Semiotics and Dis/ability Linda J. Rogers, Beth Blue Swadener, 2001-03-29 Examines the ways that the labels disability and difference are socially and culturally constructed *Semiotics and Dis/ability* Linda J. Rogers, Beth Blue Swadener, 2001-03-22 This book brings together a unique collection of personal narratives and summaries of studies that problematize existing meanings of disability and difference Using applied semiotics as an analytical lens the contributors examine the ways that these labels are socially and culturally constructed Contributors include anthropologists teacher educators special educators disability studies scholars educational psychologists American Sign Language instructors semioticians school psychologists linguists and parents Each author was asked to examine his or her experience s and consider the markers of lives that are considered different **Disability Studies and the Inclusive Classroom** Susan Baglieri, Arthur Shapiro, 2012 This work s mission is to integrate the fields of disability studies and inclusive education It focuses on the broad foundational topics that comprise disability studies culture language history etc and moves into the more practical topics normally associated with inclusive education **Perspectives on Disability and Rehabilitation** Karen Whalley Hammell, 2006-02-22 The eBook version of this title gives you access to the complete book content electronically Evolve eBooks allows you to quickly search the entire book make notes add highlights and study more efficiently Buying other Evolve eBooks titles makes your learning experience even better all of the eBooks will work together on your electronic bookshelf so that you can search across your entire library of Occupational Therapy eBooks Please note that this version is the eBook only and does not include the printed textbook Alternatively you can buy the Text and Evolve eBooks Package which gives you the printed book plus the eBook Please scroll down to our Related Titles section to find this title The book provides an accessible introduction to many of the current theoretical perspectives on disability enabling readers to challenge the taken for granted nature of traditional knowledge and assumptions within the rehabilitation health and community care industries and encouraging a more critical approach both to the nature of rehabilitation following injury or illness and to the problem of physical difference and disability Through its interrogation and exploration of new theoretical perspectives on disability and rehabilitation this book provides a unique text for students and practitioners of nursing occupational therapy physiotherapy and social work and for educators and researchers in these fields Although rehabilitation practitioners claim to aspire to client centred practice and advocate participatory modes of research rehabilitation theory remains curiously estranged both from theoretical perspectives developed by disabled disability theorists and from critical perspectives on disability that are emerging from other academic disciplines Thus immune from alternate views rehabilitation practitioners fail to question the premise that their professional assumptions are correct or right Contemporary theorists raise important questions for example about professional power concepts of normality independence and the physical body issues central to rehabilitation as well as to the role of the cultural environment in producing prejudice the role

of the social environment in creating disadvantage and to issues of power and privilege and of the systemic oppression of disabled people This book provides an introduction to the expanding body of critical work on disability by theorists from a range of perspectives illustrating ways in which their theories and insights contest or support assumptions within rehabilitation theory The book argues for a cross fertilisation of ideas and challenges hierarchies of power in which nurses and therapists privilege their own assumptions perspectives and knowledge while overlooking or ignoring the perspectives both of disabled people and of other theorists Provides an accessible introduction to current theoretical perspectives on disability Demonstrates how these theoretical perspectives can inform a practitioner s approach to rehabilitation Relevant for all the rehabilitation and health care professions **Anthropologists in the Field** Lynne Hume,Jane Mulcock,2004-12-14

All too often anthropologists and other social scientists go into the field with unrealistic expectations Different cultural milieus are prime ground for misunderstandings misinterpretations and interrelational problems This book is an excellent introduction to real world ethnography using familiar and not so familiar cultures as cases The book covers participant observation and ethnographic interviewing both short and long term These methodologies are open to problems such as lack of communication depression hostility danger and moral and ethical dilemmas problems that are usually sanitized for publication and ignored in the curriculum Among the intriguing topics covered are sexualized and violent environments secrecy and disclosure multiple roles and allegiances insider outsider issues and negotiating friendship and objectivity

Encyclopedia of Medical Anthropology Carol R. Ember,Melvin Ember,2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world s cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world Sexual Citizenship and Disability Julia Bahner,2019-12-05 What does sexual citizenship mean in practice for people with mobility impairments who may need professional support to engage in sexual activity The book explores this subject through empirical investigation based on case studies conducted in four countries Sweden England Australia and the Netherlands and develops the abstract notion of sexual citizenship to make it practically relevant to disabled people professionals in disability services and policy makers Through a cross national approach it demonstrates the variability of how sexual rights are understood and their culturally specific nature It also shows how the personal is indeed political states different policy approaches change the outcomes for disabled people in terms of support to explore and express their sexualities By proposing a model of sexual

facilitation that can be used in policy development to better cater to disabled service users needs as well as furthering the theoretical understanding of sexual rights and sexual citizenship this book will be of interest to professionals in disability services and policy makers as well as academics and students working in the following subject areas Disability Studies Sociology Social Policy Sexuality Studies Sexology Social Work Nursing Occupational Therapy and Public Health

