Patterns of Trade and Ships Cargoes A. N. Cabot, 1997-04-01 Previously published as *Ships and their cargoes* by A N Cabot *Econometric Modelling of World Shipping* M. Beenstock, A. Vergottis, 1993-09-30 *Econometric Modelling of World Shipping* describes an economic model that may be used to forecast world shipping markets A unique feature of the model is that it relates to both sectors of world shipping the dry cargo sector and the tanker sector This is the first time that a model of this type has been published This book also breaks new ground in explaining the behaviour of vessel prices both new and secondhand **Cargo Access Equipment for Merchant Ships** Ian Lyon Buxton, 2012-12-06 As President of International MacGregor I am deeply indebted to the authors of this excellent book for the very considerable amount of work and scholarship it contains It is the first authoritative work on cargo access equipment to be published and I am sure that it will be greatly welcomed by the Marine Industries You will see from the authors preface that the book was commissioned by the Henri Kummerman Foundation which was established in 1976 to assist and promote internationally research and development in the field of marine transportation and cargo handling The Foundation has already made a number of grants to universities and to students but this book is its first major contribution to the furthering of education in the Marine Industries For me it is a rewarding fruition of a long involvement in maritime affairs However much requires to be done in the future and the Foundation can only succeed if it is encouraged and assisted by people who are forward thinking I should be pleased therefore to hear from any readers of this book if they feel that they can help or be helped within the aims and objectives of the Foundation 28 Chemin du Pommier HENRI KUMMERMAN 1218 Geneva Switzerland Shipping and Development in Dubai Keith Nuttall, 2021-10-21 A small town on a sandy creek half a century ago Dubai is now the largest trading commercial leisure and transport entrepot in the Gulf and wider region This book explains the reasons for the emergence of Dubai and its distinctive development trajectory arguing that the decision in the 1970s to invest in infrastructure made possible by shipping containerization laid the foundations for its future expansion The book shows that in contrast to its competitors hydrocarbon rentier economic model Dubai's creation and expansion of ports and airports together with value added logistics and business friendly enhancements were used to out compete regional rivals Drawing on a range of primary and secondary sources including interviews with logistics business people government records memoirs it fills a significant lacuna in the history of Dubai's development and emergence as a global trade hub **The Blackwell Companion to Maritime Economics** Wayne K.
