Kateřina Vráblíková,2016-08-12 The broad expansion of non electoral political participation is considered one of the major changes in the nature of democratic citizenship in the 21st century Most scholars but also governments transnational and subnational political institutions and various foundations have adopted the notion that contemporary democratic societies need a more politically active citizenry Yet contemporary democracies widely differ in the extent to which their citizens get involved in politics beyond voting Why is political activism other than voting flourishing in the United States but is less common in Britain and almost non existent in post communist countries like Bulgaria The book shows that the answer does not lie in citizen s predispositions social capital or institutions of consensual democracy Instead the key to understanding cross country differences in political activism beyond voting rests in democratic structures that combine inclusiveness and contestation What Kind of Democracy is the first book to provide a theoretically driven empirical analysis of how different types of democratic arrangements affect individual participation in non electoral politics *Criminal Disenfranchisement in an International Perspective* Alec C. Ewald,Brandon Rottinghaus,2009-04-13 The book analyzes a contemporary policy question at the nexus of democracy criminal justice and constitutional citizenship *Maestri of Political Science* Donatella Campus,Gianfranco Pasquino,Martin Bull,2011-06-01 This book continues the editors work started in the volume Masters of Political Science of highlighting and re evaluating the contributions of the most important political scientists who have gone before Its basis is the belief that the future development and sophistication of the discipline will benefit from a critical understanding of the works of early political giants whose contributions are presented and analysed Gabriel A Almond Raymond Aron Philip Converse Maurice Duverger Stanley Hoffmann Paul Lazarsfeld Arend Lijphart Elinor Ostrom William H Riker Stein Rokkan and Susan Strange The editors review and consider the contributions of these maestri to the study of contemporary democracy political culture electoral systems political communication the transformation of capitalism and state formation in Europe Maestri of Political Science is aimed not only at a new generation of political scientists but is a valuable opportunity for established scholars to see new light through old windows *Political Participation, Diffused Governance, and the Transformation of Democracy* Yvette

Peters,2017-11-27 Although democratic governments have introduced a number of institutional reforms in part intended to increase citizens political involvement studies show a continued decline in regular political engagement This book examines different forms of political participation in democracies and in what way the delegation of public responsibilities or the diffusion of politics has affected patterns of participation since the 1980s The book addresses this paradox by directly investigating the impact of institutional changes on citizens political participation empirically It re analyses patterns of political participation in contemporary democracies providing an in depth time series cross sectional analysis that helps develop a better understanding of how variation in political participation can be explained both between countries and over time As such it develops an institutional theoretical framework which can help to explain levels of participation and shows that instead of displaying more political apathy citizens have reallocated or displaced their activities to a broader array of forms of participation This book will be of key interest to students and scholars of comparative politics democratization political participation and electoral politics
