Policing the Line Norman S. J. Baxter, 2001 1 Conflict and the police POLICING THE LINE NORMAN S. J. Statebuilding, Security-Sector Reform and the Liberal Peace Barry J. Ryan, 2011-03-31 This book explores how and why police reform became an international phenomenon in the era of statebuilding that followed the end of the Cold War Police reform has become an indispensible element in the spread of liberal democracy Policing is distinguished by its ability to combine reasonable and forcible methods to preserve and spread liberal values. The book examines the reason police reform was introduced as a method of building consensus in Latin America and the Balkans and documents the development of its use in Africa the Middle East and the Caucasus region It illustrates how police power binds the liberal value of freedom to the security needs of post conflict regions and discusses its force as a strategy to bring law and order to a global security domain Drawing on a multi disciplinary approach to the subject the book delves deeply into policing as a method to bring coherence to global security It traces the presence of coherent police strategies in contemporary international relations through studies of the United Nations the European Union and the Organization for Security and Cooperation in Europe By contrasting police reform with security sector reform the book explores how liberal peace is imagined by the international NGO sector state aid agencies and international organizations This book will be of much interest to students of statebuilding post conflict reconstruction critical security studies development studies and IR in Protest Policing and Human Rights Michael Smith, 2022-12-30 This book examines protest policing and the general toolbox of options available to police commanders in response The right to peacefully protest is intrinsic to democracy and embedded in British history and tradition The police are responsible for managing public order and facilitating peaceful protest and this has not been without criticism On occasions the police have found themselves in opposition to protest groups and there have been incidents of disorder as a result In response the development of Police Liaison Teams in the UK has presented the police with a gateway for dialogue between themselves and those involved in protest Drawing on two contrasting case studies the policing of the badger cull in South West England and an English Defence League EDL march in Liverpool this book explores the experiences of police commanders police liaison officers protesters counterdemonstrators members of local businesses and other interested parties It explores how a dialogical approach with all those engaged in or affected by a protest has assisted the police in balancing human rights and reducing conflict for all An accessible and compelling read this book will appeal to students scholars and practitioners of policing politics criminology sociology human rights and all those interested in how protests are policed Police Administration Gary W. Cordner, 2016-03-02 This national best selling text examines police administration from multiple perspectives a systems perspective emphasizing the interrelatedness among units and organizations a traditional structural perspective administrative principles management functions and the importance of written guidelines a human behavioral perspective the human element in organizations and a strategic management perspective communications and information systems performance evaluation strategies and tactics and prevailing and promising approaches to increasing effectiveness of police agencies Coverage of management functions and organizational principles is streamlined while providing a stronger emphasis on diversity principles and on developing police agencies as learning organizations A concluding chapter covers contemporary issues including community engagement collaboration globalization racial profiling mass media cybercrime terrorism and homeland security Case studies based on real life events invite students to practice managing the conflicting circumstances and Modern policing blog posts Policing Northern Ireland Aogan Mulcahy, 2013-06-17 This book offer news and developments in the policing world provides an account and analysis of policing in Northern Ireland following the RUC Royal Ulster Constabulary from the start of the troubles in the 1960s up to 1999 It focuses on three key aspects of the police legitimation process reform measures which are implemented to redress a legitimacy crisis representational strategies which are invoked to offer positive images of policing and public responses to these various strategies. The book also makes a powerful contribution to wider current debates about police legitimacy police community relations community resistance and conflict resolution **Control** Willem De Lint, Alan Hall, 2009-01-01 Investigating the ways in which police practices have evolved in relation to labour strikes and protests Intelligent Control examines the means by which police forces have developed more coercive and consent based approaches to regulating social unrest International Criminal Justice Review ,2003 Democratic Policing in Transitional and Developing Countries Michael D. Wiatrowski, 2016-05-13 Is it possible to create democratic forms of policing in transitional and developing societies This volume argues that policing models and practices promoted by the west are often inadequate for adoption by countries making democratic transitions because they do not adequately address issues such as human rights equity co production accountability openness and organizational change Therefore police reform is often limited to a one size fits all approach The book expands the dialogue so that discussions of democratic policing around the world are more realistic comprehensive and sensitive to the local context Detailed case studies on Iraq South Africa Northern Ireland and Kazakhstan provide a realistic assessment of the current state of policing The editors use the studies to suggest how to promote democratic policing and other important goals of democratic reform around the world The volume will assist academics policy makers NGOs and others in tailoring a local democratic policing strategy within a broader framework to enhance socioeconomic development and citizen capacity build social capital reduce various forms of conflict and support human rights The Oxford Handbook of Police and Policing Michael Dean Reisig, Robert J. Kane, 2014 The police are perhaps the most visible representation of government They are charged with what has been characterized as an impossible mandate control and prevent crime keep the peace provide public services and do so within the constraints of democratic principles The police are trusted to use deadly force when it is called for and are allowed access to our homes in cases of emergency In fact police departments are one of the few government agencies that can be mobilized by a simple
