

SINGER, MILTON: *Man's glassy essence: explorations in semiotic anthropology*. xiv, 222 pp, table, bibliogr., index. Bloomington: Indiana Univ. Press, 1984.

Man's glassy essence is both an hypothesis ('man is essentially a symbol') and an intellectual genealogy. Professor Singer's reflects in this book on how the maturing of his ideas have led him from 'philosophical – to 'semiotic anthropology', in search of a symbolic framework for understanding the human condition, especially as it bears on the question of personal and cultural identity. His solution is Peircean semiotics as a means to break from de Saussure's semiological model with its focus upon codes, which arguably excludes the relation of signs and their objects, and a coherent account of humans as at once symbolizers and symbols. He seeks further to demonstrate *post hoc (ergo propter hoc?)* how the history of anthropology may be read as a movement towards the semiotic vision of humans in culture. Like so many genealogies it serves to legitimate a particular pedigree – from Kroeber to Geertz – centred about Chicago.

Apart from offering a distinctive interpretation of that most evasive philosopher, Charles Saunders Peirce, the book reads well as a fascinating, if contentious, reconstruction of some interesting debates in anthropology, and uses an exegesis of Peirce to expose shortcomings in earlier theories of society and culture. If it skirts the vexing issue of how words or sentences refer to the world or to previous utterances, it is full of insights on the problematic position of humans in the symbolic process. Here Singer sides with Morris against Dewey on the crucial issue of what Peirce understood, in his triadic scheme of object, sign and 'interpretant', by this last and difficult notion. Does an interpretant necessarily involve 'a personal user as its interpreter' (p. 67) so anchoring symbolizing in 'the knowing subject'? Or is it better understood in terms of Peirce's own logic of relations as a determinant of possible references of the sign, and dynamically as conventional habits of interpretation? Singer's argument, which leans towards Morris's processual reading, requires the first version – of humans as both producing and being symbols – in order to produce a thorough-going semiotic model. Now Singer aptly cites Peirce as remarking that consciousness, and therefore thought and man, are inferences and so symbols in Peirce's terminology (p. 55). Further, 'men and words reciprocally educate one another' (p. 56). One can read this as underwriting the essentially symbolic nature of humans; but it is perhaps better understood in terms of his ontology as simply treating humans, like thoughts, as abstract but real, and as part of his complex evolutionary and (confessedly Hegelian) dialectical philosophical vision.

At this point the going gets hard, for it is by no means self-evident how one is to read Peirce. A difficulty is that Singer's book is neither an introduction, nor a reasoned account of an alternative philosophical framework of analysis, but rather an illumination of recent anthropological endeavours in the light of semiotics. A knowledge of Peirce (no mean feat) is assumed; and, as his ideas metamorphosed endlessly, those with some acquaintance have long needed a critical unravelling of the conflicting statements he made about semiotics and its bearing on his logic and ontology.

There seems, to borrow Kuhn's phrase, to be an essential tension in Singer's work. On the one hand he gives a good account of a received, and idiosyncratic, reading of Peirce which places him firmly as a phenomenological bedfellow of Schutz, rather than an objective idealist or a realist who started from Kant and Duns Scotus; and through pragmatism as the ancestor of symbolic interactionism, despite his careful distancing of his 'pragmaticism' from the

Mans Glassy Essence Explorations In Semiotic Anthropology:

