Political And Socioeconomic Transformation Of Turkey:

The Political and Socioeconomic Transformation of Turkey Atila Erlap, Muharrem Tunay, Birol Yesilada, 1993-08-18
The decade of the 1980s marked a crucial turning point in Turkey's socioeconomic structure and polity. At the heart of the socioeconomic transformation lay the January 24 1980 economic austerity package and the September 12 1980 coup d'état both of which altered not only the Turkish economy and societal structure but the political system and external relations as well. The meanings of right and left modernity and backwardness and of Turkishness were completely revised. This book shows the nature of this socioeconomic and political transformation and assesses the success and failure of relevant policies as the country prepares to enter the 21st century.

About the Author

Social Power and the Turkish State Tim Jacoby, 2004-08-02
This book focuses on the historical sociology of the Turkish state seeking to compare the development of the Ottoman Turkish state with similar processes of large scale historical change in Europe identified by Michael Mann in *The Sources of Social Power*. Jacoby traces the contours of Turkey's modernisation with the intention of formulating a fresh way to approach state development in countries on the global economic periphery particularly those attempting to effect closer ties with northern markets. It also highlights matters of social change pertinent to states grappling with issues relating to political Islam minority identity and irredentist dissent.

The political economy of Turkey's integration into Europe Elif Uzgören, 2025-03-11
This book examines Turkey's integration with Europe within structural dynamics of globalisation from a critical political economy perspective. Critical approaches have been sidelined within European Studies. Turkish enlargement is not an exemption. The analyses are based on original data generated by 109 interviews conducted in 2010 2017 and 2023 with five categories of actors: representatives of capital and labour political parties state officials and struggles around ecology patriarchy and migration. It argues that the pro-membership was hegemonic in the 2000s which was contested by two rival class strategies: *Ha-vet* and neo-mercantilism. In the 2010s pro-membership is no longer hegemonic within rising critical tone of social forces supporting rival class strategies. Unevenness of Turkey's trajectory of integration to Europe is likely to be consolidated through market integration and management of migration through transactional approach.

Turkey's Relations with the West and the Turkic Republics Idris Bal, 2017-11-22
This title was first published in 2000. An analysis of the relations between Turkey the West and the

newly independent Turkic Republics in the context of the Turkish Model proposed and supported by the West as a possible model for development in the Turkic Republics It summarizes the Turkish Model of development as applied in Turkey including its shortcomings and discusses the role of Turkey in the area after the collapse of the Soviet Union from the point of view of both the West and Turkey itself It also analyzes the possible reasons why the Turkish Model was proposed and how the Turkic Republics received it and why it declined from favour in a short period of time *Economic Development and Political Reform* Bradley Louis Glasser, 2001-01-01 Providing new theoretical perspectives on Third World political and economic reform this innovative volume will be of particular interest to political economists international governmental and developmental organizations international financial institutions and non governmental organizations in this region BOOK JACKET *Economic Transitions to Neoliberalism in Middle-Income Countries* Alfredo Saad-Filho, Galip L. Yalman, 2009-12-04 Neoliberalism is based on the systematic use of state power to impose under the veil of non intervention a hegemonic project of recomposition of capitalist rule in most areas of social life The tensions and displacements embedded within global neoliberalism are nowhere more evident than in the middle income countries At the domestic level the neoliberal transitions have transformed significantly the material basis of social reproduction in these countries These transformations include but they are not limited to shifts in economic and social policy They also encompass the structure of property the modality of insertion of the country into the international economy and the domestic forms of exploitation and social domination The political counterpart of these processes is the limitation of the domestic political sphere through the insulation of markets and investors from social accountability and the imposition of a stronger imperative of labour control allegedly in order to secure international competitiveness These economic and political shifts have reduced the scope for universal welfare provision and led to regressive distributive shifts and higher unemployment and job insecurity in most countries They have also created an income concentrating dynamics of accumulation that has proven immune to Keynesian and reformist interventions This book examines these challenges and dilemmas analytically and empirically in different national contexts This edited collection offers a theoretical critique of neoliberalism and a review of the contrasting experiences of eight middle income countries Brazil China India Mexico South Africa South Korea Turkey and Venezuela The studies included are interdisciplinary ranging across economics sociology anthropology international relations political science and related social sciences The book focuses on a materialist understanding of the workings of neoliberalism as a modality of social and economic reproduction and its everyday practices of dispossession and exploitation It will therefore be of particular interest to scholars in industrial policy neoliberalism and development strategy *Turkish Foreign Policy Since 1774* William M. Hale, 2013 This revised and updated version of William Hale s *Turkish Foreign Policy 1774 2000* offers a comprehensive and analytical survey of Turkish foreign policy since the last quarter of the eighteenth century when the Turks relations with the rest of the world entered their most critical phase In recent years Turkey s international role has

changed and expanded dramatically and the new edition revisits the chapters and topics covered in light of these changes Drawing on newly available information and ideas the author carefully alters the earlier historical narrative while preserving the clarity and accessibility of the original Combining the long historical perspective with a detailed survey and analysis of the most recent developments this book fills a clear gap in the literature on Turkey s modern history For readers with a broader interest in international history it also offers a crucial example of how a medium sized power has acted in the international environment

Turkey's Cold War Saban Halis Çalis,2016-11-30 Drawing on a variety of sources ranging from interviews with key figures to unpublished archival material Saban Halis Calis traces this ambition back to the 1930s In doing so he demonstrates that Turkey s policy has been shaped not just by US and Soviet positions but also by its own desire both to reinforce its Kemalist character and to Westernise The Cold War therefore can be seen as an opportunity for Turkey to realise its long held goal and align itself economically and politically with the West This book will shed new light on the Cold War and Turkey s modern diplomacy and re orientate existing understandings of modern Turkish identity and its diplomatic history

State Violence and the Right to Peace Kathleen Malley-Morrison,2009-10-22 A thought provoking revelation of the ways ordinary people conquerors and conquered imperialists and the colonized Christians Jews and Muslims think about war and peace Filled with personal reflections from every corner of the globe State Violence and the Right to Peace An International Survey of the Views of Ordinary People is a masterful portrayal of how people from diverse cultures religions and experiences think about war and peace Spanning four volumes State Violence and the Right to Peace brings together the views of shopkeepers day laborers clerical workers students teachers social workers veterans and others talking about governmental aggression torture and protesting acts of war These views from Europe North America South America the Middle East Africa and Asia are seen in the context of major historical battles including the empire building of Western European countries the emergence and contraction of the Soviet Union and the wars in the Middle East As this remarkable resource shows there are some surprising similarities in thinking about war and peace across nations and cultures and some equally surprising cases where opinions diverge
