The Security Factor in The Political Economy of Development Mr. Martin C. McGuire, 1998-03-01 A country's judiciary police and security forces are essential to protect the State from external aggression By virtue of the State's monopoly of coercion they maintain a stable legal framework and the safety of persons and property All these activities enhance a society's productivity but they also sustain the particular political regime and its redistributive ethic in power They absorb resources but they also waste them since security forces tend to be rent seekers This paper analyzes both the productive and the unproductive side of security provision and shows that the balance depends on the nature of the political regime

The Political Economy of Rural-Urban Conflict Topher L. McDougal, 2017-07-07 In some cases of insurgency the combat frontier is contested and erratic as rebels target cities as their economic prey In other cases it is tidy and stable seemingly representing an equilibrium in which cities are effectively protected from violent non state actors What factors account for these differences in the interface between urban based states and rural based challengers To explore this question this volume examines two regions representing two dramatically different outcomes In West Africa Liberia and Sierra Leone capital cities became economic targets for rebels who posed dire threats to the survival of the state In Maoist India despite an insurgent ideology aiming to overthrow the state via a strategy of progressive city

capture the combat frontier effectively firewalls cities from Maoist violence This book argues that trade networks underpinning the economic relationship between rural and urban areas termed interstitial economies may differ dramatically in their impact on and response to the combat frontier It explains rebel predatory tendencies towards cities as a function of transport networks allowing monopoly profits to be made by urban based traders It explains combat frontier delineation as a function of the social structure of the trade networks hierarchical networks permit elite elite bargains that cohere the frontier These factors represent what might be termed respectively the hardware and software of the rural urban economic relationship Of interest to any student of political economy and violence this book presents new arguments and insights about the relationships between violence and the economy predation and production core and periphery

The Political Economy of War and Peace Murray Wolfson, 2012-12-06 cancer n any malignant tumor Metastasis may occur via the bloodstream or the lymphatic channels or across body cavities setting up secondary tumors Each individual primary tumor has its own pattern There are probably many causative factors Treatment depends on the type of tumor the site of the primary tumor and the extent of the spread Oxford Concise Medical Dictionary 1996 97 Let us begin by stating the obvious Acts of organized violence are not necessarily of human nature but they are endogenous events arising within the an intrinsic part evolution of complex systems of social interaction To be sure all wars have features in common people are killed and property is destroyed but in their origin wars are likely to be at least as different as the social structures from which they arise Consequently it is unlikely that there can be a simple theory of the causes of war or the maintenance of peace The fact that wars are historical events need not discourage us On the contrary we should focus our understanding of the dimensions of each conflict or classes of conflict on the conjuncture of causes at hand It follows that the study of conflict must be an interdisciplinary one It is or a penchant for eclecticism that leads to that conclusion but the not humility multi dimensionality of war itself