Man's Glassy Essence Milton B. Singer, 1986 **Bibliography of Semiotics, 1975–1985**, 1986-01-01 This bibliography of semiotic studies covering the years 1975–1985 impressively reveals the world wide intensification in the field During this decade national semiotic societies have been founded all over the world a great number of international national and local semiotic conferences have taken place the number of periodicals and book series devoted to semiotics has increased as has the number of books and dissertations in the field This bibliography is the result of a dedicated effort to approach complete coverage **Wittgenstein's Secret Diaries** Dinda L. Gorfée, 2020-02-06 Ludwig Wittgenstein's works encompass a huge number of published philosophical manuscripts notebooks lectures remarks and responses as well as his unpublished private diaries The diaries were written mainly in coded script to interpolate his writings on the philosophy of language with autobiographic passages but were previously unknown to the public and impossible to decode without learning the coding system This book deciphers the cryptography of the diary entries to examine what Wittgenstein's personal idiom reveals about his public and private identities Employing the semiotic doctrine of Charles S Peirce Dinda L Gorfée argues that the style of writing reflects the variety of Wittgenstein's emotional moods which were profoundly affected by his medical symptoms Bringing Peirce's reasoning of abduction together with induction and deduction the book investigates how the semiosis of the emotional energetic and logical interpretations of signs and objects reveal Wittgenstein's psychological states in the coded diaries Archaeological Semiotics Robert W. Preucel, 2010-04-26 This interdisciplinary book examines archaeology's engagement with semiotics from its early structuralist beginnings to its more recent Peircian encounters It represents the first sustained engagement with Peircian semiotics in archaeology as well as the first discussion of how pragmatic anthropology articulates with anthropological archaeology Its central thesis is that archaeology is a distinctive kind of semiotic enterprise one devoted to giving meaning to the past in the present through the study of materiality It compliments standard studies of linguistics and reformulates contemporary theories of material culture Providing an introduction to Saussure and a review of his legacy across structural symbolic and cognitive anthropology Preucel goes on to present the Peircian alternative and highlights its influence on pragmatic anthropology Of special interest are the discussions of the interrelations of structuralism and processual archaeology poststructuralism and postprocessual archaeologies and cognitive science and cognitive archaeology The author offers two original case studies demonstrating how material culture pragmatically mediates social relations one focusing on the aftermath of the Pueblo Revolt from 1680–1694 and the other on the New England utopian community of Brook Farm from 1842–1846 Throughout his analysis Preucel emphasizes the close links between archaeology and other social sciences But he also contends that archaeology by virtue of the powerful ideological character of the past can open up new spaces for discourse and dialogue about meaning and in the process make a valuable contribution to contemporary semiotics **Nature's Primal Self** Nam T. Nguyen, 2011-01-01 The underlying

theme of this book is the analysis of Corrington's ecstatic naturalism as a breakthrough movement that combines the fields of semiotics, theology, depth psychology and philosophy in a new metaphysics of nature. Ecstatic naturalism provides a viable alternative to Peirce's semiotic conception of the self and to Jaspers' existential elucidation of Existenz. **On Translating Signs**

Dinda L. Gorlée, 2022-04-25. Translation produces meaningful versions of textual information. But what is a text? What is translation? What is meaning? And what is a translational version? This book *On Translating Signs: Exploring Text and Semio* Translation responds to those and other eternal translation theoretical questions from a semiotic point of view. Dinda L. Gorlée notes that in this world of interpretation and translation surrounded by our semio-translational universe perfused with signs we can intuit whether or not an object in front of us disqualifies as a text. This spontaneous understanding requires no formalized definition in order to happen in the receivers of text signs. The author further observes that translated signs are not only intelligible for target audiences but also work together as a theatre of consciousness or a theatre of controversy which the author views as powered by Charles S. Peirce's three categories of Firstness, Secondness and Thirdness. This book presents the virtual community of translators as emotional, dynamical, intellectual but not infallible semioticians. They translate text signs from one language and culture into another, thus creating an innovative sign milieu packed with intuitive, dynamic and changeable signs. Translators produce fleeting and fallible text translations with obvious errors caused by ignorance or misguided knowledge. Text signs are translatable yet there is no such thing as a perfect or final translation. And without the ongoing creating of translated signs of all kinds there would be no novelty, no vagueness, no manipulation of texts and for that matter no semiosis. **Redescribing the Gospel of Mark**

