Science and Technology Advice for Congress M. Granger Morgan, Jon M. Peha, 2003-09-10 Pt 1 The issue pt 2 Background pt 3 Possible institutional models pt 4 Moving toward solution

Toward More Effective Science and Technology Advice for Congress Peter D. Blair, 2021-04-15 Toward More Effective Science and Technology Advice for Congress traces the historical roots of science and technology advice for Congress and chronicles the creation and evolution of the four organizations that provided this advice over the past half century 1 the National Research Council 2 the Congressional Research Service 3 the former Office of Technology Assessment and 4 the Government Accountability Office Key characteristics for providing effective S T advice for Congress are defined and then used to evaluate the relative strengths and weaknesses of these organizations today and to identify prospective organizational improvements in each to meet today's needs

Science and Technology Advice for Congress Jon M. Peha, 2018 When issues are rooted in science or technology Members of Congress often need assistance in framing issues identifying legislative options and assessing all the pros and cons of each option so they can make informed decisions that are consistent with their own values and priorities Today Congress has no reliable impartial source available to provide detailed analysis of this type with the possible exception of a limited pilot effort within GAO It is time for Congress to move beyond pilots and to establish a permanent technology assessment capability When creating a permanent solution the greatest challenges will be to ensure that this new technology assessment program has careful and balanced bipartisan and bicameral oversight and that its staff and funding levels will remain stable even through heated controversies and budget crises Ideally they should receive sufficient resources to offer a significant amount of support for Congress but stability is more important than size

Current Controversies in the Biological Sciences Karen F. Greif, Jon F. Merz, 2007-02-23 In recent years advances in biological science and technology have outpaced policymakers attempts to deal with them Current Controversies in the Biological Sciences examines the ways in which the federal government uses scientific information in reaching policy decisions providing case studies of the interactions between science and government on different biomedical biological and environmental issues These case studies document a broad range of complex issues in science policy from the Human Genome Project to tobacco regulation and provide an accessible overview of both the science behind the issues and the policy making process The cases illustrate the different ways in which science and politics intersect in policy decisions as well as the different forms policy itself may take including not only regulatory action but the lack of regulation Among the topics examined are public and private research funding as seen in gene patenting reluctance to regulate even when a product has been proven unhealthy as in the case of tobacco a comparison of U S and international policy responses to genetically modified organisms and the competing interests at play in air pollution policy Each chapter includes shorter side essays on related topics for example essays on issues raised by the SARS epidemic accompany the detailed case study of the public health response to the anthrax laced mail received in the weeks after 9 11 This clear and readable introduction to controversial issues in the biological sciences will be a valuable resource for students of science policy and bioethics and for professionals in industry government and nongovernmental organizations who need background on emerging issues in the biological sciences

about how experts become politicized by the policy process *The Oxford Handbook of Bioethics* Bonnie Steinbock, 2007-02-16 Bonnie Steinbock presents *The Oxford Handbook of Bioethics* an authoritative state of the art guide to current issues in bioethics Thirty four contributors reflect the interdisciplinarity that is characteristic of bioethics and its increasingly international character Thirty topics are covered in original essays written by some of the world's leading figures in the field as well as by some newer up and comers The essays address both perennial issues such as the methodology of bioethics autonomy justice death and moral status and newer issues such as biobanking stem cell research cloning pharmacogenomics and bioterrorism Other topics concern mental illness and moral agency the rule of double effect justice and the elderly the definition of death organ transplantation feminist approaches to commodification of the body life extension advance directives physician assisted death abortion genetic research population screening enhancement research ethics and the implications of public and global health for bioethics Anyone who wants to know how the central debates in bioethics have developed in recent years and where the debates are going will want to consult this book It will be an invaluable resource not only for scholars and graduate students in bioethics but also for those in philosophy medicine law theology social science public policy and public health who wish to keep abreast of developments in bioethics *Federally Funded Research: Decisions for a Decade*, 1991 *Funding Health Sciences Research* Institute of Medicine, Committee on Policies for Allocating Health Sciences Research Funds, 1990-02-01 Biomedical scientists concern about the future of funding of health science research prompted this volume's exploration of the financing of the entire health research enterprise and the complex reasons underlying these increasing concerns The committee presents clear cut recommendations for improving allocation policies to ensure a balanced distribution of resources that will allow the biomedical research community to build on exciting recent discoveries in many areas *Funding Health Sciences Research* also provides the first ever comprehensive reports on the 1980s policies that have affected the research landscape including stabilization downward negotiation and extended grant duration **Science, Technology, and Government for a Changing World** Jimmy Carter, 1993-06

Scientists' Impact on Decision-making Peng Ru, 2016-12-08 With the increasing influence of science and technology S T on socioeconomic life and public affairs there has been a growing demand for S T expertise in today's public decision making The National High Technology Research and Development Program 863 Program involving hundreds of S T experts marked the beginning of a new journey for China's high tech development This book discusses China's S T decision making mechanism with the 863 Program as the central case and scientist influence on public decision making as the focus More importantly it extracts three key elements to analyze the determinative factors behind that influence knowledge value and institutions and proposed a KIV framework of macro analysis The KIV being the first framework to generalize factors that could affect scientists influence on public decision making is of both theoretical significance and innovative value In addition by finding out those factors this book attempts to create a decision making environment conducive to scientists contribution

of their knowledge **Congressional Record** United States. Congress,1999 **Public Value and the Digital Economy** Usman Chohan,2021-07-29 How can the public manager create and co create value in the digital economy While there is much exciting work being done there is a pressing need to recontextualize public value theory PVT specifically in terms of its theoretical precepts in the fluid and dynamic environment that the digital economy has produced Much of the theoretical undergirding of PVT predates the full onset of today s digital economy leaving aside phenomena including citizen driven innovations decentralized digital structures and the algorithmic foundations of new economic life This is why a conceptually driven exercise in contemporizing PVT would be of great value to public administration s theoreticians seeking to lead the theory in catching up to the praxis This book seeks to answer the question of creating and co creating public managerial value by developing chapters that revisit categories central to the functions of public managers in relation to other value creating agents under PVT It introduces new and important lenses to PVT that are grounded in the praxis of the digital economy raising new questions about old problems in PVT and generating newer formulations that push PVT forward and make its debates salient to the futures that lay before the modern public manager The book therefore constitutes an important effort to take PVT forward by shedding new light on the potency of the public manager in confronting and constructing the digital economy through co creation with the other agents of public value It will be of interest to researchers academics and policy makers in the fields of public and nonprofit management public administration and policy and PVT
