Substate Regionalism and the Federal System United States. Advisory Commission on Intergovernmental Relations, 1974 **National Resources and Urban Policy** Douglas E. Ashford, 2023-05-31 First published in 1980 National Resources and Urban Policy critically examines how resource constraints affect urban development and urban policy making With case studies from the United States several European countries and Japan it brings themes like federal assistance programs local government revenues urban resources the American capital market and federal programs urban investment controls in Britain local government investment expenditures in West Germany Japan confronts its cities New York City fiscal crisis public housing in metropolitan London and restructuring the resource flow This book is a must read for scholars and researchers of urban politics public administration urban studies public policy and political studies Elinor Ostrom and the Bloomington School of Political Economy Daniel H. Cole, Michael D. McGinnis, 2014-12-24 Elinor Lin Ostrom was awarded the 2009 Nobel Memorial Prize in Economic Sciences for her pathbreaking research on economic governance especially the commons but she also made important contributions to several other fields of political economy and public policy The range of topics she covered and the multiple methods she used might convey the mistaken impression that her body of work is disjointed and incoherent This four volume compendium of papers written by Lin alone or with various coauthors most notably including her husband and partner Vincent supplemented by others expanding on their work brings together the common strands of research that serve to tie her impressive oeuvre together That oeuvre together with Vincent's own impressive body of work has come to define a distinctive school of political economic thought the Bloomington School Each of the four volumes is organized around a central theme of Lin's work Volume 1 explores the roles played by the concept polycentricity in the disciplines of public administration political science and other forms of political economy Polycentricity denotes a complex system of governance in which public authorities citizens and private organizations work together to establish and enforce the rules that guide their behavior It encapsulates an approach toward policy analysis that blurs standard disciplinary boundaries between the social sciences Throughout their long and remarkably productive careers Elinor and Vincent Ostrom never tired of reminding us of the capacity of ordinary humans to transcend their own limitations by engaging with others in the myriad forms of collective action required to build and sustain a self governing society Their careers stand as exemplars of the proper relationship between rigorous scholarship and responsible citizenship
