Seminar The Story Of The American Press Institute:

Seminar Don E. Carter, Malcolm F. Mallette, 1992 This book is more than a bare bones recital of how API came into being just after World War II It is also the story of certain talented and dedicated individuals and should be of interest to anyone who has ever read a newspaper and wondered about the people who produce them **The Postwar Decline of American Newspapers, 1945-1965** David R. Davies, 2006-07-30 On the surface the American newspaper industry appears to have changed little from 1945 to 1965 remaining both healthy and prosperous The number of newspapers in 1965 was about the same as in 1945 while during the twenty year period advertising revenues increased substantially despite new competition from television Just as in 1945 the vast majority of newspapers went to press with improved but old fashioned letterpress methods in 1965 And newspaper reporters still professed a strong if now somewhat shaken faith in the federal government at the end of the twenty years But the surface appearance of both stability and profitability obscured profound change In the two decades after World War II the business of newspaper publishing changed significantly in myriad ways By 1965 editors and publishers had recognized the extent of these changes and were beginning to adjust Each of the changes was significant of its own accord and the range of challenges throughout the period combined to transform newspapers and the nation they served by 1965 This transformation was evident to varying degrees in newspapers content their production methods their economic position within the overall media marketplace and their relationship with government Newspapers some more than others made strides to keep up with and overcome some of these challenges But in each of these areas newspapers as a group were slow to respond to the problems facing journalism *Pulitzer's School* James R. Boylan, 2003 The debate over the school's merits and shortcomings has been strong and at times vehement even into the twenty first century In 2002 the old argument was reopened and the school found itself publicly scrutinized once again Had it lived up to Pulitzer's original vision of a practical uncompromising and multifaceted education for journalists Was its education still relevant to the needs of contemporary journalists Vivian Castleberry Kimberly Wilmot Voss, 2023-03-06 Considered by some as the most important woman in Dallas in the latter half of the 20th century Vivian Castleberry was a force for women nationally and internationally In shining a light on her career more becomes known about her fights and her victories Through this book historians can better understand that the relationship of the women's pages to the women's movement between the 1950s and 70s was more complex than previously explored Known as the godmother of the Dallas women's movement Vivian was a trailblazer Yet she was also a mother of five daughters at a time when working outside the home was still being challenged and that was an experience many middle class women struggled with Her role in the public sphere meant she often told the stories of others This book is her story **Patronizing the Public** William J. Buxton, 2009-08-16 Patronizing the Public American Philanthropy's Transformation of Culture Communication and the Humanities is the first detailed and comprehensive examination of how American philanthropic foundations have shaped numerous fields including dance drama

education film film music folklore journalism local history museums radio television as well as the performing arts and the humanities in general Drawing on an impressive range of archival and secondary sources the chapters in the volume give particular attention to the period from the late 1920s to the late 1970s a crucial time for the development of philanthropic practice To this end it examines how patterns and directions of funding have been based on complex negotiations involving philanthropic family members elite networks foundation trustees and officers cultural workers academics state officials corporate interests and the general public By addressing both the contours of philanthropic power as well as the processes through which that power has been enacted it is hoped that this collection will reinforce and amplify the critical study of philanthropy s history

Cop Cop Mac Muir,Greg Finch,2025-04-29 In the vein of *Evicted* and *Locking Up Our Own* comes a seminal work that delves deep behind the Thin Blue Line of policing and police misconduct to demonstrate what really goes on when you try to hold the police accountable How often do you think about the police Who do you think of Columbo Chief Wiggum Derek Chauvin Do you think of just one officer or do you think of the police as an institution From movies and television to everyday life a police presence looms over most conflict Today we know this to be most true for Black Americans for whom the suspense of policing is constant And too often the argument over dinner devolves into a 9 1 1 call blue and red lights and possibly a door rammed open Some of us are watched by the police and others are chased But if there was a defining feature of the 2020 protests over the murder of George Floyd it was the collective confusion about how we got to this point Policing it seemed had become as ahistorical as it was brutal Despite fragmented coverage about police unions militarization and systemic racism America remained hazy on the details of what cops had been doing all along There is a Blue Wall and ways to get behind it The authors of this book Anon 1 and Anon 2 are senior investigators of a government agency tasked with policing the police in New York City They re our eyes on the inside and this book will take us into their world COP COP follows the web of real cases that the authors investigated over several years inside the Civilian Complaint Review Board As they investigate everything from offensive language and chokeholds to

shootings the larger investigation builds into their argument for six simple solutions to fix American policing Readers will come away with a new vantage point as well as the tools of an investigator By combining their unique perspectives as police misconduct investigators with a synthesized history of policing this book offers newfound insights into what policing really looks like what the problems are and what practical steps are necessary to create a criminal justice system that is truly just

academic settings in international organizations like UNESCO and among commercial and civic groups. It moves beyond the traditional canon to cover work by forgotten figures including women scholars in the field and those outside of the United States and Europe and it situates them all within the broader geopolitical institutional and intellectual landscapes that have shaped communication study globally. Intended for scholars and graduate students in communication media studies and journalism, this volume pushes the history of communication study in new directions by taking an aggressively international and comparative perspective on the historiography of the field. Methodologically and conceptually, the volume breaks new ground in bringing comparative transnational and global frames to bear and puts under the spotlight what has heretofore only lingered in the penumbra of the history of communication study.
