Science And Academic Life In Transition:

Science and Academic Life in Transition Emanuel Piore, Eli Ginzberg, 1990-01-01 This is a first hand account of the changing role of the federal government in science policy from World War II to the present day During this period the U S government formulated how it would finance university research and stimulate scientists to take leadership roles in many areas As chief scientist of the Office of Naval Research Emanuel Piore was at the center of these events His story tells us much about how the United States was able to catapult into world leadership in science in the postwar period In simple direct prose Piore describes how the U S government encouraged key groups of mostly younger scientists to organize into working groups at Cal Tech Berkeley Los Alamos Chicago Columbia Harvard and MIT during World War II These groups carried out major projects that both assured the allied victory and set the stage for postwar relations between Washington and the universities He describes his role of research at IBM as the corporation took the lead in developing the new computer industry And he has a good deal to say about how the science adviser to the president has fared under presidents from Eisenhower to Bush Piore offers trenchant observations about the strengths and weakness of national science policy among the leading countries of Western Europe Japan and the Soviet Union And he tells us how the National Academy of Sciences operates and the problems it encounters Piore s story has much to tell us about the basis for U S leadership in science as well as policy decisions that may weaken our scientific base It will be of interest to all those interested in the interaction of science and society

Family-Friendly Policies and Practices in Academe Erin K. Anderson, Catherine Richards Solomon, 2015-04-16 This volume discusses why faculty and administrators of academe should care about implementing family friendly policies and practices as well as how they can advocate for policy changes In section one the book s focus is on empirical studies that demonstrate the need for innovative programs and policies for faculty at colleges and universities These pieces explore issues such as the value of work life programs for employee retention the need for a variety of family support policies including elder care and the influence of workplace culture on the use of existing policies Section two includes case studies of the process of formulating family friendly policies and their adoption at a variety of universities The subjects of these chapters include use of the Family and Medical Leave Act the enactment of a parental leave policy the development of a unique life cycle professorship program and strategies used to implement new policies The case study chapters provide descriptions of the identification of faculty and staff needs and the process of policy development as well as advice to faculty and administrators who seek to develop similar policies at their institutions *Good Science, Bad Science, Pseudoscience, and Just Plain Bunk* Peter Daempfle, 2013 We are constantly bombarded with breaking scientific news in the media but we are almost never provided with enough information to assess the truth of these claims This book teaches readers how to think like a scientist to question claims like these more critically *Good Science, Bad Science, Pseudoscience, and Just Plain Bunk* Peter A.
