Incentives and Choice in Health Care Frank A. Sloan, Hirschel Kasper, 2008-05-16 Leading scholars in the field of

health economics evaluate the role of incentives in health and health care decision making from the perspectives of both supply and demand. A vast body of empirical evidence has accumulated demonstrating that incentives affect health care choices made by both consumers and suppliers of health care services. Decisions in health care are affected by many types of incentives such as the rate of return pharmaceutical manufacturers expect on their investments in research and development or disincentives such as increases in copayments patients must make when they visit physicians or are admitted to hospitals. In this volume leading scholars in health economics review these new and important results and describe their own recent research assessing the role of incentives in health care markets and decisions people make that affect their personal health. The contexts include demand decisions choices made by individuals about health care services they consume and the health insurance policies they purchase and supply decisions made by medical students practicing physicians hospitals and pharmaceutical manufacturers. Researchers and students of health economics and policy makers will find this book a valuable resource both for learning economic concepts particularly as they apply to health care and for reading up to date summaries of the empirical evidence. General readers will find the book's chapters accessible interesting and useful for gaining an understanding of the likely effects of alternative health care policies.

Health Care Off the Books Danielle T. Raudenbush, 2020-02-11. Millions of low income African Americans in the United States lack access to health care. How do they treat their health care problems? In *Health Care Off the Books* Danielle T Raudenbush provides an answer that challenges public perceptions and prior scholarly work. Informed by three and a half years of fieldwork in a public housing development Raudenbush shows how residents who face obstacles to health care gain access to pharmaceutical drugs medical equipment physician reference manuals and insurance cards by mobilizing social networks that include not only

their neighbors but also local physicians However membership in these social networks is not universal and some residents are forced to turn to a robust street market to obtain medicine For others health problems simply go untreated Raudenbush reconceptualizes U S health care as a formal informal hybrid system and explains why many residents who do have access to health services also turn to informal strategies to treat their health problems While the practices described in the book may at times be beneficial to people s health they also have the potential to do serious harm By understanding this hybrid system we can evaluate its effects and gain new insight into the sources of social and racial disparities in health outcomes
