

This is a scholarly and topical focus on the prospects for Poland's economy and society in the 1990s. If the east European countries do become more closely linked with the west European economies in the 1990s, Poland's development will be of increasing interest and importance. Each area dealt with is looked at in the context of the current situation and possible policy shifts in the 1990s. The dramatic pace of change currently taking place in eastern Europe has thrown Poland's recent history into relief. However, there can be no doubt that Poland has had a very turbulent passage towards democracy, and was the first east European country to hold free elections, until the emergence of an alternative Solidarity Government. As it enters the 1990s, Poland still faces serious economic problems, which could result in further unrest, there is more hope in the future but it is now too uncertain for many Poles to tell. The editors of this volume have commissioned the articles from Polish social scientists, all of whom live and work in Poland and have a commitment to the country's social and economic reconstruction.
