The author provides practical and helpful ideas for classroom teachers and content area specialists to easily incorporate writer's workshop while teaching in their subject area. New features in this second edition include internet websites that can be used to teach writing, e.g. wiki's, weblogs, and digital storytelling; examples from grades 4-8 classrooms that show how science, social studies, health, and mathematics teachers can also be teachers of poetry, narrative, and non-narrative writing; new assessment scoring guides; information on working with struggling writers and supporting English Language Learners; graphic organizers, templates, and mini-lessons that engage students in learning. *A Natural History of Boston's North Shore* Kristina Lindborg, 2007. It is designed to be a supplemental text to guide teachers in designing literacy instruction. The instructional sequence includes collaborative inquiry activities across the curriculum to extend each theme to math, science, technology, and social studies. Teachers are shown how to incorporate family literacy with a component entitled Home School Connections and to differentiate instruction for individual learners with a section entitled On Your Own Activities. The theme concludes with a critical literacy activity that applies the content knowledge of the theme with collaborative inquiry. A unique feature of the handbook is the emphasis on performance-based assessment with each instructional sequence containing two rubrics for the teacher to implement. The instructional sequences are meant as models for teachers to use in developing their own themes in order to facilitate critical literacy. These models can be adjusted to fit the reading level of the students as teachers become more familiar with the text's structure and their students' needs. **The Science Teacher**, 2005.
