Men and Women Making Friends in Early Modern France Lewis C. Seifert, Rebecca M. Wilkin, 2016-03-03 Today the friendships that grab people's imaginations are those that reach across inequalities of class and race The friendships that seem to have exerted an analogous level of fascination in early modern France were those that defied the assumption inherited from Aristotle and patristic sources that friendships between men and women were impossible Together the essays in *Men and Women Making Friends in Early Modern France* tell the story of the declining intelligibility of classical models of male friendship and of the rising prominence of women as potential friends The revival of Plato's friendship texts in the sixteenth century challenged Aristotle's rigid ideal of perfect friendship between men In the seventeenth century a new imperative of heterosociality opened a space for the cultivation of cross gender friendships while the spiritual friendships of the Catholic Reformation modeled relationships that transcended the gendered dynamics of galanterie *Men and Women Making Friends in Early Modern France* argues that the imaginative experimentation in friendships between men and women

was a distinctive feature of early modern French culture The ten essays in this volume address friend making as a process that is creative of self and responsive to changing social and political circumstances Contributors reveal how men and women fashioned gendered selves and also circumvented gender norms through concrete friendship practices By showing that the benefits and the risks of friendship are magnified when gender roles and relations are unsettled the essays in this volume highlight the relevance of early modern friend making to friendship in the contemporary world *Rural Space in the Middle Ages and Early Modern Age* Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic *Drinking with Your Patron Saints* Michael P.
