Diagnostic Pathology Robert B. Colvin,Anthony Chang,2015-09-22 The authors are particularly delighted to present the second edition of this text The excellent reception to the first edition has encouraged us to update and expand the contents We have added 40 chapters and 5 new authors reorganized some of the sections updated and polished text in all of the chapters and added current references and innumerable new images Overall we are pleased that the book reflects significant progress on our quest to provide a useful accurate and accessible compendium of all non neoplastic renal diseases for clinicians pathologists and investigators One may ask why so many chapters The answer is that medical research has led to an increasing number of distinct diseases once categorized by clinical and pathologic characteristics and now increasingly further defined and separated by etiologic and genetic criteria
