Cheryl Arnold, Ralph Fisch, 2011-10-16 *The Impact of Complex Trauma on Development* describes what happens cognitively and emotionally behaviorally and relationally to people who are repeatedly traumatized in childhood Part One brings together trauma theory with a number of theories of human development It directly addresses and describes developmental pathology and its origins Through powerful examples it conveys to the reader the pain and destruction caused by ongoing trauma abuse and continuous stress Part Two written from the perspective of a clinician who has worked extensively with traumatized children and adults is primarily directed to mental health professionals and graduate students These chapters are devoted to describing how to recognize the pathological consequences of trauma and how to intervene and remediate these developmental deficits The overarching theory is psychoanalytically based and developmental but other treatment approaches are integrated into the therapy when they are developmentally and therapeutically appropriate The text raises important questions related to the development of the self its relationship to therapy and the diagnosis and treatment of complex trauma in children adolescents and adults *Reports of Decisions in Probate* California.
