Lucia True Ames Mead,2023-07-18 In this book Lucia True Ames Mead argues that the concepts of patriotism and internationalism are not mutually exclusive and that to be a true patriot one must also embrace a global perspective It is a timely and thought provoking work that speaks to contemporary debates about national identity and global citizenship This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Nationalism and Internationalism Intertwined** Pasi Ihalainen,Antero

Holmila,2022-03-11 It is commonplace that the modern world is more international than at any point in human history Yet the sheer profusion of terms for describing politics beyond the nation state including international European global transnational and cosmopolitan among others is but one indication of how conceptually complex this field actually is Taking a wide view of internationalism s in Europe since the eighteenth century *Nationalism and Internationalism Intertwined* explores discourses and practices to challenge nation centered histories and trace the entanglements that arise from international cooperation A multidisciplinary group of scholars in history discourse studies and digital humanities asks how internationalism has been experienced understood constructed debated and redefined across different European political cultures as well as related to the wider world *Internationalism in the Age of Nationalism* Glenda Sluga,2013-04-11 Glenda

Sluga traces internationalism through its rise before World War I its mid century apogee and its decline after 9 11 Drawing on archival material and contemporary accounts this innovative history restores internationalism as essential to understanding nationalism in the twentieth century Patriotism and the New Internationalism Lucia True Ames Mead,2015-09-01 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important

Falk,2025-04-15 This book of essays is preoccupied with the contrast between prevailing loyalty to the sovereign state patriotism and an emergent alternative of loyalty to the species and its natural habitat Such an orientation toward ecological patriotism focuses on conditions of human survival ecological stability and cosmological awareness in the Age of the Anthropocene It is a patriotism guided by empirical and normative assessments regarding the deficiencies of the existing world order and its inability to provide the biological economic political ecological cultural ethical and spiritual foundations for the future viability of life on earth Falk s assessment rests on a growing inability of existing policies practices and problem solving arrangements to protect and promote the global national and local public goods on the increasing marginalization of international law global ethics internationalism and spiritual imperatives on a prevailing anachronistic nationalism and related conceptions of national self interest on the unsustainable market driven and state centric world order reinforced by the non accountability of Great Powers on a vital but currently weak disempowered and disoriented UN on a potentially fatal identification of military capabilities arms sales and policing with the pursuit of security as well as for the fulfillment of the extra territorial ambitions of a few rival states and alliances These deficiencies imperil humanity as never before in world history not only the viability of sovereign states regions or localities but the entirety of human experience and overall ecological sustainability Against such a background the most immediate challenge is to create sufficient political traction to overcome settled ideas special interests and habitual ways of acting This does not now seem possible despite the urgency of the situation Empirical indicators suggest strong trends that on balance are reinforcing and accentuating the deficiencies rather than their moving toward their correction Confronting such a reality is not meant to be taken as a recipe for despair On the contrary it is meant to ground prospects for a hopeful future in the realities of our time which presuppose learning to respect the limiting conditions of the carrying capacity of the earth As such it is calling for a politics of impossibility an engagement at all levels of social order with the struggle for a future that exceeds the bounds of perceived feasibility yet from the vantage point of humane global governance that constitutes necessity and equity warranting struggle for the various futures needed and desired by the peoples of the world There are of course no assurances of success but we do know that current modes of sleepwalking into the future do not offer solutions and rather reflect a collective species death wish as the failure to respond in time and scale amounts to a virtual death warrant for many species and their habitats including the human We have always lived amid uncertainty with respect to our own life and death but now we are also challenged by the precarious mortality of the species and planet earth It seems the worst of times but it may yet just possibly become the best of times The inclusion of law ethics and spirituality acknowledge that the values prevailing in civic culture

and among the peoples of the world are an essential element of the transformative vision of patriotism being proposed The challenge is not just functional It is a matter of how we choose to live together on the earth what relationships to its resources and limitations are developed and of whether people can be mobilized in ways that overcome obstacles posed by entrenched special interests and civilizational habits deeply embedded in social consciousness The chapters that comprise this book seek to be both down to earth that is grounded in the realities of the present and yet animated by and rooted in a spiritual and cosmopolitan imaginary of what lies ahead It hopes for a reinvention of nationalism by reference to the sky above and land below that is by cosmic cycles of being and by the intimacies of local existence **The Global Citizenship**

Nexus Debra Chapman,Tania Ruiz-Chapman,Peter Eglin,2020-04-08 In the spirit of Ivan Illich s 1968 speech To hell with good intentions the book takes aim at a ubiquitous form of contemporary ideology namely the concept of global citizenship Its characteristic discourse can be found inhabiting a nexus of four complexes of ruling institutions namely universities with their international service learning the United Nations and allied international institutions bent on global citizenship education international non governmental organizations and foundations promoting social entrepreneurship and global corporations and their mouthpieces pitching corporate social responsibility and sustainable development The question is in the context of Northern or Western imperialism and US led neoliberal global corporate capitalism and the planetary Armageddon they are wringing what is the concept of global citizenship doing for these institutions The studies in the book put this question to each of these four institutional complexes from broadly political economic and post colonial premises focusing on the concept s discursive use against the background of the mounting production of the global non citizen as the global citizen s other Addressed to all users of the concept of global citizen ship from university students and faculty in global studies to social entrepreneurs and United Nations bureaucrats the book s studies ultimately ask whether the idea helps or hinders the global quest for social and economic justice **The Gospel of the Kingdom** ,1914 Statistics of Land-grant Colleges and Universities United States.
