Pathways to Literacy Michael R. Sampson, Mary Beth Sampson, Roach Van Allen, 1995      *Pathways to Literacy*, 2001

The Language Experience Approach to Literacy for Children Learning English Pamela J. T. Winsor, 2009 The instructional framework presented in this book is intended to help teachers provide all young children but especially English language learners with rich meaningful and interactive literacy instruction Referred to as LEALE the instruction is grounded in the traditional Language Experience Approach LEA It has been expanded to encompass principles and practices of research based early literacy instruction as understood and presented in current professional literature The approach is presented in an attractive easily understood style that invites both beginning and experienced teachers to engage their students in literacy The LEALE instructional framework presented here grew out of the many happy hours that the author spent working with children and their teachers over the years Included are pictures and examples of classroom materials chart stories and journals from children in Belize Central America and children in urban centres in Alberta Canada This title also features a brief history of LEA and its enduring merits an overview of the research that supports the enhancements of LEA included in LEALE a full description of LEALE with examples a guide for planning instruction including examples of unit topics and related resources descriptions of supplementary learning activities designed to enhance children s learnin recommended assessment procedures reproducible materials to aid teacher planning and record keeping      Pathways to Literacy Trevor Cairney, 1995 This book recognizes that there is no simple way to develop literacy It begins with the central premise that literacy is not simply a cognitive process rather it is a set of social practices that are used in rich sociocultural contexts Literacy learners come to school with unique social histories that need to be recognized in the programmes devised to facilitate learning There are many forms of literacy each with its own specific purposes and contexts in which they are used Why is it that school literacy disempowers some and empowers others How must schools teachers and teaching change in order to ensure that literacy can be empowering for all What types of classroom environments permit children to gain access to the literacy practices which they need to take their place in the world Addressing these questions provides a refreshingly different look at the many practical classroom strategies and practices necessary to recognize multiple pathways to literacy