Recapturing the Personal Irving Epstein, 2006-12-01 In this volume contributors discuss both the theoretical and practical applications of an embodied knowledge perspective using the field of education as an exemplar It should be noted that while the theorists whose writings are discussed in these pages have made seminal contributions to the sociology of the body literature it is not possible nor is it our goal to comprehensively review the theoretical discourse of everyone who has written in the area Our more modest aim is to give our audience a sampling of what some of the important theoretical positions entail To that end we turn to the writings of the three social and cultural theorists whose work is given the greatest degree of attention in the volume Foucault Bourdieu and Butler and will briefly summarize their views *"The Poor, the Crippled, the Blind, and the Lame"* Louise A.

Gosbell, 2018-08-03 The New Testament gospels feature numerous social exchanges between Jesus and people with various physical and sensory disabilities Despite this traditional biblical scholarship has not seen these people as agents in their own right but existing only to highlight the actions of Jesus as a miracle worker In this study Louise A Gosbell uses disability as a lens through which to explore a number of these passages anew Using the cultural model of disability as the theoretical basis she explores the way that the gospel writers as with other writers of the ancient world used the language of disability as a means of understanding organising and interpreting the experiences of humanity Her investigation highlights the ways in which the gospel writers reinforce and reflect as well as subvert culturally driven constructions of disability in the ancient world **JCT.** ,1991* **The Hermeneutical Spirit** Amos Yong, 2017-11-06 In the contemporary biblical studies climate

proposals regarding the theological interpretation of Scripture are contested particularly but not only because they privilege encourage and foster ecclesial or other forms of normative commitments as part and parcel of the hermeneutical horizon through which scriptural texts are read and understood Within this context confessional approaches have been emerging including some from within the nascent pentecostal theological tradition This volume builds on the author s previous work in theological method to suggest a pentecostal perspective on theological interpretation that is rooted in the conviction that all Christian reading of sacred Scripture is post Pentecost meaning after the Day of Pentecost outpouring of the Spirit on all flesh in anticipation of the coming reign of God In that respect such a pentecostal interpretative perspective is not parochially for those within the modern day movement bearing that name but is arguably apostolic in following after the scriptural imagination of the earliest disciples of Jesus the messiah and therefore has ecumenical and missional purchase across space and time The Hermeneutical Spirit thus provides close readings of various texts across the scriptural canon as a model for Christian theological interpretation of Scripture suitable for the twenty first century global context

Education David Bolt, 2018-07-06 Over the last few decades disability studies has emerged not only as a discipline in itself but also as a catalyst for cultural disability studies and Disability Studies in Education In this book the three areas become united in a new field that recognises education as a discourse between tutors and students who explore representations of disability on the levels of everything from academic disciplines and knowledge to language and theory from received understandings and social attitudes to narrative and characterisation Moving from late nineteenth to early twenty first century representations this book combines disability studies with aesthetics film studies Holocaust studies gender studies happiness studies popular music studies humour studies and media studies In so doing it encourages discussion around representations of disability in drama novels films autobiography short stories music videos sitcoms and advertising campaigns Discussions are underpinned by the tripartite model of disability and so disrupt one dimensional representations Cultural Disability Studies in Education encourages educators and students to engage with disability as an isolating hurtful and joyful experience that merits multiple levels of representation and offers true potential for a non normative social aesthetic It will be required reading for all scholars and students of disability studies cultural disability studies Disability Studies in Education sociology and cultural studies **Cultural Stations of Disability** David Bolt, 2025-11-25 In the

disability community which can have multiple meanings in itself we often experience poignant moments in sociocultural discourse Our pathways to knowledge and understanding of identity are defined by life's landmarks many of which resonate with what thereby become formative figures or artefacts This mapping of key moments involves recognising and reflecting upon cultural stations of disability More than being demarcations of disruption to the normative social order cultural stations of disability sometimes pertain to its very epitome They hold something of a moment in discourse with which identification is paramount but variously emotive They may capture feelings of liberation to which we joyfully return difficult memories that we revisit to ponder or the nadir of modernity from which we can only hope to learn In this edited volume an international gathering of contributors finds and defines dozens of cultural stations of disability in music art film television programs literature sitcom activism sport performance organisations places and events Cultural Stations of Disability A Moment in Discourse will be of interest to interdisciplinary readers in disability studies humour studies media studies film studies
