Olson,2009-12-21 Why did the Greeks excel in geometry but lag begin the Mesopotamians in arithmetic How were the great pyramids of Egypt and the Han tombs in China constructed What did the complex system of canals and dykes in the Tigris and Euphrates river valley have to do with the deforestation of Lebanon s famed cedar forests This work presents a cross cultural comparison of the ways in which the ancients learned about and preserved their knowledge of the natural world and the ways in which they developed technologies that enabled them to adapt to and shape their surroundings Covering the major ancient civilizations those of Mesopotamia Egypt China Greece the Indus Valley and Meso America Olson explores how language and numbering systems influenced the social structure how seemingly beneficial construction projects affected a civilization s rise or decline how religion and magic shaped both medicine and agriculture and how trade and the resulting cultural interactions transformed the making of both everyday household items and items intended as art Along the way Olson delves into how scientific knowledge and its technological applications changed the daily lives of the ancients *The Frontiers of Ancient Science* Brooke Holmes,Klaus-Dietrich Fischer,2015-03-30 Our understanding of science mathematics and medicine today can be deeply enriched by studying the historical roots of these areas of inquiry in the ancient Near East and Mediterranean The

fields of ancient science and mathematics have in recent years witnessed remarkable growth The present volume brings together contributions from more than thirty of the most important scholars working in these fields in the United States and Europe in honor of the eminent historian of ancient science and medicine Heinrich von Staden Professor Emeritus of Classics and History of Science at the Institute of Advanced Study and William Lampson Professor Emeritus of Classics and Comparative Literature at Yale University The papers range widely from Mesopotamia to Ancient Greece and Rome from the first millennium B C to the early medieval period and from mathematics to philosophy mechanics to medicine representing both a wide diversity of national traditions and the cutting edge of the international scholarly community **Shaping the**

Sciences of the Ancient and Medieval World Agathe Keller,Karine Chemla,2024-05-14 This book contributes to a worldwide history of textual criticism and critical editions of ancient scientific texts It first looks at ancient editorial practices and at their impact on modern editions Contributions analyze how through time the perception of what a text was may have changed and influenced how scholarly texts were made accessible The second section looks at the historical political and social contexts within which editions and translations of ancient scientific texts were produced Finally the last two parts examine the specificities of editions and translations that bore on scholarly documents Not only is there a focus on how the elements specific to scientific texts such as diagrams and numbers were treated but case studies analyzing the specific work carried out to edit mathematical and astronomical texts of the past are also offered to the reader The scholarship displayed in this work lays the foundation for further studies on the history of critical editions and raises questions to those who make scholarly translations and critical editions today **Science and Technology in World History** William E.

Handbook of Cuneiform Culture Karen Radner,Eleanor Robson,2011-09-22 An authoritative guide to the Ancient Middle East as seen through the lens of cuneiform writing the writing system of ancient Mesopotamia Written by a team of international scholars with chapter bibliographies and numerous illustrations the Handbook is a state of the art guide to the discipline as well as offering pathways for future research Before Nature Francesca Rochberg,2020-08-07 In the modern West we take for granted that what we call the natural world confronts us all and always has but Before Nature explores that almost unimaginable time when there was no such conception of nature no word reference or sense for it Before the concept of nature formed over the long history of European philosophy and science our ancestors in ancient Assyria and Babylonia developed an inquiry into the world in a way that is kindred to our modern science With Before Nature Francesca Rochberg explores that Assyro Babylonian knowledge tradition and shows how it relates to the entire history of science From a modern Western perspective a world not conceived somehow within the framework of physical nature is difficult if not impossible to imagine Yet as Rochberg lays out ancient investigations of regularity and irregularity norms and anomalies clearly established an axis of knowledge between the knower and an intelligible ordered world Rochberg is the first scholar to make a case for how exactly we can understand cuneiform knowledge observation prediction and explanation in relation to science without recourse to later ideas of nature Systematically examining the whole of Mesopotamian science with a distinctive historical and methodological approach Before Nature will open up surprising new pathways for studying the history of science **A Visual History of Science and Technology** Alberto Hernández Pamplona,2016-12-15 This informative book explores some of the greatest figures and movements in science and technology beginning with the ancient Greek

