**On The Move to Meaningful Internet Systems 2003: OTM 2003 Workshops** Zahir Tari, 2003-10-25 missions in fact also treat an envisaged mutual impact among them As for the 2002 edition in Irvine the organizers wanted to stimulate this cross pollination with a program of shared famous keynote speakers this year we got Sycara ble Soley and Mylopoulos and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice We received an even larger number of submissions than last year for the three conferences 360 in total and the workshops 170 in total Not only can we therefore again claim a measurable success in attracting a representative volume of scientific papers but such a harvest allowed the program committees of course to compose a high quality cross section of worldwide research in the areas covered In spite of the increased number of submissions the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 i e around 1 paper out of every 4 5 submitted For the workshops the acceptance rate was about 1 in 2 Also for this reason we decided to separate the proceedings into two volumes with their own titles and we are grateful to Springer Verlag for their collaboration in producing these two books The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees

**Difference Sets, Sequences and their Correlation Properties** A. Pott, P. Vijay Kumar, Tor Helleseth, Dieter Jungnickel, 2012-12-06 The explanation of the formal duality of Kerdock and Preparata codes is one of the outstanding results in the field of applied algebra in the last few years This result is related to the discovery of large sets of quadriphase sequences over  $\mathbb{Z}_4$  whose correlation properties are better than those of the best binary sequences Moreover the correlation properties of sequences are closely related to difference properties of certain sets in cyclic groups It is the purpose of this book to illustrate the connection between these three topics Most articles grew out of lectures given at the NATO Advanced Study Institute on Difference sets sequences and their correlation properties This workshop took place in Bad Windsheim Germany in August 1998 The editors thank the NATO Scientific Affairs Division for the generous support of this workshop Without this support the present collection of articles would not have been realized
