**The Politics of Repression Under Authoritarian Rule** Dag Tanneberg, 2020-01-03 Does authoritarian rule benefit from political repression This book claims that it does if restrictions and violence two fundamentally different forms of repression complement each other Based on an in depth quantitative analysis of the post Second World War period the author draws three central conclusions Firstly restrictions and violence offer different advantages suffer from different drawbacks and matter differently for identical problems of authoritarian rule Secondly empirical data supports complementarity only as long as political repression preempts political opposition Lastly despite its conceptual centrality political repression has little influence on the outcomes of authoritarian politics The book also offers new insights into questions such as whether repression hinders successful political campaigns or whether it is more likely to trigger coups d tat *Resources in Education*, 1996 *The International Political Economy of Transformation in Argentina, Brazil and Chile Since 1960* E. Pang, 2002-09-06 This book is about how the three most important countries in South America have responded to the challenges of globalization since the mid 1960s the first OPEC price hike the Third World debt crisis leading to the lost decade for the continent and finally bold but often ill planned neo liberal reforms of the 1990s Latin America will experience another cycle of structural changes in the coming decades as the reforms of the 1980s and 1990s failed to produce the desired effects social justice fair income distribution sustainable growth and consolidation of democracy The State and Democracy in Africa African Association of Political Science, 1998 A study of the issues of democracy and democratisation in Africa with emphasis on the roles of civil society and the state in the democratic transition Includes case studies on women s struggle for equality in Botswana state civil society in Uganda and the role played by the state in blocking undermining or promoting the democratic transition in South Africa Nigeria and Ghana Power and Progress Jack Snyder, 2013-03-01 Jack Snyder is a leading American international relations scholar with an international reputation for his research on IR theory and US Foreign policy This book collects many of his most important essays into a single volume Exploring a liberal realist theory of international politics the book is arranged around three key subject areas Anarchy and Its Effects The Challenges of Democratic Consolidation Empire and the Promotion of a Liberal Order With a new introduction to frame the selected essays this collection examines how developing nations evolve political systems and fit into a world dominated by liberal democracies It looks to the future for the current dominant powers in a changing world of international relations and at the challenges to their leadership Featuring a new conclusion developed from the assembled chapters this is a fascinating and vital collection of scholarship from one of the most influential theorists of his generation Power and Progress is an invaluable text for students and scholars of international relations and those interested in the debates on liberalism and realism and comparative politics *A decade of REDD+ in a changing political environment in the Democratic Republic of Congo* Kengoum Djiegni, F., Pham, T.T., Sonwa, D.J., 2020-12-31 Key messages The REDD policy

process in the Democratic Republic of Congo DRC over the past decade has diverged from the initial government planning due to political changes at the international and national levels While participation is perceived by government and international actors as one of the biggest achievements of REDD in the DRC non state actors particularly civil society organizations and Indigenous groups are skeptical about inclusiveness within the decision making process Social inequalities and local power relations may hinder the implementation of participation instruments and the involvement of local and Indigenous communities impeding their ability to achieve reduced deforestation and poverty alleviation The political economy and the lack of data on deforestation and forest degradation and on the recently discovered large swamp in the DRC make it challenging to monitor report and verify a reduction in forest emissions within a multilevel setting The experience of REDD tested at scale in the DRC through the Mai Ndombe jurisdictional project highlights the cost challenges of generating timely and accurate data Supporting REDD finance in the DRC is difficult since the country relies entirely on international funding to fight climate change A benefits sharing mechanism remains unclear Consequently there is a lack of flexibility in addressing unanticipated costs that may result from the implementation of the process This jeopardizes the success of the process and raises uncertainty about the expected results Emerging issues such as community forestry and the discovery of large swamp areas make the DRC more attractive for the REDD program The first issue offers a workaround to the problem of securing communal rights while the second issue provides additional opportunities for REDD activities
