SNI Documents 1979 ,1980 **SNI National Criminal Justice Reference Service** (U.S.), 1979 Document Retrieval Index ,1972 **National Criminal Justice Thesaurus** ,1992 Police Magazine ,1982 *For Security Personnel, HARD EMPTY HAND CONTROL, 2020* Mürsel Sevindik, 2020-04-14 This book covers Hard Empty Hand Control issues for law enforcement officer The goal is to provide police officers with an understanding of the principles of Hard Empty Hand Control techniques Hard Empty Hand Control techniques are defined as striking techniques

These techniques are used to control active aggression with empty hands and feet when the intermediate use of weapons is justified but are not tactically available. The term hard is descriptive of the nature of the technique. Hard empty hand strikes are always defensive, not offensive. These techniques are taught to protect lives from immediate danger. All hard empty hand control techniques are basic in nature; however, they address non-lethal use of force situations and are generally reliable and effective when properly utilized. Police officers should learn and demonstrate knowledge of the striking areas as well as methods of striking. When these techniques become necessary, loud, clear, repetitive verbal commands are an important aspect of the control process. The subject needs to know what the officer desires him/her to do. In addition, verbal and physical de-escalation is always preferred and should be attempted if applicable. In training, safety is paramount. Perfect practice makes perfect. Proper technique is more important than the speed of technique application. Proficiency will increase the speed proportionally. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

For Security Personnel, USE OF FORCE, 2020 Mursel Sevindik, 2020-04-05. This book covers Use of Force issues for law enforcement officers. The goal is to provide officers with an understanding of the various force options available to them and to make them aware of international standards regarding use of force. The use of force is a necessary and at times unavoidable part of the duty of a law enforcement officer. Officers should use no more force than is absolutely necessary to achieve a legitimate law enforcement objective. During their normal duties, officers often encounter various levels of dangerous and violent situations. They are often faced with situations that require the use of force in order to effect an arrest or ensure public safety. Resistance can be physical, verbal, and even psychological in nature. Sometimes the officer has to use force and even firearms to bring the situation to an end. The authority to use force and firearms is a very exclusive one. There are many restrictions for their use. The essential principles for the use of force are those of legality, necessity, and proportionality. The objective for using force is to overcome the suspect's resistance to an officer's lawful purpose. The officer must be able to articulate why a specific use of force was justified. The officer's justifications to use force must be so clear to the officer involved that he would not hesitate when faced with this decision. The consequences of hesitation or inaction because of inadequate training can be devastating. Therefore, the officer must carefully consider the use of force. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

For Security Personnel, HANDCUFFING, 2020 Mürsel Sevindik, 2020-04-15. This book covers Handcuffing issues for law enforcement officers. The goal is to understand and be able to perform proper techniques of using handcuffs. Handcuffs are temporary restraining devices designed to control the movements of a subject. Officers may routinely use handcuffs to control, restrain, and transport persons. Restraining devices will be applied properly and in accordance with training received so as to minimize the risk of unnecessary injury. The design of handcuffs ensures that the subject's movements are controlled to reduce the risk of injury to the police officer, members of the public, and the subject.

himself The most common types of handcuffs used in law enforcement today are the traditional and hinged variety In addition officers also use plastic cuffs in some situations Handcuffs do not entirely immobilize a suspect Regardless of the type used it is imperative that officers be aware that the police style handcuff is a temporary restraining device and that its proper use and application is crucial for the safety of the officer and subject Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement
