Len Fulton, 1993 **Resources in Education** ,1998-10 **Play and Meaning in Early Childhood Education** Doris Pronin Fromberg, 2002 Focusing on ages 0-8, this book integrates contemporary theories of play with curriculum practice. This book matches the process of teaching young children to the ways in which young children develop meaning. It provides a bridge between child development and curriculum studies. The book is divided into four sections: two theoretical and two practical. The theoretical sections make concepts accessible by providing clear definitions, specific examples, and illustrating their relationship to play. The practical sections deal with how to develop environmental design, begin the year, organize a classroom, and implement numerous practical ways for teachers to use playful approaches in early childhood instruction. Educational Materials about Agriculture ,1993 **Equity in Data** Andrew Knips, Michael Savoy, Sonya Lopez, Kendall LaParo, 2022-10-06 Building a better data culture can be the path to better results and greater equity in schools. But what do we mean by data? Your students are not just statistics. They aren't simply a set of numbers or faceless dots on a proficiency scale. They are vibrant collections of experiences, thoughts, perspectives, emotions, wants, and dreams. And taken collectively, all of that information is data and should be valued as such. **Equity in Data** not only unpacks the problematic nature of current approaches to data but also helps educators demystify and democratize data. It shows how we can bake equity into our data work and illuminate the disparities, stories, and truths that make our schools safer and stronger and that help our students.

grow and thrive To this end the authors introduce a four part framework for how to create an equitable data culture along with a complementary set of data principles They demonstrate how we can rethink our approach to data in the interest of equity by making five shifts Expand our understanding of data Strengthen our knowledge of data principles Break through our fear of data Decolonize our data gathering processes Turn data into meaningful equitable action We have an opportunity to realign school data with what students want out of their educational experiences When we put equity first we put students first
