Environmental Politics in Southern Europe K. Eder, M. Kousis, 2012-12-06 Europe is sometimes credited with a polis but not a demos Political integration and economic globalisation cannot diminish local identity and social memories This fascinating collection of national case studies shows why there will always be a local demos located in ecology economy and society But there will never be a transnational demos precisely because locality is the basis for meaningful sustainability Long may it triumph Tim O Riordan CSERGE University of East Anglia The book offers a refreshing perspective on the diversity of Europe and at the same time on the interdependence of the policies economies and societies of European countries Going beyond the dichotomies of good and bad and leaders and laggards in environmental matters the authors contribute to a different understanding of the North South divide in the process of European integration Angela Liberatore European Commission Directorate General for Research This is a self consciously revisionist volume whose findings are

theoretically significant policy relevant and timely Its insistence on bringing society back in its debunking of the notion of a Mediterranean syndrome its emphasis on developmental leapfrogging capacity of late comers to emerge as leaders in contexts of late modernity and its systematic attempt to reconceptualize the politics of Europeanization should be carefully listed to students and policy makers concerned with collective action Southern Europe European integration and environmental politics P Nikiforos Diamandouros University of Athens

The Oxford Handbook of Postwar European History Dan Stone, 2012-05-17 The postwar period is no longer current affairs but is becoming the recent past As such it is increasingly attracting the attentions of historians Whilst the Cold War has long been a mainstay of political science and contemporary history recent research approaches postwar Europe in many different ways all of which are represented in the 35 chapters of this book As well as diplomatic political institutional economic and social history the *The Oxford Handbook of Postwar European History* contains chapters which approach the past through the lenses of gender espionage art and architecture technology agriculture heritage postcolonialism memory and generational change and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy The Handbook covers all of Europe with a notable focus on Eastern Europe Including subjects as diverse as the meaning of Europe and European identity southern Europe after dictatorship the cultural meanings of the bomb the 1968 student uprisings immigration Americanization welfare leisure decolonization the Wars of Yugoslav Succession and coming to terms with the Nazi past the thirty five essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework Readers will find self contained state of the art analyses of major subjects each written by acknowledged experts as well as stimulating and novel approaches to newer topics Combining empirical rigour and adventurous conceptual analysis this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe

South Asians in Southern Europe Reena Kukreja, 2025-09-01 This book focuses on an emerging group of low income South Asian migrants who are increasingly migrating to four Southern European countries Greece Italy Spain and Portugal While homogenized under the overarching category of South Asian the migrant trajectories and migrant experiences and encounters in these host countries are quite disparate and distinct from each other The empirically rich contributions in the volume examine how national religious ethnic gender and or class differences shape differing outcomes in migration trajectories livelihood strategies inclusion in host communities family reunification and migrant subjectivity for this set of racialized migrants and their families The volume focusses on four broad themes namely Migration governance and labour regimes Migration strategies and experience transnational mobility and social mobility Identity and belonging and Family and gender relations This book fills a gap in scholarly works in the fields of migration studies diaspora studies and migrant labour and it will be of interest to students and scholars in these and related fields

Phytosfere'99 - Highlights in European Plant Biotechnology Research and Technology Transfer G.E. de

Vries,K. Metzloff,2000-11-07 Humans face the challenge of producing enough food to meet the demands imposed by economic biological and agricultural factors rising population rising income and an expectation of higher quality food and a more diverse diet decreasing amount of land available for food production lowering environmental impact of agricultural practices and preserving biodiversity Biotechnology is one of the most exciting and dynamic industries of our day It offers us the possibility of reducing our dependence on intensive farming Plant biotechnology is central to the search for effective environmentally safe and economically sound alternatives to the use of chemical pesticides and the exhaustion of natural resources Today applied plant science has four overall goals increased crop yield improved crop quality reducing production costs and reducing negative environmental impact Biotechnology is proving its value in meeting these goals It offers farmers higher yielding crops with lower costs of production and new outlets such as nutraceuticals and crop based bio factories It offers the European economy the potential of high quality knowledge based job creation and the European consumer better quality tastier and more nutritious food Though there is public concern of genetic engineering those who are close to the science understand that this is the next big frontier to be crossed The potential and opportunities offered by plant biotechnology must not be missed We must go forward on that basis rather than turning our backs on the science Phytosfere 99 provides a comprehensive overview for plant biotechnology It combines specific scientific articles review articles and comments from outside people on it which is unique in European Literature *Handbook of Doing Business in South East Europe* D. Migration, Multilingualism and Schooling in Southern Europe Sandro Caruana,Liliana Coposescu,Stefania Scaglione,2014-08-11 Migration Multilingualism and Schooling in Southern Europe edited by Sandro Caruana Liliana Coposescu and Stefania Scaglione deals with a highly current topic in Europe today namely migration in Southern European countries and its impact on children in primary schooling The volume deals with migration both through the contribution of

