Political Economy Of Aging The State Private Power And Social Welfare:

The Political Economy of Aging Laura Katz Olson,1982 **Age, Class, Politics, and the Welfare State** Fred C. Pampel,John B. Williamson,1989 Detailed analysis of data from the UN ILO and the World Bank leads to the conclusion that a large aged population especially in combination with democratic political processes has a direct and crucial influence on the level of welfare expenditures **Eldercare, Distributive Justice, and the Welfare State** Derek Gill,Stanley R. Ingman,1994-01-01 The essays in this book describe the situation of the elderly today taking into account the major political economic and social variations of service provided in a variety of countries Although the welfare state exists in all developed and developing countries its content and administration varies substantially The editors first develop a framework of concepts and perspectives that establish links between eldercare distributive justice and the welfare state This is followed by analyses of the services provided to the elderly in selected countries Finally the editors show how and in what ways the concepts developed earlier in the introduction equity uniformity public accountability individualism collectivism institutional or residual welfare state orientation high or low wage economy apply to and explain the differences in care of the elderly

Services to the Aging and Aged Paul K. Kim,2021-03-04 This series attempts to address the topic of aging from a wide variety of perspectives and to make available some of the best gerontological thought and writings to researchers professional practitioners and students in the field of aging as well as in other related areas This volume is an invaluable resource for those persons seeking a broad comprehensive coverage of current public policies and service programs for the elderly Besides dealing with present gerontological services it also explores the emerging challenges that these services must face in the future One of the outstanding features of the book is that its contributors include some of the most prominent authorities in the field of gerontology This is an exceptionally important and timely volume and is a much needed addition to the literature on aging **The Welfare State Crisis and the Transformation of Social Service Work**

Michael Fabricant,Steve F. Burghardt,Irwin Epstein,2016-09-16 This book has emerged in response to social service workers vivid descriptions of changes in the practice of their craft during the past 15 years and to the scanty literature that addressed their concerns Few works have attempted to explore the interplay between the recent broader changes affecting the welfare state fiscal crisis cost containment privatization etc and the restructuring of social service work Yet it is clear that the fiscal decisions of the 1980s profoundly affected both the context and content of social service practice The Welfare State Crisis and the Transformation of Social Service Work explores how these larger forces have created significant changes for the line practitioner The greater push for caseload volume in the face of resource scarcity is redefining service encounters in ways that are more likely to meet the fiscal needs of the agency rather than the service needs of clients and the professional concerns of the worker In short the fiscal crisis of the past two decades has placed the enterprise of social services at risk After empirically documenting the seriousness of the risk The Welfare State Crisis and the Transformation of Social Service

Work concludes with an exploration of new social service practice strategies that have the potential to integrate the individual organization communal and social changes necessary for effective service interventions Voices and Visions of Aging Robert Kastenbaum, PhD, Thomas R. Cole, PhD, W. Andrew Achenbaum, PhD, Patricia L. Jakobi, PhD, 1992-11-15 A critical gerontology requires more than a simple elaboration of existing humanistic scholarship on aging This exceptional new work introduces a basis for genuine dialogue across humanistic scientific and professional disciplines Among the topics addressed are industrial employment retirement life styles of older women and biological research From philosophical reflections on the third age to critical perspectives on institutional adaptations to an aging society this book presents a wide range of provocative thought The Elgar Companion to Feminist Economics Janice Peterson, Margaret Lewis, 2001-01-01 Comprehensive reference work introducing readers to the field of feminist economics It addresses key concepts as well as feminist economic critiques and reconstructions of major economic theories and policy debates *Cultures of Ageing* Chris Gilleard, Paul Higgs, 2014-08-21 For undergraduate courses in sociology and psychology which examine ageing adulthood This book focuses on the dramatic changes to the nature of post retirement life experienced by people at the end of the twentieth century It examines age and ageing in terms of the key preoccupations of contemporary sociology citizenship the body and the self The book provides a platform for a new social gerontology that sees ageing as central to our understanding of social change It examines social cultural and political changes in Europe and North America to address the need for a text that moves the study of ageing from social policy towards the mainstream of social science **Medicine and the Body** Simon Williams, 2003-03-19 An intelligent and informed account of medical sociology Simon Williams has produced an original and comprehensive sociological statement of the centrality of the body to an understanding of medicine health and illness His scope is impressive It will shape future teaching and research in the field of health and illness Bryan S Turner Professor of Sociology University of Cambridge This is a clear well written account of medicine health and the body Taking recent debates on the body and society as its point of departure the book critically reexamines a series of embodied issues and emotional agendas in health and illness Included here are cutting edge discussions and debates concerning the medicalized body health inequalities childhood and ageing the dilemmas of high tech medicine chronic illness and disability caring and bio ethics sleep death and dying the body in late postmodernity Written in an accessible engaging style with many original and innovative insights the book will appeal to undergraduate and postgraduate students alike and to researchers and lecturers with an interest in the embodied agendas of health and medicine in the new millennium **Handbook of Asian Aging** Hyunsook Yoon, Jon Hendricks, 2018-10-26 In western countries the rising tide of population aging took 100 years to alter the face of societies but Asia is experiencing comparable changes in not much more than a quarter of a century Contributors to The Handbook of Aging describe the magnitude of these changes and their effects on the aged and on societies attempting to adapt to the dramatic improvements in life expectancy brought on by rapid economic and social

transformations Asia encompasses a vast reach from Pakistan and India to Japan the Philippines and Indonesia and in this book including Australia The Handbook of Aging provides a framework for making sense of the meeting between reverential views of the elderly and contemporary priorities as Asia arrives at the crossroads The need for innovative approaches to social policy and personal practices is nowhere more evident than in Asian countries where modern marketing economies have forced hard political choices The economic tigers of the Asian Pacific region experienced the aging of their populations ahead of other Asian countries but solutions reached during times of financial boom are being re examined as economies come back to earth with soft or hard landings The Handbook of Asian Aging provides an atlas of the far reaching changes that are afoot and that will become even more pronounced in the near future