Barry S. Crawford, Merrill P. Miller, 2017-06-16. A collaborative project with a variety of critical essays. This final volume of studies by members of the Society of Biblical Literature's consultation and later seminar on Ancient Myths and Modern Theories of Christian Origins focuses on Mark. As with previous volumes, the provocative proposals on Christian origins offered by Burton L. Mack are tested by applying Jonathan Z. Smith's distinctive social theorizing and comparative method. Essays examine Mark as an author's writing in a book culture, a writing that responded to situations arising out of the first Roman Judean war after the destruction of the Jerusalem temple in 70 CE. Contributors William E. Arnal, Barry S. Crawford, Burton L. Mack, Christopher R. Matthews, Merrill P. Miller, Jonathan Z. Smith and Robyn Faith Walsh explore the southern Levant as a plausible provenance of the Gospel of Mark and provide a detailed analysis of the construction of Mark as a narrative composed without access to prior narrative sources about Jesus. A concluding retrospective follows the work of the seminar, its developing discourse and debates and the continuing work of successor groups in the field. Features a thorough examination of the relation between structure and event in social and anthropological theory that provides conceptual tools for representing the project of the author of Mark. An exploration of the southern Levant as a plausible provenance of the Gospel, a permanent site of successive imperial regimes and culturally related peoples. A detailed analysis of the construction of Mark as a narrative composed without

Dimensions of Social Life Paul Hockings, 2011-06-01 No detailed description available for Dimensions of Social Life

Center Liah Greenfeld, Michel L. Martin, 1988-12-29 There are several concepts within the social sciences that refer to the fundamental realities on which the various disciplines focus their attention The concept of the center as defined by Edward Shils has such a status in sociology for it deals with and attempts to provide an answer to the central question of the discipline the question of the constitution of society Center is a commonly used term with a variety of meanings According to editors Liah Greenfeld and Michel Martin center carries a twofold meaning when used as a concept In its first sense it is a synonym for central value system referring to irreducible values and beliefs that establish the identity of individuals and bind them into a common universe In its second sense center refers to central institutional system the authoritative institutions and persons who often express or embody the central value system Both meanings imply a corresponding idea of periphery referring both to the elements of society that need to be integrated and to institutions and persons who lack authority The original essays compiled in this volume examine and apply the concept of the center in different contexts The contributors come from a broad range of disciplines classics religion philosophy history literary criticism anthropology political science

and sociology which serves to underscore the far reaching significance of the Shilsian theory of society The interrelated subsets of the center periphery theme addressed here include symbolic systems intellectuals the expansion of the center into the periphery parallel concepts in the work of other scholars besides Shils and the paths of research inspired by these concepts The volume features an introspective essay by Shils himself in which he reexamines his central ideas in the light of new experiences and the ideas of others some of them contained in this volume By drawing together such diverse scholars around a unified idea this collection achieves a cohesion that makes it an exciting contribution to the comparative analysis of social and cultural systems A collective effort in social theory Center Ideas and Institutions is a testimony to the breadth and complexity of one of man's ideas

A Material Culture Stephanie Wynne-Jones, 2016-05-12 A Material Culture focuses on objects in Swahili society through the elaboration of an approach that sees people and things as caught up in webs of mutual interaction It therefore provides both a new theoretical intervention in some of the key themes in material culture studies including the agency of objects and the ways they were linked to social identities through the development of the notion of a biography of practice These theoretical discussions are explored through the archaeology of the Swahili on the Indian Ocean coast of eastern Africa This coast was home to a series of settlements from the seventh century onwards some grew to become coral built stonetowns These precolonial towns such as Kilwa Kisiwani Mombasa and Gede represent a unique urban tradition They were deeply involved in maritime trade carried out by a diverse Islamic population This book suggests that the Swahili are a highly significant case study for exploration of the relationship between objects and people in the past as the society was constituted and defined through a particular material setting Further it is suggested that this relationship was subtly different than in other areas and particularly from western models that dominate prevailing analysis The case is made for an alternative form of materiality perhaps common to the wider Indian Ocean world with an emphasis on redistribution and circulation rather than on the accumulation of wealth The reader will therefore gain familiarity with a little known and fascinating culture as well as appreciating the ways that non western examples can add to our theoretical models

Peirce's Approach to the Self Vincent M. Colapietro, 1988-12-20 Based on a careful study of his unpublished manuscripts as well as his published work this book explores Peirce's general theory of signs and the way in which Peirce himself used this theory to understand subjectivity Peirce's views are presented not only in reference to important historical James Saussure and contemporary Eco Kristeva figures but also in reference to some of the central controversies regarding signs Colapietro adopts as a strategy of interpretation Peirce's own view that ideas become clarified only in the course of debate
