Political Identity and the Metaphysics of Politics Gabriele De Anna,Manuele Dozzi,2023-05-05 The chapters in this volume clarify the notion of political identity by focusing on the metaphysics of politics By analysing the notion of political identity they provide the conceptual resources for a deeper understanding of the theoretical and practical debates on populism the crisis of sovereignty the feasibility of a world government and ethical religious and cultural pluralism What is a political community Any answer to this question lies at the intersection between three fields metaphysics philosophy of action and political philosophy The question concerns how and why a plurality of individuals becomes a political unity what principles or forces keep that unity together and what threats that unity can encounter In this volume the contributors investigate how different metanormative views affect the possible answers to this metaphysical question They explore the role that the individual identities of agents play in grounding common practices that underpin political life They investigate the individual identities of agents as the result of the interplay between natural and cultural factors Finally they observe the ways in which a political community as a collection of individuals who hang together in an attempt to reach common purposes demonstrate a certain metaphysical solidity *Political Identity and the Metaphysics of Politics* will appeal to researchers and advanced students working in metaphysics political philosophy political theory and philosophy of action

Politicians Don't Pander Lawrence R. Jacobs,Robert Y. Shapiro,2000-05-21 Public opinion polls are everywhere Journalists report their results without hesitation and political activists of all kinds spend millions of dollars on them fueling the widespread assumption that elected officials pander to public opinion that they tailor their policy decisions to the results of polls In this provocative and engagingly written book the authors argue that the reality is quite the opposite In fact when not facing election contemporary presidents and members of Congress routinely ignore the public s policy preferences and follow their own political philosophies as well as those of their party s activists their contributors and their interest group allies Politicians devote substantial time effort and money to tracking public opinion not for the purposes of policymaking but to change public opinion to determine how to craft their public statements and actions to win support for the policies they and their supporters want Taking two recent dramatic episodes President Clinton s failed health care reform campaign and Newt Gingrich s Contract with America as examples the authors show how both used public opinion research and the media to change the public s mind Such orchestrated displays help explain the media s preoccupation with political conflict and strategy and the authors argue have

propelled levels of public distrust and fear of government to record highs Revisiting the fundamental premises of representative democracy this accessible book asks us to reexamine whether our government really responds to the broad public or to the narrower interests and values of certain groups And with the 2000 campaign season heating up Politicians Don t Pander could not be more timely Polling has turned leaders into followers laments columnist Marueen Dowd of The New York Times Well that s news definitely not fit to print say two academics who have examined the polls and the legislative records of recent presidents to see just how responsive chief executives are to the polls Their conclusion not much In fact their review and analyses found that public opinion polls on policy appear to have increasingly less not more influence on government policies Richard Morin The Washington Post

Beyond Groupthink Paul t Hart, 2010-03-25 Strategic issues and crises in foreign policy are usually managed by relatively small groups of elite policymakers and their closest advisors Since the pioneering work of Irving Janis in the early 1970s we have known that the interplay between the members of these groups can have a profound and indeed at times a pernicious influence on the content and quality of foreign policy decisions Janis argued that groupthink a term he used to describe a tendency for extreme concurrence seeking in decision making groups was a major cause of a number of U S foreign policy fiascoes And yet not all small groups suffer from groupthink in fact many high level bodies are handicapped by an inability to achieve consensus at all Beyond Groupthink builds upon and extends Janis s legacy The contributors develop a richer understanding of group dynamics by drawing on alternate views of small group dynamics The relevant literature is reviewed and the different perspectives are explored in detailed case studies The contributors link the group process to the broader organizational and political context of the policy process and stress the need to develop a multi level understanding of the collegial policy making process combining the insights drawn from micro level theories with those derived from study of broader political phenomena The contributors include Alexander George Sally Riggs Fuller Paul D Hoyt Ramon J Aldag Max V Metselaar Bertjan Verbeek J Thomas Preston Jean A Garrison and Yaacov Y I Vertzberger This book should appeal to political scientists and international relations specialists as well as researchers in social psychology public administration and management interested in group decision making processes Paul t Hart is Associate Professor Department of Public Administration Leiden University and Scientific Director of of the Leiden Rotterdam Crisis Research Center Eric Stern is Professor of Political Science at Stockholm University Bengt Sundelius is Professor of Political Science at Stockholm University

theorists on the definition and contemporary practice of democratic manipulation This impressive array of distinguished scholars political scientists philosophers cognitive psychologists and communications scholars collectively draw out the connections between competing definitions of manipulation the psychology of manipulation and the political institutions and practices through which manipulation is seen to produce a tightly knit exploration of an issue at the heart of democratic politics
