDH which are based on exponential moving averages By varying the parameters of MACD and MACDH one can change the phase or time delay and possibly make a larger profit This book is for practitioners and includes all MATLAB programs used in the book

Evolutionary Foundations of Economic Science Yuji Aruka, 2014-10-04 This book aims to discern and distinguish the essential features of basic economic theories and compare them with new theories that have arisen in recent years The book focuses on seminal economic ideas and theories developed mainly in the 1930s to 1950s because their emergence eventually led to new branches of economics The book describes an alternative analytical framework spreading through the interdisciplinary fields of socioeconophysics and sociodynamics The focus is on a set of branching or critical points that separate what has gone before from what has followed W Brian Arthur used the term redomaining when he referred to technological innovation In the present volume the author aims to re domain economic theories suited for a new social order Major technological innovations accompany not only changes in the economy and the market but changes in their meaning as well In particular the evolution of trading technology has changed the meaning of the invisible hand At the end of the last century the advent of socioeconophysics became a decisive factor in the emergence of a new economic science This emergence has coincided with changes in the implications of the economy and the market which consequently require a redomaining of economic science In this new enterprise the joint efforts of many scientists outside traditional economics have brought brilliant achievements such as power law distribution and network analysis among others However the more diverse the backgrounds of economic scientists the less integrated the common views among them may be resulting in a sometimes perplexing potpourri of economic terminology This book helps to mitigate those differences shedding light on current alternative economic theories and how they have evolved

Impacts Of Science And Technology On Currency Internationalization
 Peter Guangping Zhang, 2023-02-02

For decades, science and technology (sci tech) have influenced world trade, world economy, and international finance. However, their specific impacts are seldom known, and related empirical studies are rare. Thus, we must quantify and empirically explore how sci tech influences such areas as mentioned above. The purpose of this book is to explore how sci tech influences world trade, foreign exchange, and currency internationalization in various ways through first quantifying science technology. This book empirically explores how major world currencies might change their relative international positions with continuous innovation and diffusion of sci tech. Currency internationalization is measured by the percentage share of the average daily turnover of a particular currency in the global foreign exchange market over the corresponding overall daily turnover of the global foreign exchange market over the corresponding overall daily turnover of the global foreign exchange market. Sci tech as a commodity is borderless, yet its inventors and related businesses are bound by the intellectual property laws of their own countries. Patents, especially international patents, are useful representations of sci tech. They cannot be compared directly because of different criteria of patent regulators worldwide, and thus the quality of patents varies across patent regulators. Based on patent data from annual IP 5 Statistics Reports and charges for the use of IP of major currency issuers released by the WTO, this book quantifies sci tech internationalization using weighted patent families first and proceeds to study how sci tech internationalization affects currency internationalization.

Proceedings of the Unima International Conference on Social Sciences and Humanities (UNICSSH 2022)
 Recky Harold Elby Sendouw, Theodorus Pangalila, Sjamsi Pasandaran, Vivi P. Rantung, 2023-01-24

This is an open access book. The Unima International Conference on Social Sciences and Humanity UNICSSH 2022 was conducted on October 11th-13th 2022 at The Grand Kawanua International City Manado, North Sulawesi, Indonesia. In 2022, Universitas Negeri Manado will host the Indonesian National Education Convention KONASPI X. Konaspi is a routine activity of the PPTKN which is held once every four years. The fourth industrial revolution 4.0 is marked by technological advances and supported by artificial intelligence that creates opportunities and challenges for the education system. University and vocational school graduates are facing a world transformed by technology, which in turn is transforming the workplace from task-based to human-centered characteristics. Certain skills such as critical thinking, emotional intelligence, problem-solving, cognitive flexibility, and knowledge production are required. To answer this demand, the education system must put revolutionary innovation on its agenda. Scholars, researchers, and practitioners are invited to share ideas, research results, and best practices about education science and technology now and in the future at an international conference held by Universitas Negeri Manado as part of the Indonesian National Education Convention KONASPI. As part of KONASPI X activities, Universitas Negeri Manado is holding the 2022 International Conference on Education, Social Science, and Humanities (ICESSHum). The topics in this

international conference are Education Law Politics and Social Sciences Economics Public Administration and Humanities Through these themes it is expected to involve many professionals who have indirect roles in related fields To enrich this event the committee invites all national and international participants including academics researchers professionals and other relevant stakeholders to send research papers or review papers to be presented at the conference
