Sir John Barrow

Science Ship A Voyage Aboard The Discoverer:

Science Ship Peter Briggs, 1969 Describes the research facilities and methods aboard the oceanographic research vessel Discoverer operated by the United States Coast and Geodetic Survey **Voyages of Discovery and Research Within the Arctic Regions** Sir John Barrow, 1855 *Voyages of Discovery and Research Within the Arctic Regions, from the Year 1818 to the Present Time* John Barrow, 2011-05-11 This 1846 description of Arctic exploration vividly reports experiences of polar bears and icebergs frostbite and scurvy hardship and heroism **Voyages of Discovery and Research Within the Arctic Regions, from the Year 1818 to the Present Time** Sir John Barrow, 1846 Voyages of Discovery and Research Within the Arctic Regions from the Year 1818 to the Present Time Etc John III Barrow, 1846 *Oceanic Abstracts with Indexes*, 1972 Marine Science Christina Reed, 2009 Chronicles the history of marine science from 1901 documenting the significant discoveries of the 20th century by notable marine and other scientists Antarctica N. Bonner, David Walton, 2013-10-22 Antarctica a vast land remote from the other continents and still the least known of them all provides a unique international laboratory for science Despite the costs a growing number of countries are supporting basic scientific research on the continent and in its surrounding seas Our knowledge of life in this extreme environment although limited suggests that it is a key environment for many areas of science Potential economic developments for food and minerals as well as increasing political complications might jeopardise the present scientific accord in the future Now is the time to take stock what do we know about Antarctic ecology What are the threats and how can they be met In this volume Antarctic scientists from six countries write about the Antarctic ecosystem **Observations on a work, entitled "Voyages of Discovery and Research within the Arctic regions," by Sir J. Barrow: being a refutation of the numerous misrepresentations contained in that volume** Sir John Ross, 1846 Rescue by Discovery Beatrice Cowan, 2025-03-06 In late November 1935 the American explorer Lincoln Ellsworth left Dundee Island at the north of the Antarctic Peninsula With his pilot Hubert Hollick Kenyon his intention was to cross the Antarctic and reach the abandoned American base at Little America Soon the Americans lost contact with the rest of the world and when no word came from them the Commonwealth Government of Australia called on the government of the United Kingdom to send a ship to effect a rescue Britain's response was considered a last flourish of empire as much political as humanitarian This book now describes often for the first time the plans and counter plans the conflicts and the challenges which lay behind the remarkable way in which the research ship RRS Discovery II a ship outwardly unsuited to the task interrupted a carefully planned programme of scientific research to find the Americans and aided by outstanding airmen from the RAAF bring them back to the waiting world **A Voyage of Discovery and Research in the Southern and Antarctic Regions** James Clark Ross, 2020-12-08 In A Voyage of Discovery and Research in the Southern and Antarctic Regions James Clark Ross presents a meticulous account of his early 19th century expedition to the polar regions characterized by its scientific rigor and vivid narrative style Rich in observational

detail the book delves into the geography fauna and climate of the Antarctic blending personal anecdotes with rigorous scientific data Ross s writings not only reflect his navigational challenges but also the thrill of encountering previously uncharted territories situating the work within the broader context of maritime exploration during the Age of Enlightenment His eloquent prose encapsulates the spirit of discovery making the text both informative and engaging as he shares the wonders and perils of his journey with precision and clarity James Clark Ross a prominent British naval officer and explorer drew upon his extensive maritime experience including his earlier voyages with Sir John Franklin His deep seated fascination with the Arctic and Antarctic regions combined with a mission to conduct scientific research signifies his commitment to enhancing geographical knowledge The challenges he faced on his voyage such as treacherous ice conditions and health crises among crew members imbue the narrative with a sense of urgency and highlight his leadership abilities This remarkable work is highly recommended for readers interested in exploration polar science and the historical context of 19th century expeditions Ross s firsthand observations and intricate illustrations offer a window into a world that was once largely unknown making this book not only a cornerstone of exploration literature but also a significant contribution to our understanding of the Antarctic sciences In this enriched edition we have carefully created added value for your reading experience A succinct Introduction situates the work s timeless appeal and themes The Synopsis outlines the central plot highlighting key developments without spoiling critical twists A detailed Historical Context immerses you in the era s events and influences that shaped the writing An Author Biography reveals milestones in the author s life illuminating the personal insights behind the text A thorough Analysis dissects symbols motifs and character arcs to unearth underlying meanings Reflection questions prompt you to engage personally with the work s messages connecting them to modern life Hand picked Memorable Quotes shine a spotlight on moments of literary brilliance Interactive footnotes clarify unusual references historical allusions and archaic phrases for an effortless more informed read

ESSA News United States. Environmental Science Services Administration,1968 **The Publishers' Trade List Annual** ,1977 **Discovery** , Oceanic Citation Journal with Abstracts ,1971 A Frozen Field of Dreams, Science, Strategy, and the Antarctic in Norway, Sweden, and the British Empire, 1912-1952 Peder William Chellew Roberts,2010 The dissertation examines how actors in Norway Sweden and the British Empire conceived the Antarctic as a space for science during the years 1912 to 1952 Instead of tracing a narrative of enlightenment how science became the dominant form of activity in the Antarctic I examine a series of episodes with particular attention to why particular kinds of science held sway within specific political cultural and economic contexts Concerned more with how Antarctic science was planned and justified than how it was executed in the field the project draws upon recent scholarship in geography and geopolitics as well as the history of exploration The six case studies involve an aborted Anglo Swedish Antarctic expedition in 1912 Britain s interwar Antarctic whaling research program debates among whaling magnates and their associates over the relationship between Antarctic science and whaling in interwar Norway the

culture of polar exploration that emerged at Cambridge and to some extent Oxford between the world wars the approach to polar exploration and quantitative glaciology pioneered by the Swedish geographer Hans Ahlmann and the complicated history of the Norwegian British Swedish Antarctic Expedition 1949 52 I conclude with an epilogue arguing that the rise of international science in the Antarctic during the 1950s reflected the geopolitical dynamics of the Cold War rather than the triumph of science over politics **Contemporary Authors** ,1978 The National union catalog, 1968-1972 ,1973

National Union Catalog ,1968 Discovery David Tallach,2017-03-14 The year is 1903 The pioneering expedition led by Commander Robert Falcon Scott captaining the Discovery to the South Pole is already well documented For the first time this narrative also reveals that for two men aboard the ship Dr Edward Wilson and Louis Bernacchi it becomes a voyage of self discovery in their encounters with aliens and possible futures
