heavy strategic bombers and the airplane as an essential part of the Navy the night fighter equipped with radar and the jet plane emerged which revolutionized the world aviation Aviation enabled the air transport of millions of men and goods from one continent to another through the oceans in a massive and rapid manner With the use of nuclear weapons launched from a single plane with the power to annihilate entire cities aviation has changed the global strategy ending forever with the old concepts of front and rear of war transforming conventional forces into secondary actors and replacing the conquest with absolute nuclear destruction In the 2nd World War the Axis Powers Germany Italy Japan Romania Hungary Finland Slovakia Croatia Lithuania Estonia and Bulgaria they faced the allied countries France Great Britain and the countries of the Commonwealth United States Soviet Union China Norway Holland Belgium Greece Yugoslavia Poland and several Latin American countries with little participation of their limited air forces

Russian Aviation and Air Power in the Twentieth Century John Greenwood, Von Hardesty, Robin Higham, 2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century Presenting a comprehensive view of Russian aviation from its genesis in the late czarist period to the present era the approach is essentially chronological with a major emphasis on the evolution of military aviation The contributions are diverse with appropriate attention to civilian and institutional themes

The Jet Race and the Second World War S. Mike Pavelec, 2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec's analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport
