Point Counterpoint Universal Grammar In The Second Language:

Point Counterpoint Lynn Eubank, 1991-01-01 *Point Counterpoint* offers a series of papers and replies originally presented at a special session of the Second Language Research Forum UCLA March 1989 The focus of the papers is primarily the role of Universal Grammar in second language acquisition though the agenda also includes discussion of other fundamental questions viz the explanatory potential of linguistic theory in native language development It may come as no surprise that the contributors and their respondents often present very different perspectives on the issues for most of the authors were known in advance to hold contrasting points of view Contributors c and Respondents r are Wolfgang Klein c Nina Hyams r Sascha Felix c Jacquelyn Schachter r Suzanne Flynn Lydia White c Robert Bley Vroman r Peter Jordens c Lynn Eubank r Jurgen Meisel c Bonnie Schwartz r Sharon Hilles c William O Grady r Daniel Finer c Margaret Thomas r Usha Lakshmanan c Nina Hymans Ken Safir r

Point Counterpoint Lynn Eubank, 1991 **Second Language Acquisition and Universal Grammar** Lydia White, 2003-03-06 This authoritative 2003 textbook provides an overview and analysis of current second language acquisition research conducted within the generative linguistic framework Lydia White argues that second language acquisition is constrained by principles and parameters of Universal Grammar The book focuses on characterizing and explaining the underlying linguistic competence of second language learners in terms of these constraints Theories as to the role of Universal Grammar and the extent of mother tongue influence are presented and discussed with particular consideration given to the nature of the interlanguage grammar at different points in development from the initial state to ultimate attainment Throughout the book hypotheses maintaining that second language grammars are constrained by universal principles are contrasted with claims that Universal Grammar is not implicated relevant empirical research is presented from both sides of the debate This textbook is essential reading for those studying second language acquisition from a linguistic perspective [The Generative Study of Second Language Acquisition](#) Suzanne Flynn, Gita

Martohardjono, Wayne O'Neil, 2014-01-14 The vast majority of work in theoretical linguistics from a generative perspective is based on first language acquisition and performance The vast majority of work on second language acquisition is carried out by scholars and educators working within approaches other than that of generative linguistics In this volume this gap is bridged as leading generative linguists apply their intellectual and disciplinary skills to issues in second language acquisition The results will be of interest to all those who study second language acquisition regardless of their theoretical perspective and all generative linguists regardless of the topics on which they work **Third Language Acquisition and Universal Grammar**

Yan-kit Ingrid Leung, 2009-01-16 *Third Language Acquisition and Universal Grammar* contains nine chapters on adult third language L3 or multilingual acquisition from the Universal Grammar UG perspective A variety of languages other than English are involved in the studies reported in the papers including Cantonese Chinese French German Italian Japanese Kazakh Mandarin Chinese Norwegian Russian Spanish Tagalog and Thai with acquisition cases taking place in a number of

different geographical locations such as Canada Germany Hong Kong Norway Taiwan Thailand the UK and the USA This volume will appeal to those studying L3 acquisition from a variety of theoretical perspectives and should encourage scholarly exchange between the fields of bi multilingualism and SLA Second Language Acquisition and the Critical Period Hypothesis David Birdsong, 1999-01-01

Second Language Acquisition and the Critical Period Hypothesis is the only book on the market to provide a diverse collection of perspectives from experienced researchers on the role of the Critical Period Hypothesis in second language acquisition It is widely believed that age effects in both first and second language acquisition are developmental in nature with native levels of attainment in both to be though possible only if learning began before the closure of a window of opportunity a critical or sensitive period These seven chapters explore this idea at length with each contribution acting as an authoritative look at various domains of inquiry in second language acquisition including syntax morphology phonetics phonology Universal Grammar and neurofunctional factors By presenting readers with an evenly balanced take on the topic with viewpoints both for and against the Critical Period Hypothesis this book is the ideal guide to understanding this critical body of research in SLA for students and researchers in Applied Linguistics and Second Language Acquisition **The Current State of Interlanguage** Lynn Eubank, Larry Selinker, Michael Sharwood Smith, 1995-01-01

This state of the art volume presents an outstanding collection of 22 studies on current issues facing research in second language acquisition SLA The editors sought contributions for this volume from seasoned veterans of SLA like Lydia White and Susan Gass from well known researchers in linguistics and or first language acquisition like Haj Ross and Harald Clahsen and from relative newcomers to the field like India Plough and Jean Marc Dewaele The topics covered range from the role of universals at various levels of second language L2 knowledge the way that linguistic knowledge is represented by L2 learners the changing nature of linguistic theory itself and the definition of usage phenomena like style shifting and code switching The introduction to *The Current State of Interlanguage* gives a concise yet detailed overview of research in the field over the past 10 years and focuses on the present growing consensus on a number of issues that were at one point highly controversial **Language Acquisition Beyond Parameters** Anahí Alba de la Fuente, Elena Valenzuela, Cristina Martínez Sanz, 2016-12-16

The chapters in this volume take different approaches to the exploration of language acquisition processes in various populations monolingual and bilingual first language acquisition L2 acquisition and address issues in syntax morphology pragmatics language processing and interface phenomena This volume is a tribute to Juana M Licerias fundamental and enduring contribution to the field of Spanish Second Language Acquisition SLA All the chapters in the volume are linked to or inspired by Juana s extensive body of work and like Juana s research they all stand at the crossroads of formal and experimental linguistics Together the studies presented in this volume are a reflection of Juana s impact both as a mentor and as a collaborative researcher while at the same time showcasing current trends and new directions in the field of generative SLA Paths of Development in L1 and L2 acquisition Sharon Unsworth, Teresa Parodi, Antonella

Sorace, Martha Young-Scholten, 2006-02-15 The main focus of generative language development research in recent decades has been the logical problem of language acquisition how learners go beyond the input to acquire complex linguistic knowledge This collection deals with the complementary issue of the developmental problem of language acquisition How do learners move from one developmental stage to another and how and why do grammars develop in a certain fashion Building on considerable previous research the authors address both general and specific issues related to paths of development These issues are tackled through considering studies of L1 and L2 children and L2 adults learning a range of languages including Dutch English French German Greek and Japanese The Acquisition of the DP in Modern Greek Theodoros Marinis, 2003-01-01 This book offers new data on the acquisition of functional categories in early child speech Based on longitudinal corpora of five children acquiring Modern Greek as their first language it describes the development of single DPs consisting of definite and indefinite articles complex DPs that require the use of multiple definite articles possessive constructions appositive constructions and Determiner Spreading a form of adjectival modification and number and case marking in nouns and definite articles Detailed quantitative and qualitative analyses show an incremental development of the DP The findings address the debate concerning maturation versus continuity Incremental acquisition of the DP argues in favour of a weak continuity approach to language acquisition Whilst gradual acquisition of the DP remains unexplained within the Principles and Parameters Theory it is fully compatible within Minimalism as it is argued to result from the gradual acquisition of the features associated with the Greek DP
