Ebeling, Signe Oksefjell Ebeling, 2013-09-17 Combining the fields of phraseology and contrastive analysis this book describes how patterns defined as recurrent word combinations with semantic unity behave cross linguistically As the contrastive approach adopted in the book relies on translations and a bidirectional corpus model the first part offers an in depth discussion of contrastive linguistics with special emphasis on using translations as tertium comparationis and a parallel corpus as the main source of material Central to the contrastive analysis is the use of corpus linguistic methods in the identification of patterns while a deeper understanding of the phraseological nature of the patterns is closely related to the concept of extended units of meaning The second part of the book presents five case studies using an easy to follow step by step method to illustrate the phraseological contrastive approach at work The studies show that patterns weave an intricate web of meanings across languages and demonstrate the potential of exploring patterns in contrast      **Pattern-oriented Analysis and Design** Sherif M. **Diffraction Reading** Kai Merten, 2021-05-27 Putting the New Materialist figure of diffraction to use in a set of readings in which cultural texts are materially read against their contents and their themes against their readers or against other texts this volume proposes a critical intervention into the practice of reading itself In this book reading and reading methodology are probed for their materiality and re-considered as being inevitably suspended between or diffracted with both matter and discourse The history of literary and cultural reading including poststructuralism and critical theory is revisited in a new light and opened up for a future in which the world and reading are no longer regarded as conveniently separate spheres but recognized as deeply entangled and intertwined Diffraction Reading ultimately represents a new reading of reading itself firstly by critiquing the distanced perspective of critical paradigms such as translation and intertextuality in which texts encountered processed or otherwise subdued secondly showing how all literary and cultural readings represent different
