mainline and non denominational churches and within existing pentecostals and places these in relation to lively scholarly themes such as secularisation authenticity and cosmopolitanism It offers an unrivalled analysis of charismatic music books television conferences personalities community living and controversies in the 1960s and 1970s It looks forward to the many global legacies of charismatic renewal for example in relation to the politics of sexuality in the Anglican Communion or to support for President Donald J Trump The essential question at the heart of this book is relevant for scholars and practitioners of Christianity alike how did charismatic renewal transform the churches in the twentieth century moving from the periphery to the mainstream

Bucur,2018-04-05 This innovative text explores the unprecedented changes in the realms of politics demography economics culture knowledge and kinship that women have brought about in the twentieth and twenty first centuries Global in reach the book provides a comparative analysis of developments worldwide to show both progress as well as new tensions and forms of inequality that have emerged out of women's entry into politics wage employment education and the production of culture

Beginning with suffrage and moving to participation in international movements such as anti war labor and environmental rights activism Maria Bucur explores how women have transformed the operation of states and international institutions She focuses on the radical demographic shifts since 1900 through the prism of changing practices in women's sexuality from birth control practices to education Examining the continuing economic gender gap around the world Bucur highlights ways women have been both beneficiaries of new economic opportunities and participants in developing new forms of inequality Considering the remarkable achievements of women in the areas of knowledge making and cultural production the author shifts her gaze toward the future and what these changes mean in terms of gender norms and evolving kinship relations She thus presents a new perspective on contemporary world history centered on how women have become both the subjects and objects of seismic shifts in the political social and economic structures of societies across the globe Chinese

Macrosecuritization Juha A. Vuori,2023-11-10 This book provides a holistic picture of Chinese global security discourses with

a focus on macrosecuritizations The work examines how the People's Republic of China PRC has aligned itself within global security discourses This is approached through the theory of securitization specifically by using the notion of macrosecuritization as the lens for its analysis The book offers the first full account of Chinese macrosecuritization discourses and alignments and it aims to discern what security speech with referent objects such as humanity civilization or nature has done in the domestic and international politics of China Specifically the work focuses on the discourses of the Cold War anti nuclear weapons climate change and the Global War on Terror which have all been postulated in the literature as macrosecuritizations In addition it examines discourses with global referent objects that have been put forth by the PRC so that we can see whether its proposals for global security governance take the form of or are legitimated through macrosecuritization The overall argument in the book is that the way contemporary China uses macrosecuritization discourses provides for ontological security as its position in relation to other major powers is undergoing transformation by allowing it to maintain a consistent narrative of its international self that abides by its own set of moral values and sense of worth This book will be of interest to students of critical security studies Chinese politics and International Relations The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution NonCommercial ShareAlike CC BY NC SA 4.0 International *Anatomy of a Robot* Despina

Kakoudaki, 2014-07-07 Why do we find artificial people fascinating Drawing from a rich fictional and cinematic tradition *Anatomy of a Robot* explores the political and textual implications of our perennial projections of humanity onto figures such as robots androids cyborgs and automata In an engaging sophisticated and accessible presentation Despina Kakoudaki argues that in their narrative and cultural deployment artificial people demarcate what it means to be human They perform this function by offering us a non human version of ourselves as a site of investigation Artificial people teach us that being human being a person or a self is a constant process and often a matter of legal philosophical and political struggle By analyzing a wide range of literary texts and films including episodes from *Twilight Zone* the fiction of Philip K Dick Kazuo Ishiguro's novel *Never Let Me Go* *Metropolis* *The Golem* *Frankenstein* *The Terminator* *Iron Man* *Blade Runner* and *I Robot* and going back to alchemy and to Aristotle's *Physics* and *De Anima* she tracks four foundational narrative elements in this centuries old discourse the fantasy of the artificial birth the fantasy of the mechanical body the tendency to represent artificial people as slaves and the interpretation of artificiality as an existential trope What unifies these investigations is the return of all four elements to the question of what constitutes the human This focused approach to the topic of the artificial constructed or mechanical person allows us to reconsider the creation of artificial life By focusing on their historical provenance and textual versatility Kakoudaki elucidates artificial people's main cultural function which is the political and existential negotiation of what it means to be a person
