Political Ideology And Class Formation A Study Of The Middle Class:

Political Ideology and Class Formation Carolyn Howe, 1992-11-24 In *Political Ideology and Class Formation* Carolyn Howe presents an analysis of theories of the middle class focusing on the class location and political ideology of three strata referred to as managers knowledge controllers and semi professionals Five theories of the middle class are systematically examined new class new working class new petit bourgeoisie new labor aristocracy and contradictory class locations Using these five theories the author offers an accessible analysis of recent debates within class analysis and stratification studies The first chapter situates these debates within traditional sociological studies of social class from Marx and Weber to contemporary scholars working within the traditions of Marx and Weber Using data from the Class Structure and Class Consciousness Study initiated by Erik Olin Wright at the University of Wisconsin Howe develops a comparative study of the United States and Sweden She concludes with a new model of the class structure of advanced capitalist countries In the final chapters Howe develops an analysis of political ideological cleavages within classes and looks at the potential for interclass political coalitions and alliances She states that class analysis must also include an analysis of race and gender as capitalist societies are also fundamentally structured by race and gender inequalities Recommended for sociologists political scientists and other scholars of class analysis stratification political theory and social movements , [Class and Race Formation in North America](#) James W. Russell, 2009-01-01 Russell's meticulously researched and highly detailed book presents a critically important people's history of North America It provides rich insights and demonstrates the potential of comparative research to broaden our perspective Dan Zuberi University of British Columbia **The Making of the Chinese Middle Class** Jean-Louis Rocca, 2016-11-07 This book analyses the making of the Chinese middle class that started in the 1990s using a constructivist approach With the development of the Chinese economy a new group of middle wage earners appeared Chinese social scientists and state institutions promoted the idea that China needs a middle class to achieve modernization Middle class members are defined and define themselves as good consumers educated people politically engaged but reasonable citizens As such the making of the middle class is the result of three convergent phenomena an attempt to define the middle class a process of civilization and the development of protest movements The making of the Chinese middle class Rocca argues is a way to end the stalemate that modern Chinese society is facing in particular the necessity to democratize without introducing an election system **To Govern China** Vivienne Shue, Patricia M. Thornton, 2017-10-26 How practically speaking is the Chinese polity as immense and fissured as it has now become actually being governed today Some analysts highlight signs of progress in the direction of more liberal open and responsive rule Others dwell instead on the many remaining obstacles to a hoped for democratic transition Drawing together cutting edge research from an international panel of experts this volume argues that both those approaches rest upon too starkly drawn distinctions between democratic and non democratic regime types and concentrate too narrowly on institutions as opposed to practices The prevailing

analytical focus on adaptive and resilient authoritarianism a neo institutionalist concept fails to capture what are often cross cutting currents in ongoing processes of political change Illuminating a vibrant repertoire of power practices employed in governing China today these authors advance instead a more fluid open ended conceptual approach that privileges nimbleness mutability and receptivity to institutional and procedural invention and evolution **International**

Fascism and Political Theory Daniel Woodley,2009-09-17 Fascism and Political Theory offers both students and researchers a thematic analysis of fascism focusing on the structural and ideological links between fascism capitalism and modernity Intended as a critical discussion of the origins and development of fascist ideology each chapter deals with a core substantive issue in political theory relevant to the study of fascism and totalitarianism beginning with an assessment of the current state of debate The emphasis on formal ideology in contemporary Anglo American historiography has increased our awareness of the complexity and eclectic nature of fascist ideologies which challenge liberalism and social democracy Yet in too many recent works a programmatic or essentialist reading of fascist ideology as a secular religion is taken for granted while researchers remain preoccupied with the search for an elusive fascist minimum In this book Woodley emphasizes that many outstanding questions remain including the structural and ideological links between fascism and capitalism the social construction of fascist nationalism and the origins of fascist violence in European colonialism This volume consolidates the reader s theoretical understanding and provides the interdisciplinary skills necessary to understand the concrete social economic and political conditions which generate and sustain fascism A timely critique of culturalist and revisionist approaches in fascism studies which provides a concise overview of theoretical debates between liberalism Marxism and poststructuralism this text will be of great interest to students of politics modern history and sociology **Contested**

this book demonstrates however more than a third of India's middle class is rural and 17 per cent of rural households belong to the middle class The book brings this vast and dynamic population into view so confronting some of the most crucial neglected questions of the contemporary global economy

Waking from the Dream Louise E. Walker, 2013-02-20 When the postwar boom began to dissipate in the late 1960s Mexico's middle classes awoke to a new economically terrifying world And following massacres of students at peaceful protests in 1968 and 1971 one party control of Mexican politics dissipated as well The ruling Institutional Revolutionary Party struggled to recover its legitimacy but instead saw its support begin to erode In the following decades Mexico's middle classes ended up shaping the history of economic and political crisis facilitating the emergence of neo liberalism and the transition to democracy Waking from the Dream tells the story of this profound change from state led development to neo liberalism and from a one party state to electoral democracy It describes the fraught history of these tectonic shifts as politicians and citizens experimented with different strategies to end a series of crises In the first study to dig deeply into the drama of the middle classes in this period Walker shows how the most consequential struggles over Mexico's economy and political system occurred between the middle classes and the ruling party
