Dunn, Defense Academic Research Support Program (U.S.), Defense Intelligence College (U.S.). Defense Intelligence Analysis Center, 1990 *Globalisation contested* Louise Amoore, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This exciting book provides an illuminating account of contemporary globalisation that is grounded in actual transformations in the areas of production and the workplace It reveals the social and political contests that give global its meaning by examining the contested nature of globalisation as it is expressed in the restructuring of work Rejecting conventional explanations of globalisation as a process that automatically leads to transformations in working lives or as a project that is strategically designed to bring about lean and flexible forms of production this book advances an understanding of the social practices that constitute global change Through case studies that span from the labour flexibility debates in Britain and Germany to the strategies and tactics of corporations and workers the author examines how globalisation is interpreted and experienced in everyday life Contestation she argues is about more than just direct protests and resistances It has become a central feature of the practices that enable or confound global restructuring This book offers students and scholars of international political economy sociology and industrial relations an innovative framework for the analysis of globalisation and the restructuring of work Gender and Global Restructuring Marianne H. Hegemony in the Global Political Economy Henk W Overbeek, 1993-05-06 Since the late 1970s the spread of Neo liberalism and the failure of socialist economies and systems in Eastern Europe have resulted in a practically unchallenged hegemony of international capital across the globe Neo liberalism is now the dominant ideology legitimizing the privatisation of state controlled economies and the substitution of the A Critical Rewriting of Global Political Economy V. Spike Peterson, 2004-03-01 Moving beyond a narrow definition of economics this pioneering book advances our knowledge of global political economy and how we might critically respond to it V Spike Peterson clearly shows how two key features of the global economy increasingly determine everyday lives worldwide The first is explosive growth in financial markets that shape business decision making and public policy making and the second is dramatic growth in informal and flexible work arrangements that shape income generation and family wellbeing These developments though widely recognized are rarely analyzed as inextricable and interacting dimensions of globalization Using a new theoretical model Peterson demonstrates the interdependence of reproductive productive and virtual economies and analyzes inequalities of race gender class and nation as structural features of neoliberal globalization Presenting a methodologically plural cross disciplinary and well documented account of globalization the author integrates marginalized and disparate features of globalization to provide an accessible narrative from a postcolonial feminist vantage point *The Political Economy of Global Capitalism and Crisis* Bill Dunn, 2014-03-21 The book provides a theoretically and historically informed analysis of the global economic crisis It makes original contributions to theories of value of crisis and of the state and uses these to develop a rich empirical study of the changing character of capitalism in the twentieth century and beyond It defends uses and develops Marxist theory while arguing particularly against jumping too quickly from abstract concepts to a concrete understanding of the crisis Instead it uses what Marx described in his notebooks as an obvious analytical ordering to progress from a general analysis of economy and society to a discussion of recent economic transformations and the specifics of the crisis and its aftermath Dunn argues that appropriately reconceived a critical Marxism can incorporate and enrich rather than rejecting insights from other traditions He disputes general characterisations of capitalism to the crisis and theories which see finance and the contemporary financial crises as largely detached from other aspects of the economy and society Providing a thoroughly socialised and historically based account this book will be vital reading for students and scholars of political economy international political economy Marxism sociology geography and development studies