philosophers including Pythagoras Democritus Aristotle and Euclid to name a few It then goes on to study later scientific figures such as Nicolaus Copernicus Galileo Galilei Johannes Kepler Isaac Newton Charles Darwin Gregor Mendel and Albert Einstein From there readers learn about the development of technoscience the fusion of technology with science which has established solid ground for computers the internet and critical projects such as the decoding of the human genome and biomedicine With captivating images this book is perfect for any young scientist **Science and Technology in World**

History James E. McClellan III, Harold Dorn, 2015-12-15 Arguably the best general history of science and technology ever published Tracing the relationship between science and technology from the dawn of civilization to the early twenty first century James E McClellan III and Harold Dorn s bestselling book argues that technology as applied science emerged relatively recently as industry and governments began funding scientific research that would lead directly to new or improved technologies McClellan and Dorn identify two great scientific traditions the useful sciences which societies patronized from time immemorial and the exploration of questions about nature itself which the ancient Greeks originated The authors examine scientific traditions that took root in China India and Central and South America as well as in a series of Near Eastern empires in late antiquity and the Middle Ages From this comparative perspective McClellan and Dorn survey the rise of the West the Scientific Revolution of the seventeenth century the Industrial Revolution and the modern marriage of science and technology They trace the development of world science and technology today while raising provocative questions about the sustainability of industrial civilization This new edition of Science and Technology in World History offers an enlarged thematic introduction and significantly extends its treatment of industrial civilization and the technological supersystem built on the modern electrical grid The Internet and social media receive increased attention Facts and figures have been thoroughly updated and the work includes a comprehensive Guide to Resources incorporating the major published literature along with a vetted list of websites and Internet resources for students and lay readers

Women in the History of Science Hannah Wills, Sadie Harrison, Erika Lynn Jones, Farrah Lawrence-Mackey, Rebecca Martin, 2023-03-06 Women in the History of Science brings together primary sources that highlight women s involvement in scientific knowledge production around the world Drawing on texts images and objects each primary source is accompanied by an explanatory text questions to prompt discussion and a bibliography to aid further research Arranged by time period covering 1200 BCE to the twenty first century and across 12 inclusive and far reaching themes this book is an invaluable companion to students and lecturers alike in exploring women s history in the fields of science technology mathematics medicine and culture While women are too often excluded from traditional narratives of the history of science this book centres on the voices and experiences of women across a range of domains of knowledge By questioning our understanding of what science is where it happens and who produces scientific knowledge this book is an aid to liberating the curriculum within schools and universities

Publisher description **Poetic Astronomy in the Ancient Near East** Jeffrey L. Cooley, 2013-03-19 Modern science historians have typically treated the sciences of the ancient Near East as separate from historical and cultural considerations At the same time biblical scholars dominated by theological concerns have historically understood the Israelite god as separate from the natural world Cooley s study bringing to bear contemporary models of science history on the one hand and biblical studies on the other hand seeks to bridge a gap created by 20th century scholarship in our understanding of ancient Near Eastern cultures by investigating the ways in which ancient authors incorporated their cultures celestial speculation in narrative In the literature of ancient Iraq celestial divination is displayed quite prominently in important works such as Enuma Eli and Erra and I um In ancient Ugarit as well the sky was observed for devotional reasons and astral deities play important roles in stories such as the Baal Cycle and Shahr and Shalim Even though the veneration of astral deities was rejected by biblical authors in the literature of ancient Israel the Sun Moon and stars are often depicted as active conscious agents In texts such as Genesis 1 Joshua 10 Judges 5 and Job 38 these celestial characters these sons of God are living dynamic members of Yahweh s royal entourage willfully performing courtly martial and calendrical roles for their sovereign The synthesis offered by this book the first of its kind since the demise of the pan Babylonianist school more than a century ago is about ancient science in ancient Near Eastern literature
