Andersson,Charlotta Mellander,2011-01-01 With the publication of *The Rise of the Creative Class* by Richard Florida in 2002 the creative city became the new hot topic among urban policymakers planners and economists Florida has developed one of three path breaking theories about the relationship between creative individuals and urban environments The economist ke E Andersson and the psychologist Dean Simonton are the other members of this creative troika In the *Handbook of Creative Cities* Florida Andersson and Simonton appear in the same volume for the first time The expert contributors in this timely Handbook extend their insights with a varied set of theoretical and empirical tools The diversity of the contributions reflect the multidisciplinary nature of creative city theorizing which encompasses urban economics economic geography social psychology urban sociology and urban planning The stated policy implications are equally diverse ranging from libertarian to social democratic visions of our shared creative and urban future Being truly international in its scope this major Handbook will be particularly useful for policy makers that are involved in urban development academics in urban economics economic geography urban sociology social psychology and urban planning as well as graduate and advanced undergraduate students across the social sciences and in business **Polish Migration to the UK in the 'New' European Union** Kathy Burrell,2016-04-22 Since the 2004 enlargement of the European Union over half a million Polish migrants have registered to work in the United Kingdom constituting one of the largest migration movements in contemporary Europe Drawing on research undertaken across a wide range of disciplines history economics sociology anthropology film studies and discourse analysis and focusing on both the Polish and British aspects of this phenomenon both emigration and immigration this edited collection investigates what is actually new about this migration flow what its causes and consequences are and how these migrants lives have changed by moving to the United Kingdom As the first book to deal with Polish migration to the United Kingdom *Polish Migration to the UK in the New European Union* will appeal to scholars across a range of social sciences whose work concerns migration and the migration process **Migration, Population Structure, And Redistribution Policies** Calvin Goldscheider,2019-03-08 This book analyses the links between migration and the composition structure and geographic distribution of populations It discusses the evolution of population redistribution policies in Brazil and examines internal migration between the 1930s and the 1980s **Urban Migrants In Developing Nations** Calvin Goldscheider,2019-03-18 What are the effects of migration and the change to city life on

Human Migration J. J. Mangalam,2014-07-15 In this guide to the literature on human migration J J Mangalam indexes over 2 000 titles that appeared in English from 1955 through 1962 An important feature of this work is the annotation of nearly 400 major articles on migration These annotations provide information on the main focus of the study the hypotheses tested and any special measuring devices employed The conclusions are also given using the authors words whenever possible To facilitate the use of this guide the author has compiled an index that lists not only the subjects treated but also the major variables used in each abstracted study thus the researcher who is interested in the use of certain variables can easily refer to the previous investigation of the influence of these factors upon migration In a comprehensive introduction Mangalam surveys the current state of studies of human migration and suggests a theoretical framework by which the vast amount of existing facts from different migration studies can be integrated and given meaning

Beyond Economic Migration Min Zhou,Hasan Mahmud,2023-01-17 Offers a critique of the economic model of immigration Most understandings of migration to the US focus on two primary factors Either there was trouble in the home country such as political unrest or famine that pushed people out or there was a general yearning for a better life or more opportunity often conceptualized as the American Dream Although many contemporary migrants in the United States have been driven by economic interests the processes of immigration and integration are shaped also by the intersection of a range of noneconomic factors in both sending and receiving countries The contributors to *Beyond Economic Migration* offer a nuanced look at a range of issues affecting motives to migrate and outcomes of integration including US immigration policy and the visa system labor market incorporation employment precarity identity and belonging and transnationalism relating to female migrants student migrants and temporary foreign workers *Beyond Economic Migration* argues that for the dream of fair and equitable migration to be realized analyses of cross border movements resettlement and integration must pay attention to how migrants individual attributes interact with institutional mechanisms and social processes

Migration as resource for identity construction Alexandra Deliu, 2019-12-10 In this book I make use of concepts such as collective identity identity construction migration as discursive resource and ethnicity in tackling the question of how identity is constructed by the interviewees in their interactions with the researchers More specifically a certain part of this constructionist setting is emphasized the role played by migration as concept brought by interviewees into the discussion flow in order to define social categories or in social identity theory's vocabulary in groups and out groups Given this analytical orientation using as introduction the words and story of a migrant among those whose voices I present and discuss seemed only natural The book is not focused on migration as phenomenon and it does not place it in causal relations to states of facts Instead it is a proposition to explore discourses and narratives of migration and the shifts in various social definitions performed within them It basically brings forward migration and identity as two related concepts and explores how the latter is constantly redefined in reference to the former The theoretical perspectives that link identity and migration presented here are assimilation and transnationalism and albeit from different directions they both relate to issues such as integration and dealing with borders be they political social or psychological Restructuring the Malaysian Economy Robert E.B. Lucas, Donald Verry, 2016-07-27 An authoritative study of the Malaysian economy and labour market Malaysia has enjoyed an enviable growth record over twenty five years which few nations can match and has also been keen to judge her performance against non growth criteria of poverty eradication and national unity following the emergence of racial conflict in 1969 There are many lessons for policy makers elsewhere of this active approach to poverty eradication and social restructuring while generating rapid growth which stands in sharp contrast to laissez faire orthodoxy **Dhaka's Changing Landscape** Rita Afsar, Mahabub Hossain, 2019-11-05 Between 1991 and 2010 Dhaka's population more than doubled to 15 million Simultaneously the city's contribution to the national economy almost trebled Clearly population growth was accompanied by an unmistakable trend of economic growth and a significant decline in urban poverty and income inequality On the other hand Dhaka's high population density exacerbated serious environmental challenges and it was soon ranked as one of the world's least livable cities In the context of these contradictory signals of rapid urbanization Dhaka's Changing Landscape sets to answer three most intriguing questions Are the poorer segments of urban population which migrate with dreams for better lives benefitting from positive economic trends Are these benefits sustainable Are these benefits creating scope for this group to have a stake in the city's growing prosperity By studying 600 households and applying comparative analysis over a span of 20 years the authors examine demographic and economic trends to understand the patterns scale and complexity of urban poverty income inequality and rural urban migration Going beyond the space and poverty debate they enlighten the readers about the quality of life questions sustainability matters and gender and generational roles and relations necessary to understand qualitative
