Political Education In A Democracy:

Political Education in a Democracy Harold Entwistle, 2012-05-04 In this volume the author analyzes the relationships of concepts such as socialization and political education explains those aspects of the theory and practice of democracy that are especially relevant for schools and suggests ways in which teachers can better provide for the political education of their students

Creating Citizens Eamonn Callan, 1997 Any liberal democratic state must honour religious and cultural pluralism in its educational policies To fail to honour them would betray ideals of freedom and toleration fundamental to liberal democracy Yet if such ideals are to flourish from one generation to the next allegiance to the distinctive values of liberal democracy is a necessary educational end whose pursuit will constrain pluralism The problem of political education is therefore to ensure the continuity across generations of the constitutive ideals of liberal democracy while remaining hospitable to a diversity of conduct and belief that sometimes threatens those very ideals *Creating Citizens* addresses this crucial problem In lucid and elegant prose Professor Callan one of the world's foremost philosophers of education identifies both the principal ends of civic education and the rights that limit their political pursuit This timely new study sheds light on some of the most divisive educational controversies such as state sponsorship and regulation of denominational schooling as well as the role of non denominational schools in the moral and political development of children *Oxford Political Theory* presents the best new work in contemporary political theory It is intended to be broad in scope including original contributions to political philosophy and also work in applied political theory The series will contain works of outstanding quality with no restriction as to approach or subject matter The series editors are David Miller and Alan Ryan

Political Education and Democracy Tom Brennan, 1981 Britain lags far behind many other countries of ideologies as widely opposed as the USA and USSR in its commitment to political education This book is a lucid and readable argument in favour of increasing the amount of thought and time given to political education in schools and colleges in Britain Tom Brennan traces the ideological and historical background to political education and recent developments in its protagonists campaign looking at the possibilities and problems to be faced in the future He laments the lack of political literacy and political competence amongst all concerned in both politics and education when there is so much information and comment currently available In his final chapter he suggests that ways of positive action are available and presents a strong case for further movement towards a more democratic society

Everyday Peacebuilding through Democratic Political Education Stephen L. Esquith,2025-06-14 Everyday peacebuilding through democratic political education is a necessary but not sufficient condition for limiting negative political emotions such as anger fear and resentment and for cultivating the political virtues needed for an alternative more democratic orientation towards power one that values and exercises power with other members of emergent political communities not power over them These democratic political virtues include self restraint resistance humility respect for the civic dignity of others non violent protest and the radical poise needed to cultivate and coordinate this constellation of political virtues For those who have been forcibly displaced or are only dimly aware of their complicity in this type of political violence to maintain a radically poised stance is a continuing process of democratic political education This book demonstrates how this notion of Radical Poise in theory and practice can be developed through a hybrid process of political education in one country Mali to contest the growth of violence and fear there and elsewhere **The Political Classroom** Diana E. Hess,Paula McAvoy,2014-11-13 WINNER 2016 Grawemeyer Award in Education Helping students develop their ability to deliberate

political questions is an essential component of democratic education but introducing political issues into the classroom is pedagogically challenging and raises ethical dilemmas for teachers Diana E Hess and Paula McAvoy argue that teachers will make better professional judgments about these issues if they aim toward creating political classrooms which engage students in deliberations about questions that ask How should we live together Based on the findings from a large mixed method study about discussions of political issues within high school classrooms The Political Classroom presents in depth and engaging cases of teacher practice Paying particular attention to how political polarization and social inequality affect classroom dynamics Hess and McAvoy promote a coherent plan for providing students with a nonpartisan political education and for improving the quality of classroom deliberations

Political Education in Times of Populism Edda Sant, 2021 In professional and academic contexts nothing is more important than helping people to understand and engage with democratic society Sant has written an excellent book which helps greatly towards that end She has developed incisive new arguments about the nature of contemporary politics and education Using the most recent as well as classic literature she explores key ideas and issues Through wide ranging discussions and by referring to her own valuable empirical work she characterizes and creates thoughtful insights and innovative pedagogical approaches This book achieves the very difficult task of illuminating complex ideas at the same time as helping to determine practical ways to achieve social justice through education Political education has been neglected for too long This book is a bold new step in its achievement Ian Davies Emeritus Professor University of York UK This book examines political education in times of democratic crisis polarisation and uncertainty Using populism as a diagnostic tool the book scrutinises current democratic practices and considers alternatives for future social studies and citizenship education The author examines contemporary events including Brexit the Catalan referendum for independence and protests in Chile to ask how democratic educators can respond to times of crisis Centered on themes of knowledge and ideology the book draws together political philosophy and educational research to map out critically analyse and offer alternatives to dominant debates on political education It will be of interest and value to scholars examining the relationship between democracy and educational theory and practice Edda Sant is Senior Lecturer at Manchester Metropolitan University UK A former social studies teacher her research interests lie in citizenship political and democratic education She has published widely in this field and in 2016 her co authored article was recognized with a Children s Identity Citizenship European Association Award

Who's Afraid of Political Education? Henry Tam, 2024-12-10 Democracy should enable citizens to play an informed role in determining how power is exercised for their common wellbeing but this only works if people have the understanding skills and confidence to engage effectively in public affairs Otherwise any voting system can be subverted to serve the interests of propagandists and demagogues This book brings together leading experts on learning for democracy to explore why and how the gap in civic competence should be bridged Drawing on research findings and case examples from the UK the US and elsewhere it will set out why change is

necessary what could be taught differently to ensure effective political engagement and how a lasting impact in improving citizens learning for democratic participation can be made Moral and Political Education Stephen Macedo, Yael Tamir, 2002 What are the proper aims of education in a liberal democracy The essayists in this volume bring philosophical political and legal reflection to bear on the practical questions of how education should be changed for the 21st century
