Science Scientists And Society:

Science, Scientists, and Society, 1962 **Science, scientists, and society** Philip Handler, 1969 *The Scientist's Role in Society* Joseph Ben-David, 1971 *Science, Faith and Society* Michael Polanyi, 1964-08-15 In its concern with science as an essentially human enterprise *Science Faith and Society* makes an original and challenging contribution to the philosophy of science On its appearance in 1946 the book quickly became the focus of controversy Polanyi aims to show that science must be understood as a community of inquirers held together by a common faith science he argues is not the use of scientific method but rather consists in a discipline imposed by scientists on themselves in the interests of discovering an objective impersonal truth That such truth exists and can be found is part of the scientists faith Polanyi maintains that both authoritarianism and scepticism attacking this faith are attacking science itself **The Many Faces Of Science** Leslie Stevenson, Henry Byerly, 1995-04-12 The development of modern science and its increasing impact on our life and culture is one of the great stories of our time Coming to understand that story and coming to terms with the institution of modern science should be an important part of the education of every student In *The Many Faces of Science* Leslie Stevenson and Henry Byerly masterfully and painlessly provide the basic information and the philosophical reflection students need to gain such understanding Making good use of case study methods the authors introduce us to dozens of figures from the history of science highlighting both heroes and villains Providing an elementary sketch of the development of science through the lives of its practitioners Stevenson and Byerly bring the story alive through the examination of the often mixed motives of scientists as well as the conflicting values people bring to science and to their perceptions of its impact on society They also explore the relationship between scientific practice and political and economic power Brief accessible and rich in anecdotes personal asides and keen insight *The Many Faces of Science* is the ideal interdisciplinary introduction for nonscientists in courses on science studies science and society and science and human values It will also prove useful as supplementary reading in courses on science in philosophy sociology and political science **Science in Action** Bruno Latour, 2003 *Scientist Speaks Out, A: A Personal Perspective On Science, Society And Change* Glenn T Seaborg, 1996-07-29 In *A Scientist Speaks Out A Personal Perspective on Science Society and Change* Nobel Laureate Chemistry 1951 Glenn T Seaborg shares some of his thoughts and reflections on his broad interests from the formulation of national science policy to the promise of youth During a distinguished career in science and public service that spanned more than 50 years he published over 500 works and maintained a public speaking schedule that included about 700 speeches on a wide variety of topics This volume is a collection of nearly forty of his more popular speeches and articles directed at a mostly non scientific and non technical audience Since this volume is a compendium of reprints readers will be able to share some of Seaborg's thoughts as he originally penned them *Science, Culture and Society* Mark Erickson, 2005-09-23 In this easily accessible text Mark Erickson explains what science is and how it is carried out the nature of the relationship between science and
