Culture of Stone O. W. Hampton, 1999 In this unique study Hampton describes the complete cultural inventory of both secular and sacred stones ranging from utilitarian stone tools and profane symbolic stones to symbolic spirit stones power stones with multiple functions and medicinal power stone tools Seasonality and Sedentism Thomas R. Rocek, Ofer Bar-Yosef, 1998-04-28 The papers in this volume explore the issues and techniques of archaeological site seasonality and settlement analysis Examples introduce a broad range of specific analytical techniques of seasonality assessment and show variability and similarity in settlement patterns worldwide *The Origins And Spread Of Agriculture And Pastoralism In Eurasia* David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geogrphical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity s almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative *The Origins and Spread of Agriculture and Pastoralism in Eurasia* should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization

diverse aspects of health through the study of human skeletal collections in a region that developed varying forms of agriculture East Asia's complex population movements and cultural practices provide biological markers that allow for the testing of multiple hypotheses about interactions in past communities Exploring the interplay between humans and their environments this volume considers millet agriculture mobile pastoralism with limited cereal farming and rice farming in combination with reliance on marine resources Many of these rare subsistence strategies are more or less exclusive to East Asia These advanced contributions will significantly boost collaborative work among bioarchaeologists and other scientists working in the region A volume in the series Bioarchaeological Interpretations of the Human Past Local Regional and Global Perspectives edited by Clark Spencer Larsen **California Prehistory** Terry L. Stark, 2008-04-15 This introduction to the archaeology of Asia focuses on case studies from the region's last 10 000 years of history Comprises fifteen chapters by some of the world's foremost Asia archaeologists Sheds light on the most compelling aspects of Asian archaeology from the earliest evidence of plant domestication to the emergence of states and empires Explores issues of cross cultural significance such as migration urbanism and technology Presents original research data that challenges readers to think beyond national and regional boundaries Synthesizes work previously unavailable to western readers **Humans at the End of the Ice Age** Lawrence Guy Straus, Berit Valentin Eriksen, Jon M. Erlandson, David R. Yesner, 2012-12-06 Humans at the End of the Ice Age chronicles and explores the significance of the variety of cultural responses to the global environmental changes at the last glacial interglacial boundary Contributions address the nature and consequences of the global climate changes accompanying the end of the Pleistocene epoch detailing the nature speed and magnitude of the human adaptations that culminated in the development of food production in many parts of the world The text is aided by vital maps chronological tables and charts 田嶋幸三 編, 2007 *Recent Advances in Indo-Pacific Prehistory* Misra, Bellwood, 2023-07-17

Ruins of Identity Mark James Hudson, 1999-08-01 Many Japanese people consider themselves to be part of an essentially unchanging and isolated ethnic unit in which the biological linguistic and cultural aspects of Japanese identity overlap almost completely with each other In its examination of the processes of ethnogenesis the formation of ethnic groups in the Japanese Islands *Ruins of Identity* offers an approach to ethnicity that differs fundamentally from that found in most Japanese scholarship and popular discourse Following an extensive discussion of previous theories on the formation of Japanese language race and culture and the nationalistic ideologies that have affected research in these topics Mark Hudson presents a model of a core Japanese population based on the dual origin hypothesis currently favored by physical anthropologists

According to this model the Jomon population which was present in Japan by at least the end of the Pleistocene was followed by agriculturalists from the Korean peninsula during the Yayoi period ca 400 BC to AD 300 Hudson analyzes further evidence of migrations and agricultural colonization in an impressive summary of recent cranial dental and genetic studies and in a careful examination of the linguistic and archaeological records The final sections of the book explore the cultural construction of Japanese ethnicity Cultural aspects of ethnicity do not emerge pristine and fully formed but are the result of cumulative negotiation Ethnic identity is continually recreated through interaction within and without the society concerned Such a view necessitates an approach to culture change that takes into account complex interactions with a larger system Accordingly Hudson considers post Yayoi ethnogenesis in Japan within the East Asian world system examining the role of interaction between core and periphery in the formation of new ethnic identities such as the Ainu He argues that the defining elements of the Ainu period and culture ca AD 1200 can be linked directly to a dramatic expansion in Japanese trade goods flowing north as Hokkaido became increasingly exploited by core regions to the south Highly original and at times controversial Ruins of Identity will be essential reading for students and scholars in Japanese studies and will be of interest to anthropologists and historians working on ethnicity in other parts of the world Text adopted at University of Chicago
