Patients View Their Psychotherapy By Strupp Hans Ronald:

Experiences of Counselling in Action Dave Mearns, Windy Dryden, 1989-12-06 How hard it is to find a book to recommend to trainees which will give them an insight into what counselling and psychotherapy too for that matter is really like This book does exactly that This is a book which would be equally useful to the humanistic practitioner and the more orthodox one The breadth of sympathy is admirable in dealing with what is common to all orientations This is one of those rare books which does justice both to the human experiences involved in counselling and psychotherapy and to the theory which might explain those experiences Changes What is the experience of counselling from the perspectives of both client and counsellor What can be learned for the practice of counselling from an understanding of how it feels to be a client or a counsellor Addressing these questions central to this book are the personal accounts of individual clients and counsellors who each relate their own very different experiences of counselling They explore such issues as identity expectations trust power and boundaries in the client counsellor relationship And each examines the intense personal meanings of success or failure in the client or counsellor role An analysis of the implications for the counselling relationship concludes the volume

Patients View Their Psychotherapy [by] Hans H. Strupp, Ronald E. Fox [and] Ken Lessler Hans H. Strupp, 1969 [On Being a Client](#) David Howe, 1993-07-20 This book explores what clients have to say about their experience of the psychotherapeutic process David Howe observes that regardless of the therapist's theoretical orientation clients say similar things about their experience of being helped and not being helped It is the non specifics of genuineness a secure trusting atmosphere empathy and warmth that offer the vehicle for encouraging a dialogue of personal intimate material and of making sense and understanding when we are in pain puzzled or worried This is an easy and gentle read For those interested in Attachment Theory this would be a useful addition to their bookshelf Clinical Psychology Forum There is a growing interest in what clients have to say about their experiences of counselling and psychotherapy In a powerful analysis of this subject David Howe identifies a number of clear and potent messages He explores such questions as why clients say the things they say and why the therapeutic alliance holds out such promise and using the client's experience as a platform seeks to create a general theory of counselling and psychotherapy The author draws on a number of new and exciting ideas emerging in developmental psychology sociology and the brain sciences to discuss the process by which the human infant becomes an individual as well as a competent social being From the basis that the social and psychological structures which generate the client's experience underlie all psychotherapeutic encounters the book then explores how the self forms and then re forms in social relationships including those established during counselling and psychotherapy In conclusion the reader is invited to consider a number of thought provoking claims about the universal qualities that characterize good and bad practice in all schools of counselling therapy and the helping process **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **The Social Work Interview** Alfred Kadushin, Goldie Kadushin, 1997-03-04 For twenty five
