Political Economy Of Diet And Health:

The Political Economy of Diet, Health and Food Policy Ben Fine,1998 **The Political Economy of Diet and Health** Ben Fine,1998 **The Political Economy of Food System Transformation** Danielle Resnick,Johan Swinnen,2023-09-21 This is an open access title available under the terms of a CC BY NC 4 0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations The current structure of the global food system is increasingly recognized as unsustainable In addition to the environmental impacts of agricultural production unequal patterns of food access and availability are contributing to non communicable diseases in middle and high income countries and inadequate caloric intake and dietary diversity among the world s poorest To this end there have been a growing number of academic and policy initiatives aimed at advancing food system transformation including the 2021 UN Food Systems Summit the Sustainable Development Goals SDGs and several UN Climate conferences Yet the policy pathways for achieving a transformed food system are highly contested and the enabling conditions for implementation are frequently absent Furthermore a broad range of polarizing factors affect decisions over the food system at domestic and international levels from debates over values and mis information to concerns over food self sufficiency corporate influence and human rights This volume explicitly analyses the political economy dynamics of food system transformation with contributors who span several disciplines including economics ecology geography nutrition political science and public policy The chapters collectively address the range of interests institutions and power in the food system the diversity of coalitions that form around food policy issues and the tactics they employ the ways in which policies can be designed and sequenced to overcome opposition to reform and processes of policy adaptation and learning Drawing on original surveys interviews empirical modelling and case studies from China the European Union Germany Mexico South Asia sub Saharan Africa and the United States the book touches on issues as wide ranging as repurposing agricultural subsidies agricultural trade biotechnology innovations red meat consumption sugar sweetened beverage taxes and much more **The political economy of food and nutrition policies** Per Pinstrup-Andersen,1993-01-01 Few nutritionists and economists fully appreciate how the political environment shapes policy and subsequently affects the relevance of their policy recommendations When governments fail to follow the recommendations of nutritionists and economists and are unable to design and implement cost effective nutrition programs and policies it is often attributed to politics or to lack of political will on the part of decisionmakers Past nutrition planning efforts frequently failed to understand the goals and behavior of the various agents and institutions inside and outside the government that in the final analysis determine whether the planning effort is successful In *The Political Economy of Food and Nutrition Policies* Per Pinstrup Andersen brings together a group of distinguished authorities to improve the understanding of how nutrition policies are formulated within larger political and economic contexts and how public sector agencies behave with regard to food and nutrition **The Political Economy of**

Food and Finance Ted P. Schmidt, 2015-12-14 The financialization globalization and industrialization of our food systems make it increasingly difficult to access quality fresh food In fact the industrialized global food system is creating products that are less food like engendering growing questions about the health and safety of our food supply In addition the bio engineering of food commodities is another factor influencing the growth of industrial farming for an increasingly homogenized globalized market This book describes the financialization process in commodity futures markets which transformed commodities into an asset class Incorporated into the portfolio decisions of investors commodity prices now behave like all asset prices becoming more volatile and subject to periodic bubbles As commodity prices were driven higher in the 2000s farmland became more valuable setting off a global land grab by investors nations and corporations More recently under the financialization food regime slow growth and low returns encouraged merger activity driven by private equity firms with food industry corporations as prime targets leading to increased industry concentration With government policy focused on supporting corporate interests there has been a global reaction to the current food system The food sovereignty movement is taking on the interests behind the global land grab and the regional food movement in cities across the U S is hitting corporations at the bottom line Food corporations are listening Is the food movement winning This book is of interest to those who study political economy financialization and agriculture and related studies as well as food systems and commodity future markets

The Political Economy of Rule Evasion and Policy Reform Jim Leitzel, 2002-11-07 This book develops the logic underlying the connections between breaking the rules and making the rules Approaching policy issues from this point of view provides a perspective that illuminates a wide variety of phenomena

Normative Political Economy David P. Levine, 2021-04-29 Normative Political Economy explores the criteria we use for judging economic institutions and economic policy It argues that prevailing criteria lack sufficient depth in their understanding of subjective experience David Levine s arguments cover topics which include basic needs equality and justice freedom self integration and creative living the role of the state capitalism and the good society

The Oxford Handbook of the Economics of Food Consumption and Policy Jayson L. Lusk, Jutta Roosen, Jason Shogren, 2013-08-15 First reference on food consumption and policy

The Political Economy of South Africa's Post-apartheid Transition Benjamin Fine, 2025-05-26 South Africa s post apartheid transition has proven disastrous It is marked by the emergence of a black elite of enriched capitalists out of the globalisation neoliberalisation and financialisation of the economy in general and of its Minerals Energy and Financial Complex in particular By contrast inequalities poverty and failing social provision have persisted Recent attention has shifted to how this disastrous trajectory was initiated some suggesting a lack of available alternative policy options at the time of transition This is shown to be false with a full range of progressive alternatives being rejected with corresponding consequences from state capture to electoral defeat

Ownership Economics Gunnar Heinsohn, Otto Steiger, 2013-04-02 This book presents the first full length explanation in English of Heinsohn and Steiger s groundbreaking theory of money and interest which

emphasizes the role played by private property rights Ownership economics gives an alternative explanation of money and interest proposing that operations enabled by property lead to interest and money rather than exchange of goods Like any other approach it has to answer economic theory's core question what is the loss that has to be compensated by interest Ownership economics accepts neither a temporary loss of goods as in neoclassical economics nor Keynes's temporary loss of already existing exogenous money as the cause of interest Rather money is created as a non physical title to property in a credit contract secured by a debtor's collateral and the creditor's net worth This book is an edited English translation of a highly successful German text and offers the first book length treatment of a theory which has received much interest since its first appearance in articles in the late 1970s
