The Matrix Explained Maxime Drouin, 2019-01-03 It's amazing how dominant information is in the modern world In fact it's so dominant that it begs the question What if information does not only define and shape our world what if it is in fact reality The 1999 film *The Matrix* and its sequels were predicated on just this idea Of late the sultans of Silicon Valley have become obsessed with this idea which is known as the simulation hypothesis Elon Musk himself has remarked There's a billion to one chance we're living in base reality Perhaps information doesn't just define and shape our reality Perhaps it's entangled in the fabric of reality through the mind of the observer Consider the philosophical thought experiment if a tree falls in the forest and no one is there to hear it does it make a sound It takes a mind to experience reality In this book I chronicle the journey that led me to discover the missing link between science and spirituality the information bit Legendary theoretical physicist John Wheeler's it from bit theory and my own Quantum Mind model are ultimately rooted in the same thing data Wheeler suggested that the reality of physics the it is based on patterns of information or bits I theorize that our actions in the real world unfold in sync with the underlying information thought blueprints that exist in our mind Buddha once said The mind is everything What you think you become This bi-directional dialogue across the mind-body connection may well occur at the Planck scale where the transition between quantum physics the bit and classical physics the it operates But where do the mind and body meet Purpose which emerges from knowing oneself unifies the wisdom of the East with the pragmatism of the West The energy derived from what has meaning to the self is the fuel that allows individuals to manifest in the physical reality via the body the bit arrangement contained in the micro realm of their mind If its point of origin is love this route leads to inner peace and harmony and draws a vector unifying the mind heart and body