experts in the field and through the results of an EU funded project MERIDIUM which spanned over three years and touched on a number of topical issues The studies included in the volume mainly take place in six countries traditionally known for outbound rather than inbound migration and they examine how recent waves of migration are affecting language use linguistic attitudes and perception towards language diversity Some of the questions addressed in the various chapters of the volume are how has migration in Southern Europe altered the sociolinguistic profile of some regions How do children in schools and their parents react to the presence of different languages and to different cultures in educational institutions Do educational authorities school directors and teachers feel adequately equipped to face the challenges that these demographic changes are bringing about Is there adequate planning and are there sufficient language policies in order to provide the necessary framework which could lead to better integration of migrants in schools

Integrating and Articulating Environments: A Challenge for Northern and Southern Europe F. Adaman,F. Goksen,J. Grolin,M. O'Brien,O. Seippel,E.U. Zenginobuz,2015-03-14 A critical comparative exploration of the framing of environmental problems in Northern and Southern Europe The book addresses theoretical and empirical questions about environmental attitudes and behaviours politics and protest cultures and contexts European Collaboration in Research and Development Yannis Caloghirou,Nicholas S. Vonortas,Stavros Ioannides,2004-01-01 The contributions collected in this volume focus explicitly on cooperative R D in Europe The first part of the book offers empirical evidence on the extent scope and direction of this collaboration and explores the motives and problems of the participating firms as well as the perceived benefits they have enjoyed The second part deals with the difficult policy issues that diverse national R D regimes create for successful cooperative research and international convergence The extensive survey results of European firms allow the authors to compare collaborative research policies in various Science Policies and Twentieth-Century Dictatorships Amparo Gómez,Antonio Fco. Canales,Brian Balmer,2016-03-03 Making a fresh contribution to the political history of science this book explores the connections between the science policies of three countries that each experienced considerable political upheaval in the twentieth century Spain Italy and Argentina By focussing on these three countries the contributors are able to present case studies that highlight the characteristics and specificities of the democratic and dictatorial political processes involved in the production of science and technology The focus on dictatorship presents the opportunity to expand our knowledge beyond the more extensive literature about science in Nazi Germany and Stalinist USSR about the level of political involvement of scientists in non democratic contexts and to what extent they act as politicians in different contexts Key topics covered include the new forms of organization and institutionalization of science in the twentieth century the involvement of scientific communities in the governance of science and its institutions the role of ideology in scientific development the scientific practices adopted by scientific communities in different contexts and the characteristics of science and technology produced in these contexts *Towards a European Society?* Ronald Pohoryles,Saša Božić,2018-10-08 In the

aftermath of the Maastricht Treaty Europe saw tremendous integration but the last few years have seen a new power game between federalist and confederalist actors Although the Lisbon Treaty increased the power of the federalist inclined European Parliament the politics of the European Council are marked by a confederalist approach that re affirms the power of the individual member states As the European Council gains in strength it supports the idea that EU policies should act as a means to protect individual national interests rather than as a positive sum game to the benefit of all member states This national egoism as a political strategy is paralleled by the rise of nationalism in many member states as a result of which we are faced with an increase in social inequality due to unequal social rights and social exclusion of minorities an increase of social control disguised as security policy nostalgic cultural policies that emphasize the national cultural heritage and migration control that threatens the Schengen Agreement These developments pose a challenge for European social science scholars both theoretically and based on practical experience from their research activities International cooperation has improved theoretical and methodological knowledge in a major way and academic exchange and migration have led to innovation in science and research Since academic communities support further internationalization and Europeanization and are opposed to all types of barriers between the nation states there is a need to theoretically conceptually and empirically research the idea of a European society This book was originally published as a special issue of Innovation The European Journal of Social Science Research The Prehistoric Hunter-Gatherers of South-Eastern Europe Aitor Ruiz-Redondo,William Davies,2023-11-03 Situating the South Eastern European region at the crossroads between the Near East and the rest of Europe The Prehistoric Hunter Gatherers of South Eastern Europe provides an interdisciplinary exploration of the Balkan record of prehistoric foragers in terms of dispersal ecologies evolution and symbolism

