*Cadets on Campus* John A. Coulter, 2017-03-24 Since the founding of the United States Military Academy at West Point in 1802 more than eight hundred military schools have existed in this country The vast majority have closed their doors been absorbed into other educational institutions or otherwise faded away but others soldier on adapting to changing times and changing educational needs While many individual institutions have had their histories written or their stories told to date no single book has attempted to explore the full scope of the military school in American history *Cadets on Campus* is the first book to cover the origin history and culture of the nation s military schools secondary and collegiate and this breadth of coverage will appeal to historians and alumni alike Author John Alfred Coulter identifies several key figures who were pivotal to the formation of military education including Sylvanus Thayer the father of West Point and Alden Partridge the founder of the school later known as Norwich University the first private military school in the country He also reveals that military schools were present across the nation despite the conventional wisdom that most military schools and indeed the culture that surrounds them were limited to the South Coulter addresses the shuttering of military schools in the era after the Vietnam War and then notes a curious resurgence of interest in military education since the turn of the century

**The Education Systems of Europe** Wolfgang Hörner, Hans Döbert, Botho von Kopp, Wolfgang Mitter, 2007-05-03 Education is a paradoxical phenomenon On the one hand it is universal as since the period of Enlightenment it has been declared universal good for everybody Moreover we learnt by historical research following the ideas of world system theory that since this time as far as its main structures are concerned compulsory state education given by professional teachers in classrooms it took even universal traits However on the other hand the fact that education became state education organised or at least controlled by the state was the beginning of another tradition line education in the form of state organised educational institutions became a means of creating national identity Universal inclusion as for the light of reason shining for everybody is opposed to more or less nationalist exclusion of all the others shaping the feature of a particular nation state with a particular educational system This fundamental dialectical tension between the universal and the particular was one to the important motives to make this handbook One of the central issues of the country studies is precisely to display the relationship between universal values and the search for national identity Another motive is given by the European dimension of the handbook

**The Oxford Handbook of African American Citizenship, 1865-Present** Henry Louis Gates, Jr., 2012-05-24 Collection of essays tracing the historical evolution of African American experiences from the dawn of Reconstruction onward through the perspectives of sociology political science law economics education and psychology As a whole the book is a systematic study of the gap between promise and performance of African Americans since 1865 Over the course of thirty four chapters contributors present a portrait of the particular hurdles faced by African Americans and the distinctive contributions African Americans have made to the development of U S institutions and culture From publisher description