Competitiveness and Private Sector Development Competitiveness in South East Europe 2021 A Policy

Outlook OECD,2021-07-05 The future sustainable economic development and well being of citizens in South East Europe depend on greater economic competitiveness Reinforcing the region s economic potential in a post COVID 19 context requires a holistic inclusive and growth oriented approach to policy making *E-Participation in Southern Europe and the Balkans* Euripidis Loukis,Ann Macintosh,Yannis Charalabidis,2013-09-13 The rapid development and the growing penetration of information and communication technologies ICT provide tremendous opportunities for a wide and cost effective application of the ideas of participative democracy and public participation in government decision and policy making ICT can drive dramatic transformations in the quantity and quality of communication and interaction of government organizations with citizens revitalizing and strengthening the modern representative democracy which currently faces big problems of reduced citizens trust and involvement This book deals with the application of these e participation ideas in the special and difficult and at the same time highly interesting national context of Southern Europe and the Balkans The first chapter provides an overview of e participation concepts and practices whilst the following chapters analyse pilot

applications of e participation concepts in eight different Southern European and Balkan countries Spain France Italy Slovenia Serbia Albania Greece Yugoslav Republic of Macedonia FYROM They cover both the classical e participation paradigm based on official e participation spaces created operated and controlled by government organizations as well as emerging new e participation paradigms including e participation based on web 2 0 social media and scientific level e participation based on opening government data to the scientific community This book was originally published as a special issue of the Journal of Balkan and Near Eastern Studies *Insights from Research in Science Teaching and Learning* Nicos Papadouris,Angela Hadjigeorgiou,Constantinos P. Constantinou,2015-11-02 This book includes studies that represent the state of the art in science education research and convey a sense of the variation in educational traditions around the world The papers are organized into six main sections science teaching processes conceptual understanding reasoning strategies early years science education and affective and social aspects of science teaching and learning The volume features 18 papers selected from the most outstanding papers presented during the 10th European Science Education Research Association ESERA Conference held in Nicosia Cyprus in September 2013 The theme of the conference was Science Education Research for Evidence based Teaching and Coherence in Learning The studies presented underline aspects of great relevance in contemporary science education the need to reflect on different approaches to enhance our knowledge of learning processes and the role of context designed or circumstantial formal or non formal in learning and instruction These studies are innovative in the issues they explore the methods they use or the ways in which emergent knowledge in the field is represented The book is of interest to science educators and science education researchers with a commitment to evidence informed teaching and learning **The Futures of Europe** Commission of the European Communities,1976-11-04 Originally published in 1976 this book is based on material produced by members of the Europe Plus Thirty project

Creationism in Europe Ronald L. Numbers,2014-12-15 American creationists efforts to export their beliefs have succeeded in Europe beyond their own expectations winning followers across creed and country For decades the creationist movement was primarily situated in the United States Then in the 1970s American creationists found their ideas welcomed abroad first in Australia and New Zealand then in Korea India South Africa Brazil and elsewhere including Europe where creationism plays an expanding role in public debates about science policy and school curricula In this the first comprehensive history of creationism in Europe leading historians philosophers and scientists narrate the rise of and response to scientific creationism creation science intelligent design and organized antievolutionism in countries and religions throughout Europe Providing a unique map of creationism in Europe the authors chart the surprising history of creationist activities and strategies there Over the past forty years creationism has spread swiftly among European Catholics Protestants Jews Hindus and Muslims even as anti creationists sought to smother its flames Antievolution messages gained such widespread approval in fact that in 2007 the Parliamentary Assembly of the Council of Europe passed a resolution

advising member states to defend and promote scientific knowledge and firmly oppose the teaching of creationism as a scientific discipline on an equal footing with the theory of evolution Creationism in Europe offers a discerning introduction to the cultural history of modern Europe the variety of worldviews in Europe and the interplay of science and religion in a global context It will be of interest to students and scholars in the history and philosophy of science religious studies and evolutionary theory as well as policy makers and educators concerned about the spread of creationism in our time
